The history of this plant is involved in much obscurity will us difficult if not imposible to ascertain the time at which, or the nation by whom it was first transported from Chili in Scotti America to distant regions .-The Spaniards found it only in Chili, but it is known to grow wild in Peru ; but how it resched England is a matter of uncertainty. It was not till the middle of the last century, that the potato was generally known in England and its cultivation rather enforced by the partial fallure of grain. At this time there were strong prejudices against the potato thinking that it was unwholesome food; and that people who ate them would be short lived. We must not suppose that the potato when first taken from the forest and carried to Europe was the same thing that it now is: nor wonder that the people mistook the seed ball for the part to be eaten. Not many the fires, were correct; the real originator years ago, wild potatoes from South America were cultivated in England and bore an el, and the disasters mentioned had been alabundant grop; the largest of which was of most forgotten. Last week, says the Eaton the size of a pigeons egg and disagreeably Register, came a weary footman from Penn-

long. Scarcely any vegetable has been more changed by climate and cultivation, brought so great a change in the man's apcess; from poor, watery, and inputritious it had told his name. He was the man who had been elaborated into a wholesome, pleas-hat tasted article of food. In no other thing into the officer of food. In no other thing into the officer of food it is so with nearly every disease in the officer of food. In the language of a western agent "can't stand before old Leddy and live." Indeed it is so with nearly every disease in is the effect of climate more evident. Indeed the addition of the best wheat bread is improved by the addition of notations to the amount of one than be known since the commission of articles, all entirely vegetable, each a remedial agent dition of potatoes to the amount of one ment has he known since the commission of fourth of its weight. It is contended that those crimes. Afflicted by the pangs of a plants raised from unripe tubers are earlier guity conscience, and feeling that he could and stronger than from over ripe, if so, not die in peace without confessing and atowould it not be better to dig the potatoes in ning for his crimes, he came for the latter tended for seed a little before they are quite purpose. He confessed his guilt, and exripe, when the stalks begin to wither, than pressed his equal willingnoss to receive either to save for planting the fairest and best !these will produce not only larger potatoes but a greater number of them. DISEASES. -The modern rot. A disease

so widely apread and so destructive, has of course attracted the attention of practical the resources of learning and skill have been applied to the investigation of its causes and its remedies hitherto with small success. At least only shown, not what the cause is, but what it is not. The universality of the evil proves that it could not have been caused by blight, insects, climate or soil, for it could not be supposed that these were everywhere, and at the same time, cooperating to one end. Resides these causes existed long ago, but did not produce the results we now witness; as to insects they may rather be regarded as the effects than the cause of the disease. I do suppose they are nearest to the right who consider the continued propagation of the plant without renewal from the original climate and soil; and its being highly stimula ted by strong manure is at least the principal cause of its decay. The potato in its natural home doubtless preserves its health from age to age like other wild inhabitants of the forest. Besides, in its wild state the potato propagates itself by seeds as well as by tubers, thus annually renewing its youth and health. \ two ovens-hot as-, we give it up." Experience teaches us that potatoes raised from the seed are good for the table; but seedlings rot as bad as those that are raised rom tubers. Why not I they came from the seed of diseased tubers. The potato has arrived to the meridian of its strength and is on the decline: the disease has affected the whole plant; potatoes raised from seed partake of the disease of the parent stock, Great care should be taken in selecting and planting the best varieties of seedlings .adapt themselves to their home, and do as well there as elsewhere. But it seems to me that our chief hope of success lies in planting potatoes and seed brought directly from their by so doing we can start anew, and I a comparatively short time restore this import. Church, Wellsborough, Pa. ant plant to its former health and productiveness. It is said that there are some kinds of potatoes cultivated in South America superior for table use to any known among us. I have potatoes raised from the seed of the ball, which I consider rather superior for ta-

ble use to any that I ever saw.

# Butter Making:

Not one pound in five of the butter sold in the markets, is fit for human food. Butter makers should remember these few short

The newer and sweeter the cream, the sweeter and higher flavored will be the butter. The air must be fresh and pure in the room or cellar where the milk is set. The cream should not remain on the milk

over thirty-six hours. Keep the cream in tin pails, or stone pots, into which put a spoonful of salt at the beginning; then stir the cream lightly each morning and evening; this will prevent the

cream from moulding or souring. Churn as often as once a week, and as much oftener as circumstances will permit. Upon churning, add the cream upon all

the milk in the diary.

Use nearly an ounce of salt to a pound of butter. Work the butter over twice, to free it from

the buttermilk and brine, before lumping and packing. Be certain that it is entirely free from every

particle of buttermilk or congulated milk, and it will keep sweet forever.

In Scotland, a syphon is sometimes used to separate the milk from the cream, instead of skimming the pans. Ag: Exchange.

Making Bread. The Rhode Island Society, for the Promotion of Industry, gave the first premium on bread to Mrs. Hiram Hill, of Providence. The following is Mrs. Hill's recipe for ma-

king the bread exhibited by her:
Lor dwo, loaves of the ordinary size, take to pour pare them, alice them very thin, and tout quick; until quite soft, then much to a first pare them were them, and tout quite soft, then much to a first pare the strong until a surch is continued; feether with roof, and then add one third of Loup of yeast. This forms the sponge'

which should remain in a moderately warm lace for ten or twelve hours, or over night until it is light and frothy, even if a little sour it is at no consequence. When the sponge is ready, and flore, and work it until you have formed a stiff, firm mass: The longer and more firmly this is kneaded, the better

Let the kneaded mass remain, say from half to three-quarters of an hour to rise, then divide into pans, where it should remain, say fifteen minutes, care being taken that it does not rise too much and crack, then put the loaves into a quick oven and bake, say threequarters of an hour. If the oven is not hot enough the bread will rise and crack, if too hot the surface will hurden too rapidly and confine the loaf....

Cr Some twelve years ago, a wagon-shop belonging to a Mr. Kline, at Eaton, Ohio, was burned to the ground." About the same time, a building at West Alexander was likewise consumed by fire. None of the conjectures at the time, concerning the origin of was not suspected. Twelve years had claps. punishment or forgiveness, whichever should be preferred by those whom he had injured. proprietor by a native. It was deemed more noble to forgive than chastise, and the penitent was permitted to go and sin no more." The unhappy man then proceeded to West Alexandria, and was and scientific men in many countries, and all there told that the man whom he sought, and whose building he fired, had moved to Indianna. The penitent then resumed his pilgrimage in that direction.

"GRANDFATHER," said a saucy little boy, the other day, "how old are you?"

The old gentleman who had been a soldier and was much under the ordinary size, took the child between his knees and said to him : OR, EVERY ONE HIS OWN PHYSICIAN. "My dear boy, I am ninety-five years THE Fittieth Edition, old; but why do you ask?"

The little fellow, with the importance of a Napoleon, replied :

"Well, it appears to me you are remarkably small of your age!"

THE Boston Chronicle tries itself on weaher paragraphs: Hear it: "The weather for or those contemplating marthe last few days has been positively hot, comparatively hot, superlatively hot, day and night. Hot, hotter, most hottest. Hottentot, plus one hundred-hot as an oven-hot as

#### FURNITURE WARE ROOM FOR TIOGA COUNTY.

July 13, 1855.

THE subscriber, encouraged by the liberal patronage he has received for the last three years, has enlarged his stock, and now offers a good variety of the most durable and elegant

#### Household Furniture

at the lowest prices.

He has upwards of twenty different kinds of Chairs from the Common Windsor Cottage, to the best Mahogany spring seat, and mahogany rockers; twelve different styles of Bedsteads; three styles of Sofas and Tables, including Mohogany and Marble top Centre Tables.

Bureaus, Work Stands and Wash Stands in great variety. His stock is so large, and price so low, that it is an object for those wishing FURNITURE in this

ounty, to visit his rooms.

He is also the agent of Messrs. BLISS & AMES, of Addison, for the sale of their very superior. WINDOW SASH, BLINDS AND DOORS, which he sells at the same prices, as they are pur chased at his Factory. E. D. WELLS. chased at his Factory. Lawrenceville, Sept. 7, 1853.

# TAILORING.

THE undersign-1 ed would inform the citizens of Wellsborough and victnity, that he has again returned to this place, and opened a shop over the Post office

where he will be pre-ared to do Tailoring, in all its branches, in good and, workmanlike manner, for ready pay and at prices that cannot fail to please. All work entrusted to him will be done up with despatch, and a fit warranted

CUTTING done on short uotice. Country probuce (delivered) of all kinds, taken H. P. ERWIN. Wellsborough, April 22, 1854.

Custom Boot & Shoe Shop, AT M. Sherwood's old stand, where the SEARS' BOYS continue to make, mend, and

measure to order, at as low prices as the times will All work warranted-to wear out in a year or so and not rip or come to pieces 'till it does wear out.

Hides Wanted.

CASH will be paid for any quantity of hides at the highest market price. GEO. W. SEARS.

#### July 13, 1854. SASH & BLIND FACTORY.

STONY FORK, TIOGA CO., PA. THE subscribers having purchased the Sash Factory at Stony Fork, have now on hand, and are making all kinds of square and fancy

Sash and Blinds. The subscribers flatters themselves that they can make as good and endurable an article, and sell it as cheap as can be obtained at any establishment in Northern Pennsylvania or in Southern New York.

IT All orders in our line of business will be promptly attended to. S. & D. B. WILCOX.

Stony Fork, June 8, 1854.

# Stoneware.

TUGS, Cream Pots, Butter Pots, covered Jars, Pitchers, Stove Tubes, Milk Pans, Churns, Spittoons, Flower Pots, &c., now on hand and for sale by June 10, '53. M. M. CONVERS.

#### Perpetual Motion Discovered , at Last.

THE subscribet having been appointed agent by S. W. Paine for the sale of the Rose & Peck Improved Direct Action Water Wheels, would say to the owners of Saw Mills in Tioga county, that he is ready to furnish the above men-tioned Water Wheel at Wellsboro, at any time af: ter this date, on the most reasonable terms. These Wheels are warranted to do the best bu

These wheels are warrance to do the best on-siness with the lengt quantity of water of any Wheel in use, (except an Overshot.)

The great advantages of these wheels over all others is the manner in which the water is applied to the wheel, is such that there cannot be any waste of water, the gates or sheets regulating the quantity. The gate is constructed that it shads almost perfectly tight. Quantity of water required under eight feet head, 130 square inches under 20 feet hend, 50 inches; all heads between there in pro-portion. All wheels warranted to perform according to recommendation, if they do not we take them out and replace the old wheels. No Wheels in under less than eight feet head. D.B. WILCOX. Wellsborough, July 13, 1854.

# THE NEW REVOLUTI

TAMING purchased the stocks and business of ROY & SOFIELD in the STOVE TEN, COPPER AND SHEET IRON TRADE. I would say to the citizens of: Wellsborough and violuity, that I intend manufacturing the best of ware, upon he most liberal corms to I BEN 6 of all kinds executed with neatness and dispatch.

# STOVES! STOVES!!

Among the approved Stoves of the age I am thoroughly convinced that the KING OF STOVES is truly named, and must take the lead of all Elevated OvenStoves. The principal advantage claimed in this, over all other stoves, (Elevated Oyens in particular.) is in its diving or reverting flues, the exclusive right of which is guaranteed to the subsen. ber by Letters Patent from the United States. There being two currents of air passing up and down at the same time on each side of the oven, perfectly enveloping the oven in a current of hot air that cannot escape short of traversing a distance of about twenty feet, all told, making

#### THE MOST PERFECT BAKER

that can be desired. It has a perfect draft and flues easily cleaned out. There is a dam. per so constructed as to give a direct draft where heat is not wanted for baking or warming. The amount of heat is immense for the quantity of full consumed. The Foor Boiler is properly a Village Stove, and works well with wood or coal. You can get a meal for ten persons in thirty-five minutes, with seven pounds of dry maple wood. Its ap. pearance is grand, and it is a very pleasant stove to do work with. It is very appropriate for large sitting or dining rooms, and warms with less fire than any parlor stove. The Six Boiler King works equally well, has more capacity, and is adapted to the wants of large families and public houses. This is, in truth, a FARMER'S STOVE.

What can you desire in a Stove that cannot satisfy? If you want capacity for do. ng large business, you have it. If you want to warm cold houses or large rooms, it can. not be beat. Draft good, and will burn much or little wood as may be necessary. If you want to enjoy the greatest blessing that science has ever rendered accessible in the shape

of a Cook Stove, buy the King.

The King of Stoves is, in fact, what the name indicates. It is the Chief of Stoves. It does possess the long sought combination, the principle of the Low in the position of the Elevated Oven. If you want a direct draft for boiling, you have it. It you want the revertable flue oven for baking or warming, turn the damper and you have have it in its

greatest perfection. I also intend keeping a large assortment of Low Oven Cook Stoves, the most suitable for this section. Also, as fine an assortment of Parlor and Box or Plate Stoves as has ever been kept in Northern Pennsylvania. I do say boldly, that I will not be undersold, and it is certainly to my credit to deal in none but the most approved of stoves. I take pleasure

Wanted, in exchange for Stoves, Wares, &c., old Iron, Copper, Brass, Pewter and Rags, for which the highest market price will be paid. Call one door below Truman & Bowen's.

Wellsborough, April 20, 1854.
