ing Machine. This is admitted by all honest competitors. Indeed it is the only Ma-North East Corner of Public Square market. But the fact that grain direct from this machine commands from 2 to 3 cents a bushel more than grain direct from any other machine, settles the question of its superiority as a clemer over all others. Imparriority as a cleaner over all others. Impartial judges at all the State and County Fairs where it was thoroughly and practically tested, in competition with other leading machines, always agree that it is more simple—more easily understood and operated by those unskilled in machinery—more durable—threshing as much and yet cleaning ing equal to two with the common harrow. The draught not harder and easier managto hands than any other machine in use— and besides all that is sold for less money according to capacity. These facts are further attested by the thousands of pured over rocks. They are also prepared to do all kinds of Blacksmithing and wagonmaking generally done at common shops, use for the last 18 years. To supply too wants of all, we now make 4 sizes, viz:— From a 2 Horse Railway or 3 Horse Lever Power, to a 10 Horse Lever Power, with Thankful to the public for past patronage we solicit a continuance of the same.
