E. A. SMEAD'S PATENT,

For Converting Rotary in Reciprocating Motion, and Vice Versa. PATENTED FEBRUARY 15, 1859.

No Manufacturers, this Invention is of great importance, as either motion is converted into the other by a simple arrangement of means, and with the least possible loss or absorption of power by friction, and applicable to every Machine where these two motions are required. The Cut shows the principle as applied to Common Dash Churns. The under signed have purchased the Patent Right for this coun ty, and are manufacturing and selling at the low price of \$5. It is conceded to be the best arrangement for churning Milk or Cream ever invented. Tioga, May 12. '59. BALDWIN, LOWELL & CO.
