\*\*PRILIDENTIAL April 12, 1856.\*

\*\*Mexers Ecans & Watson—Grutz—It afforts us the highest satisfaction to state to yon, that owing to the very protective qualities of two of the Salamander Safet which wornurchased of yon some few months since, we saved a large portion of our Jewelry, Books, Papers, &c., exposed to the salamitous fire in Ranstead Place, on the morning of the 11th inst.

When we reduct that these safes were located in the fourth story of the building we occupied, and that they foil subsequently into a heap of burning ruins, where the vast concentration of heat caused the brass plates to melt, we cannot but regard the pre-ervation of the valuable contents as most convincing proof of the great security afforded by your Safes. We shall take much pleasure in recommending them to men of business as a sure reliance against fire.

PHILADRIPHIA, April 12, 1856.

Mesers Evans di Walson—I have to offer you my testimony in favor of the great seturity afforded to my entire stock of jewalry, books, papera, &c., during the recent disastrons configuration in Ranstead place, from the fact that the same were contained in two of the Salamander Safes manufactured by you. Having milen from the fifth story of the Artisan Building, where they were prealously placed and exposed to a vast heat for a long time; the preservation of the valuable deposits seemed to every one who witnessed the opening and interior examination, a matter of profound astonishment.

To all who may require a perfect protection from the ratages of fire, i shall not hesitate to recommend the use of your Safes, as I consider they have now undergonetic most trying test.

PRILADELPHIA, April 14, 1856.

Mestrs Evans & Watson—Gentlemen—No doubt you will be, deeply gratified to learn the good condition in which I discovered my book, policy of insprance, certificates of stock, and other valuable documents, when on Friday last I opened the safe made by your firm.

With my knowledge of its great exposure, both to the intensity of the heat from sy hot a fire as that which destroyed the Artisan Building, as also from the force of the fall field its former elevated position in the third story. I could entertain but stender hopes prior to its interior insposition, that the contents which I once so highly prized would ever be of any service to me, but as these form are now largely rendered, I feel it only due to say to you, that I can beneaforth recommend the use of your Safes to all who may wish to feel against so frightful an element.

HERRING'S SAFE THE CHAMPION!

In these fires, the HERRING'S SAFE, standing side by side-with those 'distraised as Fugitable to stand 10 percent mare fire than Herring's came forth the acknowledged victor, not only preserving their contents in excellent order, but being themselved in a condition to go throught snother orden, while the beasted "Salamanders" of other makers were badly used up in every instance, and in some cases their entire contents completely destroyed.

To the public we would 'simply say, that, during the fourton, years the Herring's asia has been before them, more than two hundred have passed through accidental fires without the occurrence of a single bas.

We would therefore, caution purchasers against the misrepresentation of laterasted parties. The Herring's Patent is tho only Fur-prof. Safe made in this city which is protected by a Patent Right; and 'we will guarantee it to resist more than goulde the amount of heat of any other safe now known.

IMPROVEMENT EXTRAORDINARY.

W E would respectfully call the attention of Mill womens and all interested in the use of water-dower in this vicinity, to a patented from Water Wheel, (called Greenleaf's gravity and percussion Water Wheel, one of which they have recently put in a Saw Mill dwned by Judge White of Wellsboro'. Morels township, and situated in a Saw Mill dwned by Judge White of Wellsbord and Dr. Archer of Morris towashin, and situated one and a fourth miles from Babb's Creek; on the Stony Fork. This wheel on Saturday the 7th inst., drove a single saw to saw five thousand and one hundred feet of white pine lumber; 4100 feet of which was one inch in thickness, 400 feet 2 inches thick, 500 feet 13 inches thick. This Wheel used a very small quantity of water, only discharging about 90 seners inches and wills hant 114 feet head and 90 square inches and with about 11½ feet head and fall of water while performing the above. These Wheels are well adapted to the propelling of all kinds of Machinery driven by Water power. They are very simple and substantial in their construction, and will do from one third to one half more work than any other Iron Water Wheel in operation in this vicinity with which they are acquainted. They offer for sale on very liberal terms the patent right for Counties or States, and also to furnish and put in operation the Wheels in Mills in this vicinity on reasonable terms.
