.....

Ma. FARATA - Die of your correspon-dunis injures houillighting conductors I don't profess much knowledge upon the sub-ject 3 but the write the sub-adom of college with the sub-the the inst place 5 to must be the stid differ Trom you Mr. Banor, in the administry that buildings may have been injured by lighthing when rods ward properly attached. (a) 11 don't believe any such thing. The electric fluid is governed by laws as fixed and invari-able as those which robust in gravitation. You may say that we are ignorant of those laws." I admit that we know comparatively -juil of electricity, the variations of the nee-die the autora light, the connexion of electricity with light and heat, its agency in the growth of vegetables and animals-and its agency in the operations of mind, Those we firmly believe to exist; but of their modus op-

erandi, we are left still to conjecture., It by no means follows that because we know not everything, we can know bothing with certainty. Certain phenomena have been so often observed to accompany certain conditions, as to warrant the inference that the electric fluid is governed by fixed law.

Now to deay the security of lightning rods; Mr Editor, I wonder you did not receive some such spiritual manifestations as he who brought the lightning from the skies, did, when he experimented with the kite,-got smartly rapped over the knuckles.

That buildings have been injured, to which conductors have been attached, and that frequently, can't be denied. Steam boilers sometimes burst, though the capacity of iroh and the power of steam are known with certainty. But the more familiar people become with steam, the fewer, comparatively, are the accidents. So with electricity ; these disasters result from want of knowledge, or carelessness.

It will be found in all cases, I think, unless the striking of Arnold Douglas' house was an exception, for I believe that He who estab. lished the laws of Nature can suspend them, that the injuries sustained are in consequence of some defect in the material, position, length or mode of attachment of the conductor.

The first Baptist Church in Worcester was atruck with lightning some years ago, while the Sabbath School was in session, and several of the children were seriously injured. There was a conductor put up, as was supposed, in the most approved manner. The doubting were made skeptics. Lightning rod stock became a drug in the market; multitudes lost confidence in Ben Franklin; but some one more curious than the multitude, made search for the cause of the disaster. It was easily explained, and the character of the philosopher was vindicated. The house stood upon a solid rock; the conductor was

properly attached, but terminated in solid, dry rock. A hole had been drilled some five feet into this rock, into which the rod descended, and there terminated. In a dry season, the rod was as completely isolated as if it had terminated in a globe of glass. The fluid was taken from the clouds by the point, conducted along the rods, till, finding no natural way of escape, it leaped through the walls of the building, upon the stove-pipe in the basement, along which it ran, to the no Andrew Bozzard, " -small annoyance of the children then assem- | Lucinda Howard, " L. K. Garfield. bled, and escaped by various conductors to {

FURNITURE.

AT WELLSBOROUGH, PA. THE subscriber takes pleasure in announ L cing to his old patrons " and the rest of man kind," that he is still carrying on the

CABINET MAKING In all its branches, at his old Stand, near the Wells brough Academy. His work is manufactured from the best

of materials, and all those, who favor him with a call may rely upon ubtaining articles which for CHEAPNESS ELEGANCE and DURABILI TY, are second to none in the market.

He will endeavor to keep on hand all articles o HOUSEHOLD FURNITURE-such as Pier, Centre, Card, Breakfast & Dining Tables, French, Cottage & Common Bedsteads, Mahogony, Maple and Common Bureaus,

Dress, Light, Work, & Wash Stands. Persons wishing any articles not on hand will be ipplied to order.

COFFINS of every variety on short notice. Chairs! Chairs!

In connection with the above he would state that county a large and well selected assortment of a CANE AND COMMON CHAIRS, Rockers of various patterns, which will

sold ou reasonable terms. D STURROCK. Wellsborough, Joly 14, 1854. NEW ARRANGEMENTS. A. CROWL would announce to the citi A. zens or Tioga county, that he has associated with him a partner, and the business will be con-ducted under the firm of A. Crowit & Co. They will continue at the old stand, in Wellsborough, to manufacture to order and keep on hand,

THE NEW REVO

took and business of ROY & SOPIELD, in the STOVE AVING purchased the TIN COPPER AND SHEET TRON TRADE A would sty to the citizen of Wallsborough and viculity that I intend manufacturing the best of ware, upon the most liberal formers J. D. Bills I. C. of all kinds executed with neathers and dispatch.

Among the approved Stoves of the age I am thoroughly convinced that the KING OF STOVES is truly named, and must take the lead of all Elevated OvenStoves. The principal advantage claimed in this, over all tother stoves; (Elevated Ovens in particular.) is in its diving or reverting flues, the exclusive right of which is guaranteed to the subscriber by Letters Patent from the United States. There being two currents of air passing up and down at the same time on each side of the oven, perfectly enveloping the oven in a current of hot air that cannot escape short of traversing a distance of about twenty feet, all told, making

THE MOST PERFECT BAKER

that can be desired. It has a perfect draft and flues, easily cleaned out. There is a dam. per so, constructed as to give a direct draft where heat is not wanted for baking or warming. The amount of heat is immense for the quantity of fael consumed. The Four Boiler is properly a Village Stove, and works well with wood or coal. You can get a meal for ten persons in thirty five minutes, with seven pounds of dry maple wood. Its sp. pearance is grand, and it is a very pleasant stove to do work with. It is very appropriate for large sitting or dining rooms, and warms with less fire than any parlor stove. The Six Boiler King works equally well, has more capacity, and is adapted to the wants of large families and public houses. This is, in truth, a FARMER'S STOVE.

What can you desire in a Stove that cannot satisfy? If you want capacity for do ing large business, you have it. If you want to warm cold houses or large rooms, it cannot be beat. Draft good, and will burn much or little wood as may be necessary. If you Want to enjoy the greatest blessing that science has ever rendered accessible in the shape

of a Cook Steve, buy the King. The King of Stoves is, in fact, what the name indicates. It is the Chief of Stoves. It does possess the long sought combination, the principle of the Low in the position of the Elevated Oven. If you want a direct draft for boiling, you have it. It you want the revertable flue oven for baking or warming, turn the damper and you have have it in us greatest perfection.

I also intend keeping a large assortment of Low Oven Cook Stoves, the most suitable for this section. Also, as fine an assortment of Parlor and Box or Plate Stoves as has ever been kept in Northern Pennsylvania. I do say boldly, that I will not be undersold, and it is certainly to my credit to deal in none but the most approved of stoves. I take pleasure in showing my stock at all times, if I cannot sell.

Wapled, in exchange for Stoves, Wares, &c., old Iron, Copper, Brass, Pewter and Rags, for which the highest market price will be paid, Call one door below Truman &

Henry Curran..... " Caleb Short.

Now I believe that in all cases of failure Robert's for Burnett, ... to protect, it will be found, upon examination Samuel Satterly, "John S. Warner, that the defact was not in the laws of elec." Smith & Edwards, "Watrous Seely, et al. that the defect was not in the laws of elcctricity, but that they were not observed. Let me suggest a few things to be observed

1st. The conductor must extend to water. Ordinarily, the earth near the surface, is sufficiently moist; but in dry time the very time to look out for thunder storms, the surface and especially near the walls of the building becomes so dry as to be a perfect non-conductor. In such a case the conductor only not easily oxidized. Oxide of iron is not a perfect conductor.

2d. The attachments should all be carefully cased with glass, or some other non-conductor. Let the conductor, in its descent. pass through half-a-dozen iron bolts, which entirely surround it, and it would be passing strange if much of the fluid should reach the ground.

3d. Let the rod ascend to sufficint height above the highest point of the building.

I will not enter upon a discussion of the comparative merits of the two methods-the Franklinian with one rod, or the modern with many. Suffice it to say, I should feel safe with one rod put "according to the directions." And I have yet to see any proof, that a building which is bristled all over with silver-topped points, is any nearer "thunder proof," than the former.

The height of the point above the ridge. should be half the distance from the base to the remotest part of the ridge. On a barn of forty feet, the rod rising in the centre, should ascend ten feet. From a ridge of 80 feet the point must be elevated 20 feet.

On large buildings it is well to have two or more points connected with a common conductor. If there is a chimney riging above the ridge, unless the rod runs up boside it, its height must be taken into account, in fixing the elevation of the point, ...

So firmly do I believe in the efficacy of those rods, when rightly adjusted, that I wonder any should suffer a house or bara or any building containing valuables to remain long without one.

We live in an age of insurance and assur-ance companies. I know of know company, whose policy will guarantee so much protection for so small a premium. Personalities. In a thunder gust avoid a

DEATH-TO-PAIN. The great American Remedy for

Fever & Ague, Rheumatism, Dysentery, Cholics, and Griping Pains, Bruises and Strains, Burns & Scalds, Fresh Wounds, Dyspepsia, Coughs & Colds.

AND ALL OTHER KINDRED DISEASES. THIS Medicine has proved, and will prove an unconditional PAIN DESTROTER in all cases, whether External or Internal. Hence it has recei-ved the appropriate name of "Death-to-Pain." It has, by being kept on hand by families who know its value, been the means of saving money, and of ten life, by its timely use in sudden attacks, and in case of accidents. In all bruises and flesh wounds this Death-to-pain is the best embrocation that can be found. The soreness is immediately extracted -swellings reduced-and profuse bleeding stopped. A single dose will ease the most severe griping pains in the bowels, and a few applications will ease the severest rheumatic and nervous pans. Dyspepsia and its train of diseases is driven from its strong

hold. "Fever and Ague," in the language of a western agent "can't stand before old Leddy and western agent "can't sund berore put Leury and live." Indeed it is so with nearly every disease in the catalogue. A Mediciae for the Million. The remedy is composed of a large number of articles; all entirely vegetable, each a remedial signt

in itself, yet so united as to form a most powerful combination, and to take away one of these agents would materially detract from its merits. One, and the most powerful, of these atticles, is a root procured for this medicino only from the island of Taumago, in the South Pasific, called

TAYU, OR LIFE ROOT!

It is used by the natives in almost every disease, and the secret of its virtues was impa riedto the

proprietor by a native. of Agent.

CAUTION .- Purchasers of Death to Pain beware CAUTION -- Purchasers of Death to Pain beware how you are deceived by the story that the Paini Killing Agent and Pain-Killer are the better medi-cines. And Hyon go to buy Death-to-Pain, buy it, and have no other. Mark the words, "Death-to-pain," printed on red glazed paper, with the signaturo of P. LEDDY; and copyrighted by Wm. L. Rose & Co., General Agents, to whom all orders must be addressed, at Ithics, N. Y. W. D. BAILEY, Sole Agent at Wellsboro', Pa. Wellsborough, March 9, 1864.

Perpetual Motion Discovered at Last.

THE subscriber flaving been spointed L agent by S. W. Paine for the sale of this Hope & Petk Improved Direct Action Water Wheels, would say to the owners of Saw Mills in Tloga county, that he is ready to furnish the above men-tioned Water Wheel at Wellsboro', at any time at ter this date, on the most ressonable terms. Anthe m

These Wheels are margined to do the beat bu-siness with the least destriked to do the beat bu-siness with the least destriket of water of any Wheel'in use, (except an Oversbot.) The great advantages of these wheels over all

STEARNS Self-Setting Mill Dogs.

SCH-SCHLING MARN POUS. THE undersigned having purchased the right of using the above Mill Dogs in Tioga county, would announce to the public generally that he is ready to furnish them at short notice, to any part of the county, on the most reasonable terms, and warrant them to set correct from half an inch to two inches in thickness. They are the inch to two inches in thickness. They are the cheapest and the most durable Dog in use, They are very simple in construction, consequently very aesily kept in repair. They can be used for two

saws in a gate just as well as for one. Terms, \$50.00 per sett for one saw, (the man own ing the mill finding the headblocks and boarding the men while putting them in) and \$55.00 for two 5a.WS.

N. B.-All orders promptly attended to. D. B. WILCOX.

WELLSBOROVCH, Dec. 5, 1899. WELLSBORDER, Dec. 5, 1835. I would say that we have used the above described Mill, Dogs for about four months, and our sawyers like them much and think them, prefers-ble to any they have used. S. E. ENSWORTH. I have a set of the above described Dogs in my will, which I purchased after a years trial, and

can recommend them to do their work well. Wellsboro', Jan. 5, '54-1y. J. I. JACKSON.
