THE TIOGA COUNTY AGITATOR.

The Time to Cut Wheat.

This has been made a matter of careful experiment in England, and much more detends upon it than is generally supposed. From a very careful series of experiments

made in England, in 1840-41, Mr. Jonn Hanman, of Yorkshire, with a view of determining the proper period of reaping wheat, it was decided that the best time for performing the operation is, when it is in a "raw" state, or when the straw, as seen from a dis tance, appears green, but closely examined, is found to be approximating to yellow, and the grain itself, being separated from the chaff, is pulpy and soft, but not in the milky stage. This gentleman has shown that, at least six dollars per acre are lost by allowing the wheat to become ripe before it is cut, and that at the same time its quality is not so good.

The chief advantages derived from this method, are stated to be a greater weight of grain to a given space of ground, which produces more flour of a superior quality; the straw contains more nutritive matter, and is better relished by animals; and there is a better opportunity of securing the crop, and a saving in so doing, as there is less waste in moving or reaping the wheat by the dropping out of the seed.

It will be seen in this matter, how much a farmer's success depends upon an accurate knowledge of his business. Even in so small an item as the cutting of grain, the owner of fifty acres would lose three hundred dollars, by harvesting a few days too late. There are many other farm operations in which accurate knowledge is quite as important. Is it any wonder that so many of our farmers do not make money when there are a hundred holes in their pockets, through which the money is dripping out in dollars, dimes and cents. The whole year is a scene of prodigal waste, for want of a little knowledge. Wood is wasted for want of a good stove, or a tight house. Ashes are wasted for want of a tight barn to shelter cattle in the winter nights. Manures are wasted for want of a barn cellar, and sheds, and absorbents. La bor is wasted for want of a manure to pro-duce maximum crops. Is it strange with all these leaks, that the farmer's till does not fill up further is the farmer's till does not fill and as promotive as it can be done as well up faster ?- Homestead.

Scare Crows.

For scarecrows, the best I know of is a few crows shot and hung up in different parts of the field by one leg, or bait and catch them in steel traps. In my younger days, for years, these scarecrows were ample to keep off birds. Every Yankee farmer should have a good gun and ammunition, and know how to use it. Find all the crow's nests in your immediate neighborhood, break up their nests, seize their young, and then is the time to shoot some of the old ones. I once secured sixteen in two hours. Go over your cornfield daily, and if the crows havo drrwr any, be there the next morning by three o'clock with your artillery, or the crows will be there before you; salute the first comer with cold lead from your early gun, and if you do not succeed in bagging him, he and his neighbors will come to the conclusion that they had better let that man's corn alone --Another way of keeping crows from your field is by twining. String wool twine from stake to stake once in fifteen rows, directly over the row. You can cultivate the first time and let it remain. Do the twining immediately after planting and it would be rare to have a crow light on the field while the twine remains.

Crows grow bold by the cry of their young for food, and by man being slack and easy instinct teaches them whose corn it will do to pull. The fields for which crows have so strong a taste, are generally shallow and half plowed, less than half manured, bordernd by bushes, briars and enclosed by a mere apology for a lence.-Years ago one of your peace men had a field with one of those ugly borders which have always a great tendency to widen; at hoeing none wanted to hoe the outside row ; the altercation between the boys would finally be settled by the old man saying, "Let the Devil take the outside row ;" and in a few years he had the whole field. Should the above mentioned scarecrows fail to keep the crows from pulling up the corn, soak other corn in rum, or whisky and strychnine, and scatter it broadcast on the field. They like the human will like the taste; but as certain as they eat of it they die. You will, in most of the liquor on sale, find enough strychnine, without adding more, to do the work for crows .-- H. W. LESTER, Rutland, Vt.-Country Gentleman.

TEN YEARS AGO .-- Ten years ago in one of the schools of Lancaster county, a black. board was forbidden to be used; and the teacher, who introduced it was dismissed because he persisted in using it, and in teaching that the world is a globe; and a teacher employed in his stead, was pledged not to use a blackboard, or teach the figure and motion of the earth .- Lancaster Examiner.

BUCHU LEAVES are procured from the south-ern part of Africa. The Hottentots at the cape of Good Hope have long used this article as a remedy in a variety of diseases. From them the medicine was borrowed by the English and Datch physicians residing there and by their recommend-ation it was soon employed in Europe. In process of time this medicine has come into general use, and is highly spoken of by the best medical writers. Physicians recompresed it meeting for complicity of Physicians recommend it mostly for complaints of the urinary organs, such as gravel, a morbid irrita-tion of the bladder and urethra, retention of urine, also incontinence of urine from want of tone in the urinary organs. It cools the unnatural heat and relieves pain; and in many cases of long standing it has been effectual when other valuable medicines had failed to produce an effect. The active princi-ple of this medicine is a volatile oil which is mostly lost by the old process of boiling. Hence it requires great care and skilful management to prepare this medicine properly.

FLUID EXTRACT OF BUCHU is a strong or Γ concentrated preparation prepared by the new process called 'Displacement." By this the valua-ble properties of the Buchu are entirely preserved, and this form of the medicine is less liable to injury from age and more palateable. Village would respectfully call the attention of the public to the following advertisement. "Man wan's but little here below nor wants that little long" is an old saying and perhaps true to a certain extents But it seems to me that in this time of general suspension and panic, everything is tending to a reversion of time-honored sayings, and everybody wants a little more still. The farmers (and they really ought to have as much as anybody, for they are to our country what a main spring is to a watch,) wants a little more for their wheat, buckwheat, rye

wants a little more for their wheat, buckwheat, rye, corn, oats, potatocs, &c., than the purchaser feels able and willing to pay. The merchant wants a little more for his Flour, Pork, Salt, Dry Goods, Boots & Sinoes, Hats & Caps, Hardware, Crockery and ten thousand little things he has to sell than the farmer thinks he ought to pay. At this present time it seems to be conceded by all that the cash value of good wheat is \$1 per bushel; buckwheat, 2 to 2-6; corn 3-6 to 4-6; oats, 2 to 2-6; butter, 14 to 16 cents. Now to equalize the matter and make it satisfactory on both sides, I want and will agree to take from every farmer of Tioga county, all the wheat I can get farmer of Tioga county, all the wheat I can ge for the next 60 days at 9 and 10 shillings per bush el according to quality; buckwheat at 2-6 to 3; eora 5 to 5-6; oats 2-9 to 3 shillings; butter 16 to 19 cents.

Report of the Committee appointed to superintend the Burning of the Iron Safes, at Reading, Feb. 27, 1857.

"The undersigned, members of the committee, do respectfully report, that we saw the two Safes origi-nally agreed upon by Farrels & Herring and Evans & Watson, placed side by side in a furnace, viz: The Safe in use by the Paymaster of the Philadel-The Sate in use by the Laynaster of the Linhart-phia and Reading Railroad Company, in his office at Reading, manufactured by Earrels & Herring, and the safe in use by H. The Safes were then cooled off with water, after which they were opened and the books and papers taken out by the Committee and sent to H. A. Lantz's out by the Committee and sent to H. A. Lantz's store for public examination, after they were first examined and marked by the Committee. The books and papers taken from the Safe manufactured by Evans & Watson were bat slightly affected by the intense heat, while those taken from the Safe manufactured by Farrels & Herring, were in our judgment, damaged fully fifteen per cent more than those taken from Evans & Watson's Safe. The book is having a very large sale, some Agents ordering 1000 copies at a single order. The largest commission paid to ac-tive Agents. Specimen copies sent by mail, on receipt of the price, \$1,25. J. W. BRADLEX, Publisher, No. 43 North Fourth St., Philadelphia. CAUTION. The attention of the Publisher has been called to spurions editions of this work, published, and contains all the important matter of the English Edition which is sold at §5; for the truth of this assertion, we refer to the following noti-ces from some of the most respectable journals in the counces from some of the most respectable journals in the try :

NOTICES OF THE PRESS.

try: NOTICES OF THE PRESS. In this volume we have presented to us the whole of Dr. Livingstone's Travels, omitting only scientific details.--MED. & SURO, JORNAL. Livingstone's Travels.--Nothing of real importance is omit-ted. The general reader will prefer this to the English edi-tion, especially as the cost is so tilfing.--PENNA. INO. Dr. Livingstone's Pravels and Researches in South Africa, Appear to great advantage in this edition, which is undoubt-edly the edition most acceptable to the randiar who reads for practical instruction and amusement--Sirumary Pou-ration and attrable book for the general reader, and the admirable style in which the published has issued it will commend it to the favor of thousands.--CHIETIAN OBSERVE. We cannot name thirty-two chapters which are likely to begulis time and enlarge the scope of infietion more pleas-antly, and at the same time more satisfacturily than these Livingstone adventures. A special value is given to this volume, by the addition of "Historical Notices of Diccovaries in Africa," and taken alth-gether it would be difficult to name any publication which more completely meets the popular taste of our time for read-ing matter which is strange, new, the scene laid in far off countries, which touches the feelings and increases our stock of mseful knowledge--NEW YORKER. It tells the whole story, losving out digressions and epi-sodes.--LEGAL INTELIDEXCEL. Aprel 22, 102°, 2m.
