Hostetter's Stomach Bitters.

In VIEW of the fact that every member of the human family is more or less subjected to some complaint, besides innumerable other conditions in life, which, by the assistance of a little knowledge or exercise of common sense, they may be able so to regulate their habits of diet, and with the assistance of a good tonic, securs permanent health, in order to accomplish this desired object the true course to jursue is certainly that which will produce a natural state of things at the least hazard of vital strength and life; for this end Dr. Hestetter has introduced to this country a preparation bearing his name, which at this day is not a new medicine, but one that hos been tried for years, giving satisfaction to all whe have used it. The Bitters operate powerfully upon the stomach, bowels and liver, restoring them to a healthy and vigorous action, and thus by the simple process of strengthening nature, enable the system to triumph over disease.

That after seven cords of oak wood and three of pine had been consumed around the Safe, it was opened in the presence of the committee, and the contents taken out, a little warmed, but not even scorched. Several Silver Medals heretofore received by the manufacturers, and a large quantity of documents were in the Safe, and came out encirely uninjured. The experiment satisfied us of the capacity of Safes of this kind to protect contents from any fire to which they may be exposed. they may be exposed.

WILMINGTON, Del., Sept, 17, 1859.—Messrs, Evans and Watson, Philadelphia.

Gentlemen: The Salamander Fire-Proof Safe of Continuous Control of C your manufacture, purchased by us from your Agent, Ferris & Garrett, of our city, some nine months ago, Ferris & Garrett, of our city, some nine months ago, was severely tried by burglars last Saturday night, and although they had a sledge hammer, cold chisels, dill, and gunpowder, they did not succeed in opening the Safe. The lock being one of Hall's Patent Powder-proof," they could not get the powder into it, but drilled a hole in the lower punel and forced in a large charge, which was ignited, and although the door, inside and out, showed the explosion not to have been a small one, it was not forced open. We suppose they were the greater part of the night at work on it. We are much gratified at the result of the attempt to enter it, and if the above facts are of any service, you are at liberty to use them.

Yours, truly,

GREAT FIRE!-ANOTHER TRIUMPH.

KNOXVILLE, TENESSEE, March 13th, 1859.—Messrs. Evans & Watson, Philadelphia: Gentlemen: It affords me great pleasure to say to you that the Salamander Safe, which I purchased of you in February, 1858, proved to be what you recommended it—a sure protection from fire. My storehouse together with several others, was burned to the ground in March last. The Safe fell through into the cellan, and was exposed to intense heat for six or eight hours, and when it was taken from the ruins and opened, all its contents were found to be in a perfect state, the books and papers not being injured in the

state, the books and papers not being injured in the least. I can cheerfully recommend your Safes to the community, believing as I do, that they are as near fire-proof as it is possible for any Safe to be made.
