A SAPE House To SLEEP IN .- A lawyer of high reputation in the city of Philadelphia. was traveling in one of the Son hern States. and being belated one evening in a long day? ride, he was compelled to turn into a house on a solitary plantation, and ask for a shelter and hospitality for the night. His request was granted. In the course of the evening he thought he observed something reserved in the master of the house which awakened his suspicions. He was at length conducted to his bed room, which was adjoining the family room. There he dwelt on the circumstances which had alarmed him till his excited imagination was filled with mough's of nightly robbery and assassination. He proceeded to barricade the room as well as he could. He fastened down the windows; against the doors, he piled up tables, chairs. everything that was moveable in the room. While thus engaged, words uttered in a low voice caught his ear, and caused his alarm. He placed his ear at the key hole. The man of the house was engaged in prayer-in family prayer. Among other objects of intercesaion, he was praying for "the stranger whom the Providence of God had unexpectedly brought to lodge beneath their rouf." he had got through, our traveling friend arose from his stooping posture. Imagine the alteration in his feelings. All his fears had vanished. Though no christian himself, he knew that the prayers of christians are like guardian angels to the abode in which they are offered up; and he went to bed and slept soundly and sweetly, feeling that the house where God was revered and worshipped was a safe house to sleep in .- Am. Mess.

How SHIPS ARE NAMED .- In the United States Navy, since the last war, the following rules have been observed in naming vessels: All the names of the states, or rivers, as the case may be, are put in a wheel, which is turned, and one name is drawn out at random, which is the name of the vessel to be launched. Ships-of-the-line are named after the States. For instance, the Ohio, North Carolina, Pennsylvania, &c., all mount seventy-four guns. Frigates are named after American rivers-the Columbia, Raritan, Cumberland, St. Lawrence, Merrimac, Satine, Potomoc, &c. When you see the name of a river given to a government vessel, it is safe to conclude that she will not carry more than thirty six or forty-four guns. Sloops of war are called after state capitals and other cities .- Cant. Ingraham's St. Louis, the illfated Albany, the Vandalia, the Plymouth, the Jamestown, all belong to this class.-Brigs may be known in print by the name of some noted naval commander who has died in service.-Thus the Decatur, Bainbridge, Perry, &c. Revenue cutters are named after Members of the Cabinet,-Thus we have had the Walter Forward, the Wm. M. Meredith, the J. S. Dobbin, and brobably now have a William L. Marcy, a James Guthrie, &c. As many of the vessels in the navy were built previous to the adoption of this bill, there are of course some exceptions to it. The Collins steamers are named after waters. and the Cunarders after countries. Bearing this rule in mind, one can very easily recollect to which line the Baltic, Atlantic Adriatic, Asia, Africa, Canada, America, respectively bosong.

In a village not a thousand miles from this city, there lives a quiet, unobtrusive lawver. A modest fellow is M---, (merit is always modest,) but he knows his rights, "and know ing, dares maintain them." Like a great many others, he is "following the practice," and anticipates a glorious time when he overtakes i.. A while since, having been retained in some small cases, he made his appearance before that august personage, an Alabama Justice of the Peace. His Honor, evidently lost faith in M---- at first sight; for one after another of his cases collapsed under the stunning charges delivered by the Court. The law and the testimony were alike unavailing; M---'s cases were bound to go. At last human nature could be it it no longer. M---- rising from his seat, delivered him self in his usual slow and measured manner:

"The Court can fine me five dollars." "For what, Mr. M---?" said the Justice, somewhat surprised.

"For contempt of Court," coolly rejoined "I am not aware, Mr. M---," said the

said M---, "but I do entertain a secret contempt for this Court,"

A WIFE'S INFLUENCE, -A woman, in many instances, has her husband's fortune in her nower, because she may or may not conform to his various circumstances. This is her first duty, and it ought to be her pride. No passion for luxury or display ought to tempt her for a moment to deviate in the least degree from this line of conduct. She will find her respectability in it. Any other course is wretchedness itself, and inevitably leads to

Nothing can be more miserable than to keep up appearances. If it could succeed it would cost more than it is worth; as it never can, its faiture involves the deepest mortification. Some of the sublimest exhibitions of human virtue have been made by women who have been precipitated suddenly from wealth and splendor to absolute want.

Then a man's fortunes are in the hands of his wife, inasmuch as his own power of exertion depends on her. His moral strength is inconceivably increased by her sympathy, her counsel, her aid. She can aid him immensely, by relieving him of everything that she is capable of taking upon herself. His own employments are usually such as to require his whole time and his whole mind.

ANOTHER DISPLAY OF MEANNESS,-The Buffalo Express records the following: "A young gentleman connected with the office of the Superintendent of the Central Rulrond, in this city, yesterday morning, found about the cars a parcel containing \$5,000 in money. He learned who the owner was, and that he was about leaving town by ano her route, so putting his best foot foremost, the engineer went in pursuit of the property. They gen tleman he found, presented him with the for tunately recovered money, and received in return for his trouble—a very cold whink personal manufacture, Toilet utensils and Perfumery, Fancy Soaps, Violin Strings, Gold Pens and Pencils, &c., &c.

All the popular Magazines and leading Newspareturn for his trouble—a very cold whink personal manufacture, Toilet utensils and Perfumery, Fancy and Pencils, &c., &c. you." Noble spirited property holder!"

A SINGULAR ACCIDENT. - A Young Irish man residing in Bristol, England, while lark ing tan after a girl who was engaged in seamstress work, and gave her a hug in sport, but it proved anything but sport to him, for as he pressed her to his bosom, it turned out all but a fatal embrace, as a needle which she had in the breast of her gown, literally entered his heart, and broke off short, leaving nearly three parts of an inch of the steel in he muscles. He instantly felt sick and faint, and was then to the infirmacy, when it was deermined to make an effort to extricate the broken needle, as should it remain where it was, death must quickly ensue from inflamation of the heart. A physician, accordingly cut through the outer flesh, and having Inid bare the surface of the heart, discovered a small portion of the needle fragment protruding, and with the forceps he drew it out. The delicate operation was most successful, but, as much inflamation had set in before the needle could be extracted, it was at last accounts very doubtful whether his life would be saved. It is however, a most uncommon operation, and singular accident, showing that even the heart itself may sustain a sharp wound without death immediately following,

UNPARALLELED PRECOGITY .- Nearly : a year since, the youthful son of a well known merchant of this city tell into the water from one of the wharves, and was only rescued after the most strenuous and courageous exertions on the part of a blacksmith. The father liberally rewarded the preserver of his son's life, telling the rescued party that "if it hadn't been for the blacksmith he would have been drowned," Yesterday the same boy fell again into the water, but by this time its depth was not sufficient to endanger his lifeand drawing himself out he rushed to the store of his parent and demanded a reward, saying "if it hadn't been for me I must have drowned," The boy was sent to his mother,-Boston Post.

THE DIFFERENCE. - While slaveholders in the pay of the Democratic party are perambulating our State, showing the beauties of slavery and rightfulness of slavery extension, Pennsylvanians dare not go to a slave State and hold a Republican meeting to advocare Republican principles. Is this the liberty we are to have? Is the constitution to be a dead letter in the South while it is enforced in the North? Talk of sectionalism, what sectionalism is meaner, what tyranny more relentless than the despotism which exists in the fificen slave States !- Truc American.

Eyes Open .- " A man in New York purchased several puppies of a dealer, whose entire stock was labeled "Buchanan pups." Finding that they were of a very good breed, he went back in a few days for some more, and found them all marked "Fremont puts." "Why, how is this?" exclaimed he, "that these are now labeled Fremont! When I was here before they were all marked Buchanan." "Oh," said the dealer, with a waggish leer, " that was before their eyes were opened, sir,"'

DYING WORDS .- The last words of great nen, says an exchange, are always rememhered. As John Q. Adams expired, he cried: "This is the last of earth!" Daniel Webster uttered the words :- " still live!"-James Buchanan, surrounded by the excited Keystone Club, exclaimed, as he turned into a patform, "I am no longer James Buchan-

W E would respectfully call the attention of Mill dower in this vicinity, to a patented Iron Water dower in this vicinity, to a patented from water Wheel, (called Greenleaf's gravity and percussion Water Wheel,) one of which they have recently put in a Saw Mill owned by Judge White of Wellsboro' and Dr. Archer of Morris township, and situated one and a fourth miles from Babb's Creek, on the Stony Fork. This wheel on Saturday the 7th inst. drove a single saw to saw five thousand and one hundred feet of white pine lumber; 4100 feet of which was one inch in thickness, 400 feet 2 inches thick, 500 feet 11 inches thick. This Wheel used a very small quantity of water, only discharging about 90 square inches and with about 114 feet head and fall of water while performing the above. These Wheels are well adapted to the propelling of all kinds of Machinery driven by Water power. They are very simple and substantial in their construction will do from one third to one half more work than any other Iron Water Wheel in operation is this vicinity with which they are acquainted. They offer for sale on very liberal terms the patent right for Counties or States, and also to furnish and put in operation the Wheels in Mills in this vicinity on rea sonable terms.
