

Physical Brain

The word of God, in specific language, or in implied diction, dominated a life of restraint in food and beverage, a strict restraint upon the licentious appetites, regular industry, and a healthy abundance of person and apparel, and observance of frequent days of rest.

For the buds, (they being allowed to harvest for themselves.) The blossoms afford material for the very best honey, and a season of the year when other flowers are gone.

Eight thousand five hundred square miles of this earth's surface are devoted to the culture of tobacco. The quantity annually produced has recently been estimated to be four and a half billion of pounds, or four and a half pounds to each inhabitant.

The nicest article for washing windows is deep skin, as no particles come off to adhere to the glass, and make it look as if washed with feathers.

The Resurrection.

Against the resurrection itself there is no presumption, and in favor of it a strong one, from apologetics. Many works of God admirably, and strongly, dispose the mind to admit the doctrine without hesitation.

During a late concert at City Hall, in Manchester, several of the seats having been spoken for were labelled "engaged."

MAN, KNOW THYSELF.

An Invaluable Book for 25 cents. Every Family should have a Copy. SOLD IN LESS THAN A YEAR. A new edition, revised and improved, just issued.

DR. HUNTER'S Medical Manual, and Hand Book for the Afflicted.

Containing an outline of the origin, progress, treatment and cure of every form of disease contracted by promiscuous sexual intercourse, by self-abuse, or by sexual excess, with advice for their prevention, written in a familiar style, avoiding all medical technicalities and everything that would offend the ear of decency; with an outline of complaints incident to females, from the result of twenty years' successful practice, exclusively devoted to the cure of diseases of a delicate or private nature.

From A. Woodward, M. D., of Penn University Philadelphia.

"To which is added receipts for the cure of the above diseases, and a treatise on the causes, symptoms and cure of the FEVER and AGUE." Testimony of the Professor of Obstetrics in the Penn Medical College, Philadelphia.—"DR. HUNTER'S MEDICAL MANUAL."—The author of his work, unlike the majority of those who advertise to cure the diseases of which it treats is a graduate of one of the best Colleges in the United States. It affords me pleasure to recommend him to the fortunate, or to the victim of malpractice, as a successful and experienced practitioner, in whose honor and integrity they may place the greatest confidence.

ALFRED WOODWARD, M. D.

"This is, without exception, the most comprehensive and intelligible work published on the classes of diseases of which it treats. Avoiding all technical terms, it addresses itself to the reason of its readers. It is free from all objectionable matter, and no parent, however fastidious, can object to placing it in the hands of his sons. The author has devoted many years to the treatment of the various complaints treated of, and with too little breath to puff and too little presumption to impose, he has offered to the world at the merely nominal price of 25 cents, the fruit of some twenty years' most successful practice."

CHERRY PECTORAL

For the Cure of COUGES, COLDS, HOARSENESS, BRONCHITIS, GHOUP, ASTHMA, WHOOPING COUGH AND CONSUMPTION.

THE remedy is offered to the community with the confidence we feel in an article which seldom fails to realize the happiest effects that can be desired. So wide is the field of its usefulness, and so numerous the cases of its cures, that almost every section of the country abounds in persons, publicly known, who have been restored from alarming and distressing diseases of the lungs, by its use.

Nothing has called louder for the earnest enquiry of medical men, than the alarming prevalence and fatality of consumptive complaints, nor has any one class of diseases had more of their investigations and cure. But as yet no adequate remedy has been provided, on which the public could depend for protection from attacks of the respiratory organs.

From A. Woodward, M. D., of Penn University Philadelphia.—"It gives me pleasure to add my testimony to the professional ability of the author of the Medical Manual. Numerous cases of Disease in the Genital Organs, some of them of long standing have come under my notice, in which his skill has been manifest in restoring to perfect health in some cases where the patient had been considered beyond medical aid. In the treatment of Seminal weakness, or disarrangement of the functions produced by self-abuse or excessive venery, I do not know his superior in the profession. I have been acquainted with the author some thirty years, and deem it no more than justice to him as well as kindness to the unfortunate victims of early indiscretion, to recommend him as one in whose professional skill and integrity they may safely confide themselves."
