in all its parts, uses the straight eye
pointed needle, self threading, direct up-
right Positive Motion, new tension, self

This machine is heavily constructed to give
it strength; all the parts of each machine
being made alike by machinery, and beauti-
fully finished and ornamented. It is very
easy to learn. Rapid sewing, an excellent
operation. Reliable at all times, and a practical,
mechanical invention, at greatly re-
duced price.

low price reaches all conditions. Its sim-
plicity and strength adapts it to all caper-
ies, while its many merits make it a uni-
versal favorite wherever used, and create

mend its use to those who are wanting a
really good Sewing Machine at low price.

GEISER'S
PATENT SELF-REGULATING
GRAIN SEPARATOR.

CLEANER, BAGGER AND POWERS!
No implement more important to the
farmer than a First-Class Grain Separator and
Cleaner - for none pays him so well and so
speedily.

The above out shows the only Geiser Ma-
chine now built under the immediate eye
of the old inventors themselves, with all
the additional improvements made during the
past 18 years, and now with

FIRST-CLASS WORKMEN & MATERIAL
this Machine - as it stands high above all
others of its class. As a thrasher it is equal to
any other machine in use. It is superior to
any existing machine. This is admitted by all
honest competitors. Indeed it is the only Ma-
chine that really can, by one operation,
thoroughly thresh and clean grain fit for
market. But the fact that grain direct from
this machine commands from 2 to 3 cents a
bushel more than grain direct from any other
machine, settles the question of its superi-
ority as a cleaner over all others. Impar-
tial judges at all the State and County Fairs
where it was thoroughly and practically
tested, in competition with other leading
machines, always agree that it is more sim-
ple - more easily understood and operated
by those unskilled in machinery - more du-
rable - thrashing as much and yet cleaning
better - with less power and more comfort
to hands than any other machine in use -
and besides all that it is sold for less money
according to capacity. These facts are
further attested by the thousands of pur-
chasers, some of whom have had them in
use for the last 18 years. To supply 100
units of all, we now make 4 sizes, viz:
From a 2 Horse Railway or 3 Horse Lever
Power, to a 10 Horse Lever Power, with
prices ranging from \$100 to \$300, without
number. We also make the latest improved
single and double Horse Powers, suitable for
each size machine, ranging from \$80 to \$135,
and all fully and fairly warranted. For
further information send for circular and
price list.

STEAM-ENGINE AND BOILER WORKS
ESTABLISHED 1853.

STATIONARY AND PORTABLE
STEAM-ENGINES, BOILERS,
Portable Saw Mills,
and all other Machinery made to order.

The above cut represents our Horizontal
Engine with Improved Side Bed. This de-
sign makes it strong, neat and durable, and
upon which we have made some valuable
improvements, especially upon the working
parts making them durable and economi-
cal.

We build Horizontal Engines with box
beds of different sizes and designs and up-
on the most improved plan.
We also make Upright Engines of differ-
ent sizes and styles, and with economy of
space is an object, they have some advan-
tage over the Horizontal, also in the wear
of the Cylinder, which is always equal in an
Upright Engine.

A special point of advantage in these En-
gines is our (A. O. Erick's) recently inven-
ted and patent self-adjusting BALANCED
SLIDE VALVE, suited to all Steam Engines
and Locomotives. It leaves the Engines as
simple in operation as those of the ordina-
ry plain slide valve class. We direct spe-
cial attention to this superior valve, and in
vite correspondence.

We give special attention to Portable
Engines and Saw Mills; also Agricultural
Engines for threshing grain and for farm
purposes generally. Also
