PALMERS PORTABLE CHALLENGE

CLOTHES DRYER EQUALLED BY NORE-EXCELLED NEVER.

PEAD the following enumeration of advantage The over any Dryer gyer before officed to the public. The truthfulness of its claims to these advantages can

The truthfulness of its claims to these advantages can be attested by hundreds who have used them:

1st. The facility for spreading at any point of elevation most convenient frihanging on the clothest and then saising by a similar yet powerful hoisting jack, well up and out of the bay. All will readily see the great importance of the arrangement. Many stationary machines are fitted up with a rack and pinion? or other expensive and ambrous devices, for raising the frames, costing from \$10. to \$20. But here we get this very desirable facility in a manner more effective and stimple than ever before devised, and that in connection with the Portables Dryer, and all at an expense simple than ever before devised, and that in connection with the Portable I ryer, and all at, an expense that nominal. Dryers at thout this, necessarily bring the clothes so low as to be in the way of everything passing beneath, and the so high as to make the hanging on and taking off the clothes, a work of labor and inconvenience. For its inner, to take off frozen clothes in winter, from a common line, in easy reach, is bad enough, but when it he got to be done standing; on the toe, and reacting to, it is todious in the extreme. The Challenge Dryer in be lowered as easily as it can be raised, by the same ack, so as to come within the casy reach of a child. The operation of hoisting and clowering is as simple at that of working a pump handle.

dle...

2d. The lower end of the center shaft or post, has fitted to it a taper iron thimble, fitting into an iron socket, let into the ground post, so that when the backet, let into the ground post, so that when the backet is so made as to aci as a bap to preserve the post, and a ring to prevent its stating, and is provided with a cover, to keup out wall, snow and dirt. A flange on the thimble sheds the fain, so as to prevent the water from getting into the looket when the Dryer is set iffering into the looket when the Dryer is set iffering into the looket when the Dryer is set iffering into the looket when the Dryer is set iffering into the looket when the Dryer is set iffering looked by well and examine our goods and prices, and they will doubtless find that the place to be up to the sound in the state of the sound in the sound in the state of the sound in the sound in the sound in the state of the sound in the state of the sound in the sound in the state of the sound in the

sen in.

3d. It is the best made and most durable macline ever offered to the public. The hubs are iron—no splitting—no shrinking by the weather—so as to dind on to the post. The firm work is covered with a licative coat of varnish, throughly baked on. The rings

ry coat of variety, throughly baked on. The arms and braces are joined to the hubs in a manner defining comparison, for simplicity, strength and durability.—
The cord and timber see of the best quality, and but together in the most bestantial manner.

4th. In revolving, if runs iron on iron, hence revolves very easily, a heath of air being sufficient to set it in motion, and gaw portions of the dothes are constantly being presented to the wind and sun, and the process of drying. Does on very rapidly, and clothes will dry one-third quicker than on the struight line.

6th. In case of the scened rains, or in cold weather, the Dryer can be folded up with the clothes on, and taken into the house. Elf desired, it can be set up in the house in rainy of reading in snow or wet grass, as the operator can put the clothes without moving from the ordinary patters toop, as the case may be, as being portable, it can be set up where a stationary Dryer would be in the way. Thousands have lost health and life, by exposures in snow and imperfect paths or wet grass, which this Dryer renders unnecessary.

paths or wet grass, which this Dryer renders unnecessury.

This is no humbur but a substantial, staple machine, filling one of the most palpable and every day wants of every family in city and country. Nothing can exceed the favor with which they are received, and we refer to this aid, their rapidly increasing sales, and to the testimonial of those who have used them, as proof of sheir articles and all of the fact that numbers of persons who had bought other Dryers, have thrown them said and are using the Challenge Dryer. In every phic of economy, convenience and durability, it challenge the world.

HOUSEHOLD FURNITURE. OF ALL KINDS, can be found at the rooms of E. D. WELLS, LAWRENCEVILLE,

EVANS & WATSON'S salamander safes. 304 Chestnut Street, PHILADELPHIA.

ANOTHER TRIUMPH!

PHILADELPHIA, Sept. 29, 1859.
To the President of the Pennsylvania Agricultural Society:—The subscribers, your committee to examine the contents of a Saiamander Safe of Evans & Watson, after being exposed to a strong fire on the Fair Grounds for eight hours, respectfully represent— That after seven cords of oak wood and three of

pine had been consumed around the Safe, it was opened in the presence of the committee, and the contents taken out, a little warmed, but not even scorched. Several Silver Medals heretofore received by the manufacturers, and a large quantity of documents were in the Safe, and came out encirely uninjured.

The experiment satisfied us of the capacity of Safes of this kind to protect contents from any fire to which

they may be exposed.

The Committee award a Diploma and Silver Medal. GEO. W. WOODWARD, John W. Geary, J. P. Rutherford,

ALPRED S. GILLETT.

STILL ANOTHER. WILMINGTON, Del., Sept, 17, 1859.—Messrs, Evans and Watson, Philadelphia.

Gentlemen: The Salamander Fire Proof Safe of your manufacture, purchased by us from your Agent, Ferris & Garrett, of our city, some nine months ago, was severely tried by burglars last Saturday night, and although they had a sledge hammer, cold chisels, drill, and gunpowder, they did not succeed in opening the Safe. The lock being one of Hall's Patent Pow der-proof," they could not get the powder into it, but drilled a hole in the lower panel and forced in a large charge, which was ignited, and although the door, inside and out, showed the explosion not to have been a side and out, showed the explosion not to have been a small one, it was not forced open. We suppose they were the greater part of the night at work on it. We are much gratified at the result of the attempt to enter it, and if the above facts are of any service, you are

Yours, truly, BAYNARD & JONES. GREAT FIRE!-ANOTHER TRIUMPH.

at liberty to use them.

KNOXVILLE, TEXESSÉE, March 13th, 1859.—Messix. Evans & Watson. Philadelphia:

Gentlemen: It affords me great pleasure to say to you that the Salamander Safe, which I purchased of you in February, 1858, proved to be what you recommended it—a sure protection from fire. My store-house together with several others, was burned to the ground in March last. The Safe fell through into the cellar, and was exposed to intense heat for six, or eight hours, and when it was taken from the ruins and opened, all its contents were found to be in a perfect state, the books and papers not being injured in the

least. I can cheerfully recommend your Safes to the community, believing as I do, that they are as near-fire-proof as it is possible for any Safe to be made.

THOMAS J. POWELL.

The A large assortment of the above SAFES always on hand, at 304 Chestnut street, (late 24 South Fourth & Philadelphia Dec. 22, 1859 Fourth st. Philadelphin. Dec. 22, 1859.
