GROVER & BAKER'S

CELEBRATED NOISELESS SEWING MACHINES. FOR FAMILY AND MANUFACTURING USE,

495 BROADWAY, NEW YORK. Agencies in all the principal Cities and Towns in the

The Grover and Baker Sewing Machine Company are now nanufacturing, and have on exhibition at their different the Bingham Lands in Richmonutownship contracted in Morace in the American and the Shuttle or Lock-Statch, of Lock Statch, of the advantage of comparing the stitches of the two leading machines and exercising their own judgment as to their respective merits. This is the only company that manufacturs both kinds of machines, and therefore the only one that can offer this privilege to the purchaser.

"We speak from experience when we say that, after having all of which will be sold at the PANIC PRICES for tried all the principal Sewing Machines, we must accord to that of Grover and Baker the pre eminence. Those indispensable features of sewing, strength, uniformity and elasticity, make it the first sewing machine in the country. Others have their good points, but this combines all, and possesses every characteristic necessary to make it most desirable."N. F. Christian Advocate and Journal.

' MERIT VS. PRETEXCE. - We perceive that the Grover and Baker Sewing Machine is every day growing more and more in favor, both for manufacturing and family purposes-but especially as adapted to all the requirements of family use. Other machines, by dint of brazen puffery and conniving with committees at annual fairs, have been thrust forward into the first place; but they are fast losing this unmerited position. The real merits of the Grover and Baker Machine are . beginning to be known in a practical way, and daily is the demand for them increasing, while the demand for heretofore, better known, but inferior machines, is proportionally decreasing. So it turns out in this, as in many other instances, that 'honesty is the best policy,' and the right, in the end comes uppermost.

est confidence that there is no better machine for general family use than Grover and Baker's Sewing Machine Co. It makes a beautiful clastic scam that does not rip with wear or washing, runs almost noiselessly, is plain, simple, easy to work, and not liable to get out of repair, fastens the ends of its own thread, and uses threads and kilks directly from the spools on which they are bought."-N. Y. Leader.

Grover and Baker's Machines' work in their peculiar stitch, and fabrics put together by it. may wear and drop to pieces from original weakness or hard usage, but come apart or give way at the scams, they can not; they will hold together when the cleth or calico around them hangs in rags and tatters .- N. Y. Daily News.

"The holdts we conceive most necessary and important to meet the wide range of requirements in a machine for family sewing, we find more fully combined in the Grover and Ba ker, viz, extent of capacity, simplicity of construction, case of management, advantage of using thread from two spools without re-winding, strength of work, elasticity, durability and regularity of stitch, and quietness of movement. We therefore mark award to the Grover and Baker."-Report of Tennessee State Fair of 1860-also of St. Louis State Fair of
