XX Flour, manufactured at the Jersey Shore Mills and warranted, at the Store of Dec. 30. WILCOX & SEARS.

Charles O. Etz of Tioga Village would respectively call the attention of the public to the following advertisement. "Man wants but little here below nor wants that little long" is an old saying and perhaps true to a certain extents But it seems to me that in this time of general suspension and panic, everything is tending to a reversion of time-honored sayings, and everybody wants a little more still. The farmers (and they really ought to have as much as anybody, for they are to our country what a main spring is to a watch,) wants a little more for their wheat, buckwheat, rye, corn, oute, potatoes, &c., than the purchaser feels able and willing to pay. The merchant wants a little more for his Flour, Pork, Salt, Dry Goods, Boots & Sinoes, Hats & Caps, Hardware, Crockery and ten thousand little things he has to sell than

At this present time it seems to be conceded by all that the cash value of good wheat is \$1 per bushel; buckwheat, 2 to 2-6; corn 3-6 to 4-6; oats, 2 to 2-6; butter, 14 to 16 cents. Now to equalize the matter and make it satisfactory on both for the next 60 days at 9 and 10 shillings per bushel according to quality; buckwheat at 2-6 to 3; corn 5 to 5-6; outs 2-9 to 3 shillings; butter 16 to

HERRING'S SAFE. THE ACKNOWLEDGED

 ${f CHAMPION}$ THE RECENT TRIALS at Reading have endorsed the current of public opinion, and confirmed the verdict of more than 200 accidental fires, proving conclusively that "Herring's" is the ONLY SAFE that will not burn.

Extract from the Committee's Report on the Trial of Iron Safes at

Reading

"On the 26th of February all the members of the committee met to witness the Safes and books and papers, (placed in them) and were perfectly satisfied that all was right. The day following, the burning took place, under the superintend-ence of the Committee. After a fair and impartial burning for five hours, the Safe of Messrs Evans & Watson was first opened, the Safe being on fire inside, and the contenta partially consumed, while the contents in the Safe of Messrs Farrels & Herring were in good condition, and no fire inside."

Reading, March 2, 1857.

(Signed.)

II. F. FELIX.

And endorsed by over 50 of the best men of Reading.
The above Safes can be inspected at 34 Walnut Street, where the public can satisfy themselves of the great superiority of the "Herrings Patent Champion," over the defeated and used-up "inside from Door Salamander."

A. Lantz.) made doublethickness, (different from those they sell) to "burn up" one of Herring's, han as thick) has met with its true reward. Herring's Safe could not be burnt, proving couclusively that the only reliable Safe now made is "Herring's" of which over 15,000 are now in actual use, and more than 200 have been tried by fire without a single loss. without a single loss.

Truth is Mighty and must Prevail. Report of the Committee appointed to superintend the Burning of the Iron Safes, at Reading, Feb.

27. 1857. "The undersigned, members of the committee, do respectfully report, that we saw the two Safes origi respectfully report, that we saw the two Sales originally agreed upon by Farrels & Herring and Evans & Watson, placed side by side in a furnace, viz: The Sale in use by the Paymaster of the Philadelphia and Reading Railroad Company, in his office at Reading, manufactured by Farries & Herring, and the sale in use by H. A. Lantz, in his store, manufactured by Evans & Watson, and put in books and papers precisely alike.

and papers precisely alike.

The fire was started at 8½ o'clock, A. M., and kept up until four cords of green hickory, two cords dry oak and half chestnut top wood were entirely consumed, the whole under the superintendence of the subscribers, members of the Committee. The Safes were then cooled off with water, after which they were opened and the books and papers taken out by the Committee and sent to H. A. Lantz's store for public examination, after they were first examined and marked by the Committee. The books and papers taken from the Safe manufactured by Evans & Watson were but slightly affected by the intense heat, while those taken from the Safe manufactured by Farrels & Herring, were in our judgment, damaged fully fifteen per cent more than those taken from Evans & Watson's Safe. We believe the above to have been a fair and im-

partial trial of the respective qualities of both Safes JACOB H. DYSHER, DANIEL S. HUNTER,
