We learn that the Suhan takes a lively interest in the affairs of this country, and has intimated that there are other wheats in his dominings which would be highly desirable for our government to ob-Lante 2121 toʻin. A plan has been suggested-which would undoubtedly prove highly advantageous to the agricultural interests of this country-of importing large quantities of wheat from the shores of the Mediterranean and Black Soas. for supplying our farmers with seed at the coast of the original purchase, freight, &c. It has been proposed that the storeships of the Navy, which usually return from the Mediterranean in ballast, be freighted with seed wheat, purchased by government, and sold to agriculturists at a nominal rate, on condi-tion that they shall cultivate the same, and report the result to some proper anthority, by whom the excess of cost may be relunded to

If this be true, it would be cheaper and more profitable to the farmer in the end to sell his own, and purchase his seed wheat from abroad, as the change of soil and climate would often cause the crop to mature earlier, and give an increased yield.

SANATORY AGENTS.

As the warm weather is now at hand, i will no doubt be very useful information to many persons to be told what are the best substances for removing offiensive odors from sinks, &c. Copperas, or sulphate of iron, is a very excellent substance for slushing drains and sinks. By dissolving half a pound of it in a pail of hot water, and throwing it into the sink once per week, it will keep down all offensive odor; and from the situations of many houses in all our cities; it would greatly tend to the health and pleasure for the inhabitants of each to do this. The chloride of lune or the chloride of zinc, will, answer just as well, but these are expensive substances in comparison with copperas (sulphate of iron.) Lime is also very useful, and is no doubt a chenp deodorizer, but it is not a very good one; copperas, therefore, is preferable to all these substances. But there is another substance which is far superior to either copperas, the chloride of lime, or zinc, as a deodorizer, both as it respects its qualities and economy; we mean charcoal powder-made of ground wood charcoal, Charcoal nowder possesses the qua ing ammoniacal, sulphuretted hydrogen, and carbonic acid gasses in superior degree to any other substance.
