We have received the March number of Goder's Ladey's Book. It is a superb number. R may be found at the Bookstore of Smith & Richards.

Time flies, and as we cannot arrest its flight, at had better measure it as it goes. Foley has received a new assortment of handsome clocks which are warranted to suit. Call and see

A coroner's jury has been sitting in Corning for some time past enquiring into the causes of the recent fires in that village. The investigation has resulted in the discovery of important facts which show conclusively, what had already been suspected, that these fires were the work of incendiaries.

Accident.-Mr. George Buchanan, residing in Jackson township, engaged in cutting cordwood for Charles Voorheis, of Wells township. Bradford Co., was killed on Wednesday, 9th inst., by a tree, which, in falling, struck a log and sninging round struck him, breaking his back and legs. He died in about two hours, leaving s wife.

CONFIRMATION. -Bishop BOWMAN preached trice in the Episcopal Church in this village list Sunday, a large number being present. Bishop Bowman is a man of fine presence and endently made a very favorable impression upon the people. He is a fine speaker.

At the close of the forenoon sermon the rite of confirmation was administered to thirteen

We desire to call the attention of our readen to an advertisement to be founed in another column headed "How to make Butter."-Messrs Smead & Tabor called at our office last Saturday and showed us a model of this inrention, and we have no hesitation in saying that it is the most perfect thing of the kind we have ever seen. To farmers engaged extensive ly in the manufacture of butter this churn particularly recommends itself as a labor saving machine. Letters Patent have been secured and the proprietors are now manufacturing churns which they sell at the low price of five Dollars.

This invention consists in having an adjustable wrist pin attached to a fly wheel and fitted within a slotted vibrating arm which has a rod pointed to it at right angles, the parts being so arranged as to convert a rotary into reciprocating motion and vice versa. And not the least important part of this invention, is the fact that there is such an arrangement of means that there is the least possible loss or absorption by friction. This invention is important in every kind of machinery when these two motionsreciprocating and rotary-are used in connection with each other. Messrs Smead & Tabor have not as yet applied it to anything but chams, but even in this application, the utility of this principle and its importance in Mechanics are plainly seen. Although it cost the inventor three years of attention in making experiments, it is perfectly simple and will last for years without repair.

Adjoining Counties.
POTTER COUNTY.—At the late election in the Borough of Coudersport, the entire Republican ticket was elected.—A Masonic Lodge is being organized at Coudersport.—On Monday the 14th inst.,—St. Valentine's Day—nineteen German ladies and gentlemen from the Germania colony entered Coudersport in a four herse sleigh with banners flying, singing a holliday chorus suited to the occasion according to German custom. They stopped at Glassmire's Hotel and were soon joined by the young people of the village. Dancing and other amusements were engaged in for several hours. In the evening the visitors were serenaded by the Coudersport Brass Band. The Germania party returned the next day, well pleased with their visit.

Lyconing County.—Governor Packer has ap-Pointed Mr. Clark of the Gazette, Grain Measurer at Philadelphia. The duties of the office are nominal, and the salary is \$2,500 a year. Printers are lucky sometimes. The Loco Foco County Committee met at Williamsport instructions of the "unwashed," but the Lecomptonites carried the day and elected John R. Beck a delegate to the Fourth of March Contrain at Harrisburg. The opponents of Packer and Douglas feel jubilant.—Scarletina is prevailing to a considerable extent in several Fortions of the county and has proved fatal to a number of children.

Betweek. There was a contest between the him and nousehold sewing.—Indoor to Book Rev Sewing Machine, and have come to the conduction that every lady who desires her sewing beautifully and quickly done, would be most fortunate in possessing one of these reliable and indefatigable iron needle-women, whose combined qualities of iron peedle-women, whose combined growing beautifully and quickly done, would be most fortunate in possessing one of these reliable and indefatigable iron peedle-women, whose combined qualities of iron peedle-women, whose combined growing beautifully and quickly done, would be most fortunate in possessing one of these reliable and indefatigable iron peedle-women, whose combined growing beautifully and quickly done, would be most fortunate in possessing one of these reliable and indefatigable iron peedle-women, whose combined growing beautifully and quickly done, would be most fortunate in possessing one of these reliable and indefatigable iron peedle-women, whose combined growing beautifully and quickly done, would be most fortunate in possessing one of these reliable and indefatigable iron possessing one of t last week. BRADFORD COUNTY.—The Argus commences is last local column with the following Irish Announcement: "There will be a total eclipse of the moon early this (Thursday) morning!"-A large meeting had been held in Towards to take into consideration the propriety of urging the Legislature to pass a law for the relief of those who felt aggrieved by the construction of the North Branch Canal.

the North Branch Canal.

CLINTON COUNTY.—They have a Literary Society in Lock Haven, and we know of no place where the benighted inhabitants need one more than they do there. We learn from the Watchman that H. Gold Rogers who visited this place last Summer, was in Lock Haven last week, and was invited by the members of the aforesaid Literary Society to lecture before them which he consented so do. His lecture was for humanity."—[Carsius M. Clay.

upon "The Age of Columbus," and no doubt was prepared before his mind became the wreck which it now is. But the amateur litterati of Lock Haven could not bear such strong food. Had it been the milk-and-water generalities of some third rate lawyer of that place, it might have been palatable. The outrage on Mr. Rogers, and upon civilized hospitality and decency was this: The presiding officer laid a note written by the Secretary before the lecturer asking him to stop, which was properly unheeded by him. Whereupon the presiding officer aforesaid interrupted the lecturer, and asked the audience whether they would listen to the balance of the lecture! We have no hesitation in saying that such an act of boorish rudeness to a guest never before occurred in a country town in this State.

We are glad to be able to say that people there are not all as ignorant as the officers of this Society. A correspondent of the Watchman-though that paper keeps mum on the subject-writes an earnest and manly rebuke of this conduct from which we make an extract:

"How strange it is that men who would profess classic veneration for a crumbling arch on 'the Appian way,' or a broken column amid the ruins of Rome, can point the finger of derision at the fragmentary remains of a noble mind, and smile at the rehearsal of exploits which once thrilled the very hearts of Europe."

We can only add the remark that Allison WHITE who voted in Congress the other day against a resolution condemning the reopening of the African Slave Trade, hails from that remarkable town

WARREN COUNTY .- The Warren Ledger heads in account of a knock-down between a couple of lawyers in that village as a "Fight in High Life." It does not say how "high" the belligerents were at the time, but the presumption is that they were considerably elevated. One of the parties is famous for knock-down arguments in the legal line, and he must have been badly worsted befere he saw fit to "go in on his mus-

bDeerfield, Feb. 10, 1859. HOW TO MAKE BUTTER.

SE the New Machine invented by E. A. Smead,
to operate your common Dash Churns, it can be
applied to any size. You can regulate the stroke to
any required length from two to fourteen inches, by any required length from two to forteen incaes, by the adjustable wrist pin in the fly wheel by which motion is imparted to the dash. A child can operate it with ease. See that the Inventor's name is on the machine before you purchase. Price, Five Dollars.

This machine is the result of three years experiments, and has been pronounced by scientific men to be perfect. I obtained a glass churn last year in which I could witness the agitation produced by the different length stroke, this showed the advantage of having the adjustable wrist pin, as the stroke must be in proportion to the amount of cream or milk to be churned. Letters Patent of the United States are now pending, and all persons are cautioned not to infringe. It can only be had of Smead & Tabor, at

fringe. It can only be had of Smead & Tabor, at Tioga.
