#### The Dutchman's Ride.

The thriving town of Scranton, Pennsylvania, where railroad iron and over products of the same substantial material are extensively manufactured, is situated on the Delaware, very beavy ascending grade in several miles westward from this place, to overcome which requires not a little power of steam with an ordinary train of cars. Just Is fore this part of the road was opened, an office connected with it had deceasion to go three or your miles west to superintend some operations. He took a light hand car and two powerful ments to work it, one of whom was a German, not an accomplished engineer, nor very familiar the the working of railroads. They toiled hargent the crank, working their way up the steep grade, landing their passenger at his destinated point, who sent the car back to Scranton by the German alone.

East Middlebert, Vt., Aug. 23, 1863.

Emerson Smith, Dear Sir:—Your patent shingle and heading machine has satisfied me that it is decidedly the best and cheapest machine in use. It is very simply constructed, not liable to derangement, a perfectly safe and easy machine to work. It will cut from 10 to 15,000 per day; the saw running horizontal, cut ting lengthwise the grain, makes much more perfect shingles and heading than can be made by any machine that cuts across the grain. Your machine must prove a great success. Yours with respect, it had decasion to go three or your miles west to the car back to Scranton by the German alone, knowing that no labor was rechired to descend, excepting when it was necessity to hold back by putting on the brake. & shaving received nny instructions, however, as the manner in which he was to work his we flown, the Germanner in mounted the car, and the control of the car, and the car of the car o to the crank, and was soop moving with tremendous relocity down the shill toward the town and the terminus of the road. As he passed through the town, and was before him, his danger excited universal prehension, and the danger excited universal prehension, and the road on every respect. I am well pleased with the machine; it does the work well and with great dispatch. It is a valuable and important improvement. Yours respectfully, LEWIS SHERRILL. the cry was raised on every and, "Put on the brake!" Interpreting the sto mean put on more strength, he laid out states power upon one last grand effort. Resching the end of the road, where there was hearth obstruction, sufficient to stop a train of cars the hand car was instantly converted into kins long wood, and the Lewis Russell. poor German was theown hand over head, some twenty-five or thirty feet by a d where the car struck. As he was picked when a mangled condition, some one asked air.

"Wby did'nt you put on sichrake?" "Put on the prake!" sa the; "vy, it ish prake, all to pieces!" And this was the end cathat ride.-Harper's Drawer.

THIS important improvement in machines for manufacturing shipgles and heading, the inventor has the pleasure of introducing to the public; a machine which has proved itself, beyond a doubt, decidedly the most perfect, the best and cheapest machine, that has ever yet been introduced. As shipgles and heading are articles of great demand and of much importance, the aim and object of the inventor has been to get up a machine that would make them as near they have been born out of the dark hour and the cloud, and have gene up in chariots of fire. I succeeded in accomplishing his object; which fact is testified to by those who have the machines in use .-The superiority and many important advantages this machine has over others, are: It has no complicated moon of the Constitution and play lovers to the

which can be produced: MIDDLEBURY, Vt., Aug. 25, 1863.

Mr. Emerson Smith, Dear Sir:—You wish to knew our opinion of your improved shingle and heading machine. We have had one of them in use some time; have cut about 800,000 from various kinds of timber. It has done the work in the most satisfactory manner. Have lost no time nor expense on account of the machine getting out of order. It is a very perfect ma-chine; easy and safe to operate. We have used dif-ferent kinds of shingle machines. Yours we must say excels all others in every respect. We would not be willing to take four times the cost of the machine, could we not procure another of the same.

VEGETABLE EMBROCATION! MONEY REFUNDED IT IT FAILS TO GIVE SATISFACTION.

For Diptheria, Colds, Coughs, Sore Throat, or Hourseness, its equal is not to be found. When taken in time, or immediately after an exposure, the effects are astonishing. Two or three doses will throw off the cold and perform a cure, and prevent the setting in of the fever and cough that usually follow a cold, which always racks the system, often leading to diptheris and consumption. It is highly necessary, therefore, that the remedy be administered in time. One or two doses may prevent these destructive complaints, and save you from an untimely grave.

In districts infested with Terer and Ague, it has been found infallible as a preventive, and irresistible as a remedy, and thousands who resort to it under apprehension of an attack, escape the scourge; and thousands who neglect to avail themselves of its productive qualities in advance, are cured by a very brief course of this marvelons medicine.—Fever and Ague patients, after being plied with quinine for months in vain, until fairly saturated with that dangerous alkaloid, are not unfrequently restored to health within a few days by the use of HOSTETTER'S BITTER'S.
