IMPROVEMENT EXTRAORDINARY,

W E would respectfully call the attention of Mill owners and all interested in the use of water dower in this vicinity, to a patented Iron Water Wheel, (called Greenleaf's gravity and percussio Water Wheel,) one of which they have recently put in a Saw Mill owned by Judge White of Wellsboro and Dr. Archer of Morris township, and situated one and a fourth miles from Babb's Creek, on the Stony Fork. This wheel on Saturday the 7th inst., drove a single saw to saw five thousand and one hundred feet of white pine lumber; 4100 feet of which was one inch in thickness, 400 feet 2 inches thick, 500 feet 1½ inches thick. This Wheel used a very small quantity of water, only discharging about 90 square inches and with about 111 feet head and fall of water while performing the above. These Wheels are well adapted to the propelling of all kinds of Machinery driven by Water power. They are very simple and substantial in their construction, and will do from one third to one half more work than any other Iron Water Wheel in operation to this vicinity with which they are acquainted. They ufter for sale on very liberal terms the patent right Wellsborough, I'.

Meers Erons & Wolson—Gents.—It afterds us the highest satisfaction to state to you, that owing to the very projective qualities of two of the Salamander Safes which we purchased of you some few months since, we saved a large portion of our jewelry. Books, Papers, &c., expeed to the chaimtons fire in Ranstead Place, on the monung of the 11th inst.

When we reflect that these Safes were los abed in the fourth story of the building we occupied, and that they fell subsequently into a heap of burning ruins, where the vast oncentration of heat caused the brass plates to melt, we cannot but regard the preservation of the valuable contents as most convincing proof of the great security afforded by your Safes, we shall take much pleasure in recommending them to men of business as a sure rehance against fire.

PRII ADELPHIA, April 12, 1856. PRILAPHERIL, April 12, 1866.

Mesure Events & Watson—I have to ofter you my testimony in favor of the great security afforded to my entire stock of ewelry, books, papers, &c., during the recent disastrons consignation in Rainstead place, from the fact that the same were outsing-tin two of the Salamander Safes manufactured by containst in two of the Salamander Safes manufactured, by you. Having fallen from the fifth story of the Artisan Building, where they were previously placed and exposed to a vakt heat for a long time, the preservation of the valuable deposits seemed to every one who witnessed the opening and interior examination, a matter of performed astonishment. To all who may require a perfect-protection from the ravages of fire, I shall not he state to recommend the use of your safes, as I consider they have now undergonethe most trying test.

other valuable documents, when on Friday last 1 opened the safe made by your firm.

With my knowledge of its great exposure, both to the intensity of the heat from so hot a fire as that which destroyed the Artisan Building, as also from the force of the fall firoff its former cleasted position in the third story, I could entertain but slender hopes prior to its interfor inspection, that the contents which I once so highly prized would erre be of, any service to me, but as those fears are now happily removed, I feel it only due to -ay to you, that I can henceforth recommend the use of your Sifes to all who may wish to feel a confidence in the perfect security which such means provides against so frightful an element.
