NEW OLLANS, 25th August, 1850.

Dr. J. C. Ayer: Sir, I cheerfully comply with the request of your agent, and report to you some of the effects I have realised with York against and in the practice, most of the effects of the cheets I have cured with it in the young of the effects truly wonderful in the cure of Venereal and Murcureal Bicase One of my patients had Syphilitic ulcers in his throat, which were comming his palate and the top of his mouth. Your Saraparille, steadily taken, cured him in five weeks. Another was attacked by secondary symptoms in his nose, and the ulceration had eaten away a considerable part of it, so that I believed the disorder would soon reach his brain and kill him. But it yielded to my administration of your Saraparille, the ulcers healed, and he is well again, not of course without some disfiguration to his face. A woman who had been treated for the kinnel disorder by mircury was suffering from this poison in her bones. They had become so sensitive to the weather that on a damp day she suffered excruciating pain in her joints and bones. She, too, was cured entirely by your Saraparilla in a few weeks. I know from its formula, which your agent gave me, that this preparation from your labritory must be a great remedy; consequently, these truly remarkable results with it have not surprised me.

Fraternally yours,

This is a remedy so universally known to surpass any other for the cure of threat and lung complaints, that it is useless here to publish the evidence of its virtues. Its unrivalled excellence for coughs and colds, and the truly wonderful cures of pulmonary disease, have maps it knows throughout the civilized nations of the earth. Few are the communities, or even families among them, who have not some personal experience of its effects—some living trophy in their midst of its victory over the subtle and dangerous disorders of the threat and lungs. As all know the dreadful fataility of these disorders, and as they know, too, the effects of this remedy, we need not do more than to assure them that it has now all the virtues that it did have when making the cures which have won so strongly upon the confidence of mankind.
