To the President of the Pennsylvania Agricultural Society:—The subscribers, your committee to examine the contents of a Sainmander Eafe of Evans & Watson, after being exposed to a strong fire on the Fair Grounds for sight beaut

after being exposed to a strong fire on the Fair Grounds for eight hours, respectfully represent.

That after seven cords of oak wood and three of pine had been consumed around the Safe, it was opened in the presence of the committee, and the contents taken out, a little warmed, but not even scorched.

Several Silver Medals heretofore received by the manufacturers, and a large quantity of documents were in the Safe, and came out encirely uninjured.

The experiment satisfied us of the capacity of Safes of this kind to protect contents from any fire to which they may be exposed.

they may be exposed.

STILL ANOTHER.

WILMINGTON, Del., Sept, 17, 1859.—Messrs. Evans and Watson, Philadelphia.

Gentlemen: The Salamander Fire Proof Safe of Gentlemen: The Salamander Fire-Proof Safe of your manufacture, purchased by us from your Agent, Ferris & Garrett, of our city, some nine months ago, was severely tried by burglars last Saturday night, and although they had a sledge hammer; cold chisels, drill, and gunpowder, they did not succeed in opening the Safe. The lock being one of Hall's Patent Powder-proof," they could not get the powder into it, but drilled a hole in the lower panel and forced in a farge charge, which was ignited, and although the door, inside and out, showed the explosion not to have been a small one, it was not forced open. We suppose they were the greater part of the night at work on it. We are much gratified at the result of the attempt to enter it, and if the above facts are off any service, you are at liberty to use them.

GREAT FIRE!—ANOTHER TRIUMPH.
KNONVILLE, TENESSEE, March 13th, 1859.—Messre.
Evans & Watson, Philadelphia;

at liberty to use them.

Evans & Watson, Philadelphia:

Gentlemen: It affords me great pleasure to say to you that the Salamander Safe, which I purchased of you in February, 1858, proved to be what you recommended it—a sure protection from fire. My storehouse together with several others, was burned to the ground in March last. The Safe fell through into the cellar, and was exposed to intense heat for six or eight hours, and when it was taken from the ruins and opened, all its contents were found to be in a perfect state, the books and papers not being injured in the least. I can cheerfully recommend your Safes to the community, believing as I do, that they are as near fire-proof as it is possible for any Safe to be made.
