AYER'S PILLS.

A NEW and singularly successful remedy for the cure of all Bilious diseases—Constipation, Indigestion, Dropsy, Rheumatism, Fevers, Headache, Pains in the Breast, Side, Back, and Limbs, Female Complaints, &c. &c.

These Pills, the result of long investigation and study, are offered to the public as the best and most complete, which the present state of medical science can afford.

They are compounded not of the drugs themselves, but of the medicinal virtues only of Vegetable remedies, extracted by chemical processes in a state of purity, and combined together in the most judicious manner.

This system of preparation for medicines has been found in the Chery Pectoral and Pills both, to produce a more efficient remedy than had hitherto been obtained by any process. The result is a perfect and reliable medicine in every case.

While in the old mode of composition, every medicine is burdened with more or less of acrimonious and injurious qualities, by which each individual virtue only that is desired for the curative effect is lost, and the rest of the compound is a mere burden, which only serves to irritate the system.

The composition of my preparations is laid open to all men, and all who are competent to judge on the subject freely acknowledge their convictions of their intrinsic merits. The Chery Pectoral was pronounced by scientific men to be a wonderful medicine before its effects were known, and is now daily increasing in their estimation.

At all the Patent Medicines are sold, how few have taken it, and how few are cured! Their lives consist in their mystery. I have no mysteries.

The composition of my preparations is laid open to all men, and all who are competent to judge on the subject freely acknowledge their convictions of their intrinsic merits.

Being sugar wrapped they are pleasant to take, and being purely vegetable, no harm can arise from their use, except by their powerful influence on the internal viscera to purify the blood and stimulate it into healthy action—remove the obstructions of the stomach, bowels, liver, and other organs of the body, restoring their irregular action to health, and preventing any disease of the system.

Prepared by JAMES C. AYER, Practical and Analytical Chemist, Lowell, Mass.
