FRICK & CO., PROPS. GEO. FRICK, SUPT. WAYNESBORO STEAM-ENGINE AND BOILER WORKS ESTABLISHED 1853. Stationary and Portable Steam-Engines, Boilers, and all other Machinery made to order. The above cut represents our Horizontal Engine with Improved Side Ect. This design makes it strong, neat and durable and upon which we have made some valuable improvements, especially upon the working parts making them durable and economical. We build Horizontal Engines with box beds of different sizes and designs and upon the most improved plan. We also build Upright Engines of different sizes and styles, and where economy of space is an object, they have some advantage over the Horizontal, also in the wear of the Cylinder, which is always equal in an Upright Engine. A special point of advantage in these Engines is our (A. O. Frick's) recently invented and patent self-adjusting BALANCED SLIDE VALVE suited to all Steam Engines and Locomotives. It leaves the Engines as simple in operation as those of the ordinary plain slide valve class. We direct special attention to this superior valve, and invite correspondence. We give special attention to Portable Engines and Saw Mills; also Agricultural Engines for threshing grain and for farm purposes generally. Also STEAM BOILERS, of all sizes. Further information may be obtained from the manufacturers, FRICK & COMPANY, Waynesboro, Franklin Co., Pa. may 8-14

REMINGTON FAMILY SEWING MACHINE! THE subscriber announces to the public that he has the agency for the sale of the "Remington Family Sewing Machine" in Franklin county. Having tested its working qualities and capacity for several months he can safely recommend it as the very BEST MACHINE IN USE. Its construction is such that it can be run at a higher rate of speed than any shuttle machine now in use. In factories where he has been registered, over 1000 stitches per minute have been attained with ease. It is strong in all its parts, and free from the harsh and jarring movements, and friction, common in inferior machines. A simple change of the needle and thread and it will sew the finest cambric or the heaviest leather. The shuttle carries a large quantity of thread thus saving in a great measure the trouble of filling the bobbins. The Remington has no rotary cast, cog-wheels or lever arms to make a noise, run hard, or to get out of order. Any girl of ordinary intelligence can keep it in order without the least difficulty. The subscriber also informs his customers and the public that he has just opened out his new FALL AND WINTER SUPPLY OF CLOTHS, CASSIMERES, VESTINGS, and all other goods for gentlemen's wear-- He solicits an inspection of his stock.
