The mistakes of printers are of an very funny to readers, and exasperating is Suthors. A single letter is often of the greates importance, and a small mistake frequently changes the whole effect of an article. Some very funny stories are told of mishaps of il & character, and we give below some of the b it.

An English paper once stated that the Ruszian General Backinoffkowsky we; found dead with "a long word in his mouth ! It should have been "sword." In this a se, however, the printer could not have been b amed for leaving out a letter after setting un she Russian

name correctly.

During the Mexican war, one chihe English newspapers hurriedly announced is important item of news from Mexico—the Gen. Pillow and thirty-seven of his men had, seen lost in a "bottle." It should have read " attle." A lad in a printing office came son the name of Hecate, occurring in a line lik othis:

"Shall reign the Hecate of the den est Hell." The boy thinking he had discreded an error, ran to the master printer and endired eagerly

whether there was an e in cat.

"Why no, no, you blockhead," was the reply.

Away went the boy to the press room and extracted the objectionable letter. But fancy the horror of both poet and publisher, when the poem appeared with the ling;

"Shall reign the He Cat of the nepest Hell." A newspaper some time ago gr ively informed its readers that a rat descending the river came in contact with a steamboat; will such serious injury to the boat that great exe tions were necessary to save it. It was a ral; and not a rat, descending the river. LETTERS DROPPED GIT.

But let a form of type better so correct when sent to the press, errors it unfrequently happen, from the liability of let urs to drop out, when the form has not been proferly adjusted or locked sufficiently tight. A minter putting to press a form of the Commun Prayer, the c in the following passage dropped out, unperceived by him : " We shall all be changed in the twinkling of an eye." Which the book appeared, to the horror of the der at worshiper, the passage read: "We shall il be hanged in the twinkling of an eye."

A newspaper recently stated, in a report of a battle, that the conflict was daugdful, and that the enemy was repulsed with great laughter, (slaughter.) -

except the owls, (fowls.) A "MAKE UP" BLUNDER. A laughable mistake is shown in the following mixture of two articles to a concerning a preacher, the other about the tanks of a mad dog-which occurred in a hurred " make up" in a printing office:

in a printing office:

"Rev. James Thompson, reator of St. Andrew's church, preached to always concourse of people on Sunday last. This was his last ser-mon. In a few weeks he will hid farewell to his congregation, as his physician advises him to cross the Atlantic. He hallowed his brethren and sisters, and after the conclusion of a short prayer, took a whim to out up some frantic freaks. He ran up Timot by street to the college. At this stage of breedings a couple of boys seized him and tied he tin kettle to his tail, and he again started. A great crowd collected, and for a time there we have grand scene of running and confusion. After a long race he was finally shot by a politeman."

Mr. B. F. Eaton, Sir:—The Green Mountain shingle and heading machine which I purchased of you, answers the recommend in every respect. I am well pleased with the machine: it does the work well and with great dispatch. It is a valuable and important improvement. Yours respectfully.

It is not stated whether the following item, which is said to have been p inted once upon a time, was the result of inehricay upon the part

of the printer or reporter: "Horrible Catastrophe.—Y sterday morning, at four o'clock p. m., a small mn, named Jones or Smith, with a heel in the sele of his trowsers, committed arsenic by fallowing a dose of suicide. The verdict of the inquest returned a jury that the deceased cane to the fact in accordance with his death. Left a child and six small wives to lament the find of his unfortunate loss. 'In death was rain the midst of life.'"

THE POWER OF C. MAS.

In the priory of Hamme by there dwelt a prior who was very liber dayd who caused these lines to be written declared or:

"Be open evermore, O the say door;
To none be shut, to hone, to poor."
But after his death ther? Succeeded him another, whose name was Rainfard, as greedy and covetous as the other was continuous liberal, who kept the same lines there still, changing nothing therein but one ant, which made them run after this manner:

"Be open evermore, O then, my door, To none; be shut, to hopest or to poor." The following sentence from a recently written novel, shows the importance of punctuation: "He enters on his head the helmet on his feet, armed sandals upon the brow; there was a cloud in his right hand, the faithful sword in his eye, an angry glare— at down."

GRACE GREENWOOD, in the lecture in Clricago, drew the following tree in the future:

"Back on these troots at times will our children look in reverence as a we. The sons of our brave soldiers will be their patents of nobility on grander but their patents of nobility as no rayal hereld the tents of nobility as bility as no royal herald tice has symbols sufficiently glorious for any a coat of arms in those days will cone sleeve hanging empty.

And there will be hapless lads who will listen in mournful envy—saying in their thearts, "Alas, we have no part nor losse who will be and there a youth, more unforters who will stealaway from his comrade and murmur in bit-terness of soul—"AE help mel—My Sother was a sopperhead

SMITH'S IMPROVED GREEN MOUNTAIN Shingle and Heading Machine.

It was Awarded the First Premium Silver Medal, at the New York State Agricultural Fair; at Utica, in 1863, and at all other Fairs where Exhibited.

THIS important improvement in machines for manufacturing shingles and heading, the inventor has the pleasure of introducing to the public; a machine which has proved itself, beyond a doubt, decident which has proved itself, beyond a doubt, decident which has proved itself, beyond a machine which has proved itself, beyond a doubt, decident which has been account to the contract of dedly the most perfect, the best and cheapest machine, that has ever yet been introduced. As shingles and heading are articles of great demand and of much importance, the aim and object of the inventor has been to get up a machine that would make them as near perfect to the best shared, and with the greatest distance that would make them as near perfect to the best shared, and with the greatest distance that would make them as near perfect to the best shared, and with the greatest distance the provider warened to be a second to the provider to the second articles. putch, possible. With much labor and expense he has succeeded in accomplishing his object; which fact is testified to by those who have the machines in use.— The superiority and many important advantages this machine has over others, are: It has no complicated machine has over others, are: It has no compilated parts liable to derangement; simple in its construction, yet strong and durable; perfectly safe and easy in operating; does the work in a very perfect maner, equally as well on heading of different kinds—cutting obliquely or otherwise, as desired. The saw running horizontal, cutting lengthwise of the bolt; the certises travelling only in proportion to the width the carriage traveling only in proportion to the width of the shingle or heading, and are made to cut from 10 to 24 inches in length, works up the timber very close; will cut from 1000 to 1600 per hour of shingles, takes up but little room, occupying only about four feet square, not weighing over 285 lbs.; can be driven by any kind of ordinary power; a very compact ma-chine to ship. The cost of the machine is small com-pared with its value.

The following are a few of the many testimonials

which can be produced:
Middlebury, Vt., Aug. 25, 1863. MIDDLEBURY, Vt., Ang. 23, 1805.
Mr. Emerson Smith, Dear Sir:—You wish to know our opinion of your improved shingle and heading machine. We have had one of them in use some time; have cut about 800,000 from various kinds of timber. It has done the work in the most satisfactory manner. Have lost no time nor expense on account of the machine getting out of order. It is a very perfect machine; easy and sale to operate. We have used dif-ferent kinds of shingle machines. Yours we must say excels all others in every respect. We would not be willing to take four times the cost of the machine, could we not procure another of the same.

Yours truly, ABBY & NICHOLS.

CARRISTOLA, N. Y., Dec. 19, 1864. Mr. B. F. Edion, Dear Sir .—The Green Mountain sbingle and heading machine, which we purchased of you, we have the satisfaction of saying we are highly pleased with. It meets the recommendations. We consider it decidedly the best and most valuable machine that we have ever seen or used. We do not

hesitate in recommending it to any one.
Respectfully. LEWIS, ROSE & CO.

EAST MIDDLEBURY, Vt., Aug. 23, 1863. Emerson Smith, Dear Sir :-Your patent shingle and heading machine has satisfied me that it is decidedly heading machine has satisfied me that it is decidedly the best and cheapest machine in use. It is very simply constructed, not liable to derangement, a perfectly safe and easy machine to work. It will cut from 10 to 15,000 per day; the saw running horizontal, cutting lengthwise the grain, makes much more perfect shingles and heading than can be made by any machine that cuts across the grain. Your machine must prove a great success Yours with respect, CHANDLER TILLOTSON,

GREENVILLE, N. Y., Sept. 1, 1863. Mr. B. F. Enton, Dear Sir :- We have used Smith' improved machine in different kinds of timber. It does its work well beyond our expectations; it i very perfect machine in every respect. We think it cannot but take the place of other macaines when introduced.

Vous respectfully.

CHARLES BREWER,

WM BREWER.

NEW HAVES MILLS, Vt., Sept. 1, 1863. Emerson Smith. Dear Sir:—Your improved shingle machine, which I have had in use since last spring, works complete. It is the best and most perfect machine in use. I have cut 1500, and can 2000 per hour. It is a machine that pays well, and must come into general use.

Yours,

LEWIS RUSSELL.

Have You a Friend in the Army?

Fort Alexander, Md., Oct. 12, '62.
Let me assure you that persons having sons, husbands and brothers in the army will do well to send them Cline's Embrocation. It is just the medicine now wanted by soldiers for colds, coughs, sprains, rheumatism, and camp ailments produced by exposure. Hoping that Suilers for the army will take prompt measures to get a supply, I remain, sir.

For Diptheria, Colds, Coughs, Soro Throat, or Hoarseness, its equal is not to be found. When taken in time, or immediately after an exposure, the effects are astonishing. Two or three doses will throw off the cold and perform a cure, and prevent the setting in of the fever and cough that usually follow a cold, which always racks the system, often leading to diptheria and consumption. It is highly necessary, therefore, that the remedy be administered in time. Causes.

Nothing that is not wholesome, genial and restorative in its nature, enters into the composition of HOSTETTIR'S STOMACH BITTERS. This popular preparation contains no mineral of any kind, no deadly botanical element; no flery excitant; but it is a combination of the extracts of rare balsamic berts and plants, with the purest and mildest of all diffusive stimulants.

It is well to be forcarmed against disease, and, so far as the human system can be protected by human means against madelles engendered by an anwholesome atmosphere, impure water, and other external causes. HOSTETTER'S BITTERS may be relied on as a salegnard.

In districts infested with \*\*Freer and \*\*Ague\*, it has been found infallible as a preventive, and irresistible as a remedy, and thousands who resert to it under apprehension of an attack, escape the scourge; and thousands who neglect to avail themselves of its productive qualities in advance, are cured by a very brief course of this marvelous medicine.—Feverand Ague patients, after being piled with quinine for months in vain, until fairly saturated with that dangerous alkaloid, are not unfrequently restored to health within a few days by the use of HONTLITTER'S BITTERS.

The weak stomach is rapidly invigorated and the appetite restored by this agreeable tonic; and hence it works wonders in cases of Dyerrysta end in less confirmed forms of Industriation and agreeable tonic; and hence it works wonders in cases of Dyerrysta end in less confirmed forms of Industriation and the interestive organs.

Persons of feeble labit, liable to Nerrous Attacks, Lowness of Spirils and Files of Languor find prompt and per manent relief from the Bitters. The testimony on this point is most conclusive, and from both sexes.

The agony of Batters Conc is immediately assuaged by a single dose of the stimulant, and by occasionally resorting to it, the return of the complaint may be prevented.

As a general tonic, HOSTETTER'S BITTERS produce effects which must be experienced or witnessed before they can be full
