439 Chestinut st., Philadelphia, Pa.

839 TO THE PUBLIC—As there are many Gift Book Storrs advertised throughout the country, M. EVANS deems it just to himself add his duty to the public—inamunch as he originated the Gift Book business—to state, as evidence of the instability of such concerns, that they conceal their real names from the public, and are advertising their business under assumed ones. Mr. E. is aware that these various concerns published as Gift Book Stores, are calculated to bring the business established by himself into disrepute. He asks of the public a correct judgment in regard to his Gift Book Enterprise. For the honor, integrity, and success of which he refers to all the prominent publishers in the United States. "Man wan's but little here below nor wants that little long" is an old saying and perhaps true to a certain extents But it seems to me that in this time of general suspension and panic, everything is tending to a reversion of time-honored sayings, and everybody wants a little more still. Extract from the Committee's Report on the Trial of Iron Safes at

Reading
"On the 26th of February all the members of the committee met to witness the Safes and books and papers, (placed in them) and were perfectly satisfied that all was right. The day following, the burning took place, under the superintence of the Committee. After a fair and impartial burning for five hours, the Safe of Messrs Evans & Watson was first opened, the Safe being on fire inside, and the contents partially consumed, while the contents in the Safe of Messrs Barrels & Herring were in good condition, and no fire inside."

The above Safes can be inspected at 34 Walnut Street, where the public can satisfy themselves of the great superiority of the "Herrings Patent Champian," over, the defeated and used-up "inside Iron Door Salamander."

Only Makers in this State of Herring's Pulent Champion Safes.

The attempt made by other parties to bolster up the reputation of a Safe which has failed so signally in accidental fires in Philadelphia, (Ranstead Place, by taking one out of an agent's store, (H. A. Lantz.) made double thickness, (different from those they sell) to "burn up" one of Herring's, half as thick) has met with its true reward. Herring's Safe could not be burnt, proving conclusively that the only reliable Safe now made is "Herring's" of which over 15,000 are now in actual nec, and more than 200 have been tried by fire without a single loss.

EVANS & WATSON. DHILADELPHIA Manufactu. red Salamander Safes, No. 26 S. Fourth Street, Philada.

Truth is Mighty and must Prevail. Report of the Committee appointed to superintend the Burning of the Iron Safes, at Reading, Feb

27, 1857. "The undersigned, members of the committee, d espectfully report, that we saw the two Safes origiagreed upon by Farrels & Herring and Evans Watson, placed side by side in a turnace, viz: The Safe in use by the Paymaster of the Philadelphia and Reading Railroad Company, in his office at Reading, manufactured by Farrels & Herring, and the safe in use by H. A. Lantz, in his store,

manufactured by Evans & Watson, and put in books and papers precisely alike.

The fire was started at 83 oclock, A. M., and kept up until four cords of green hickory, two cords dry oak and half chestnut top wood were entirely consumed, the whole under the superintendence of the subscribers, members of the Committee, The Safes were then cooled off with water, after which they were opened and the books; and papers taken out by the Committee and sent to H. A. Lantz's store for public examination, after they were first examined and marked by the Committee. The books and papers taken from the Safe manufactured by Evans & Watson were but slightly affected by the intense heat, while those taken from the Safe manufactured by Farrels & Herring, were in our udgment, damaged fully fifteen per cent more than hose taken from Evans & Watson's Safe. We believe the above to have been a fair and impartial trial of the respective qualities of both Safes.

JACOB H. DYSHER,

DANIEL'S, HUNTER Having been absent during the burning, we fully coincide with the above statement of the condition Safes.
