GEISER'S PATENT SELF-REGULATING GRAIN SEPARATOR CLEANER, BAGGER AND POWERS!

No implement more important to the farmer than a first-class Grain Thresher and Cleaner—for none pays him so well and so speedily. The above cut shows the only Geiser Machine now built under the immediate eye of the old inventors themselves, with all the additional improvements made during the past 18 years, and now with

FIRST-CLASS WORKMEN & MATERIAL this Machi-e just stands high above all of its class. As a thresher it is equal to the best, as a cleaner it is superior to any existing machine. It is admitted by all honest competitors. Indeed it is the only machine that really can, by one operation, thoroughly thresh and clean grain fit for market. But the fact that grain direct from this machine commands from 2 to 3 cents a bushel more than grain direct from any other machine, settles the question of its superiority as a cleaner over all others. Impartial judges at all the State and County Fairs where it was thoroughly and practically tested, in competition with other leading machines, always agree that it is more simple—more easily understood and operated by those unskilled in machinery—more durable—threshing as much and yet cleaning better—with less power and more comfort to hands than any other machine in use—and besides all that is sold for less money according to capacity. These facts are further attested by the thousands of purchasers, some of whom have had them in use for the last 18 years. To supply the wants of all, we now make 4 sizes, viz:—From a 2 Horse Railway or 3 Horse Lever Power, to a 10 Horse Lever Power, with prices ranging from \$150 to \$300, without exception. We also make the latest improved triple-gear Horse Powers, suitable for each size machine, ranging from \$90 to \$135, and all fully and fairly warranted. For further information send for circular and Price List. Responsible Agents in Territory not introduced. Address: THE GEISER MANUFACT'G CO., WAYNESBORO', Franklin County, Pennsylvania. Jan. 21-14

WAYNESBORO' STEAM-ENGINE AND BOILER WORKS

ESTABLISHED 1853. STATIONARY AND PORTABLE STEAM-ENGINES, BOILERS, and all other Machinery made to order.

The above cut represents our Horizontal Engine with Improved Side Bed. This design makes it strong, neat and durable and upon which we have made some valuable improvements especially upon the working parts making them durable and economical. We build Horizontal Engines with boxes of different sizes and designs and upon the most improved plan. We also make Upright Engines of different sizes and styles, and where economy of space is an object, they also some advantages over the Horizontal, also in the wear of the Cylinder which is always equal in an Upright Engine. A special point of advantage in these Engines is our (A. O. Frick's) recently invented and patent self-adjusting BALANCED SLIDE VALVE, suited to all Steam Engines and Locomotives. It leaves the Engines as simple in operation as those of the ordinary plain slide valve class. We direct special attention to this superior valve, and invite correspondence. We give special attention to Portable Engines and Saw Mills; also Agricultural Engines for threshing grain and for farm purposes generally. Also STEAM BOILERS, of all sizes. Further information may be obtained from the manufacturers, FRICK & COMPANY, Waynesboro', Franklin Co., Pa. may 8-14

This medicine is highly recommended for all chronic and acute complaints, such as Scrofula, Tetter, Salt Rheum, Rheumatism, &c. Prepared by P. FAHRNEY'S BROS. & CO., Waynesboro', Franklin County, Pa. Sold by E. F. Fotherman and J. Burns Amberson, M. D. Druggists, Waynesboro', Pa. June 25-14

REMINGTON FAMILY SEWING MACHINE! THE subscriber announces to the public that he has the honor for the first time in Franklin County, having tested its working qualities and capacity for several months he can safely recommend it as the very BEST MACHINE IN USE. Its construction is such that it can run at a higher rate of speed than any shuttle machine now in use. In factories where the speed has been registered, over 1000 stitches per minute have been attained with ease. It is strong in all its parts, and free from the harsh and jarring movements, and friction, common in inferior machines. A simple change of the needle and thread and it will sew the finest fabric or the heaviest leather. The shuttle carries a large quantity of thread thus saving in a great measure the trouble of filling the bobbins. The Remington has no rotary cams, cog-wheels or lever arms to make a noise, run hard, or to get out of order. Any girl of ordinary intelligence can keep it in order without the least difficulty. The subscriber also informs his customers and the public that he has just opened out his new FALL AND WINTER SUPPLY OF CLOTHS, CASSIMERES, VESTINGS, and all other goods for gentlemen's wear. He solicits an inspection of J. F. FILBERT, oct 16-14
