Emormous Business for one New York Courier:
Emormous Business for one New York Merchant.—We are happy to inform our fellow citizens that there is one place in our city where the physician, apothecary, and country merchant, can go and purchase pure wines and Liquors, as imported, and of the best quality. We do not linted to give an elaborate description of this merchan's extensive business, although it will well repay any stranged or citizen to vigit Udolpho Wolfe's extensive warehouse, Nds. 18, 20. and 22 Beaver street, and Nos. 17, 19 and 21, Marketfield street. His stoce of Schunpps on hand ready por shipment could not have been less than thirty thousand cases; the Brandy some tea thousand cases—Vintages of 1836 to 1856; and ten thousand bases of Madeira, Sherty and Port Wine, Scotch and Irish Whiskey. Jamalea and St. Ctoix Rum, some very old and oqual to any in this country. He also had three large cellars, filled with Brandy, wine. &c., in Caska, under Custom House key, ready for bottling. Mr. Wolfe's sales of Schnapps last year amounted to one hundred and eighty thousand dozon, and we hope that in less than two years he may be eqally successful with his brandies and whes.

His business merits the patronage of every lover of his species. Private families who wish pure whos, and Liquors for medical use, should send their orders direct to Mr. Wolfe in the sountry, puts' ap assorted cases of wines and there's pure wines and thours.

We understand Mr. Wolfe, for the accommodation of small delates in the country, puts' ap assorted cases of wines and liquors. Such a man, and such a merchant, should be sutained against his tons of thousands of oppodents in the United States, who sell nothing but timitations, ruinous silks to human health and happiness.

S. L. AVERY'S PATENT

IMPROVED WINDLASS.

PATENTED MAY 8, 1860.—The object of this invention is to apply a brake to a windlass in such a manner that articles attacked to the windlass, and raised by it, may be lowered with facility; the hitherte slow and tedious manual reverse movement of the windlass being avoided, and the invention at the same time admitting of the operator having complete control over the descending movement of the article being lowered. The invention is applicable to various purposes; its use, in connection with wells may be mentioned as an instance, in which the buck-

ets, after being raised and emptied, may be easily low-ered, and their movement retarded at the proper time, so that they will not violently strike the water .- Sci entific American.
