There are some people who are "unstable as water, and therefore do not givel." To all such we commend, the followis, good advice from the Waverly Magazine :

PERSEVERE

TERMIT

"Carry a thing through. I's severe ; do'nt do anything else, if you once I irly, soundly, wide awakely begin a thing, le it be carried through, though it costs you you thest comfort, time, energies, and all that you in command. We heartily abominate this turn og backward this wearying and fainting of AM and purpose. It speaks imbecility of mind, us at of charac-ter, coursige, true manliness.

" Carry a thing through. Do at begin it till you are fully prepared for its accomplishment. Think, study, dig, till you know your ground, see your way. This done, launch out with all your soul, and fire; turn neither to the right nor left .- Push on giantly-push on, as if creation had been waiting through all time for your especial hand and spirit. Then you'll do something worthy of yourself all kind.

"Carry a thing through. o'nt leap and dally from one thing to another. No man ever did anything that way. You 20 it. "Be strong minded. Be hop ful, stern, and

manly. Do'ut disgrace yours? by being on this thing to-day, and on that i-morrow, and on another thing next day. Vr. do'nt care if you are the most active mortal wing-we do'nt care if yourabor day and night, in season and out :- be sure the end of your, life will show nothing, if you perpetually change from object to unject. Fortune, success, faire, position, are never gained, but by pionsly, determinedly and bravely sticking, growing, living to a thing till it is fairly accomplished. * "In short, you must carry it thing through

if you want to be anybody or anything. No matter if it does cost you the geasure, the society, the thousand pearly grate fications of life. No matter for these. Stick to the thing and carry it through. Believe you were made for the matter, and that no one elest can do it at all.

"Put forth your whole energies. Stir, wake, electrify yourself, and go forth to the task .-Only once learn to carry a thing through in all its completences and proportion, and you will become a hero. You will think better of yourself-others will think better of you. Of course they will. The world in its very heart admires the stern, determined doer. It sees in him its best sight, its highest object, its richest treasure. Drive right along, then, in whatever you undertake. Consider yourself apply sufficient for the deed. You will be successful. Never fear."

An Incident on Ficket.

A correspondent of the Cincinnati Commercial relates the following :

One day the 108th Dhio Regiment was on picket near Rossville, when rekel Captain and two of his men entered, the Japtain walked in, and on surrendering himself ty one of the pickets, recognized him as his owr son-a resident of Cinfinnatia whose name for abvious reasons we suppress. Rushing forwerd, the Captain was in the set of clasping him in his arms with the exclamation, "O, my sin !" when the soldier rudely shoved him as y from him with the remark!

"Your son ! Get out you infernal rebel ! Do you suppose I would own you for a father ?" "But,-----,I am your long absent father !" "My father ! Well, boys that's g ol" he Jaughed, "Here's a d-----d old rebel says he is my father, when my father has been dead these seven years."

The tears started from the old mans eyes and resting his bead up is stump he wept like a child, while the pickuts looked on in as-tonishment. Composing jumself, the rebel Captain called the soldier , to him and related incidents of a family nate e bat were unques-tionable evidence of the truth of his assertions. The old man had beet, angaged in Cin-

SMITH'S IMPROVED GREEN MOUNTAIN Shingle and Heading Machine,

It was Awarded the First Premium Silver Me dal, at the New York State Agricultural Fair, at Utica, in 1863, and at allother Fairs where Exhibited.

THIS important improvement in machines for man-L ufacturing shingles and heading, the inventor has the pleasure of introducing to the public; a mahas the pleasure of infroducing to the puole; a ma-chine which has prored itself, beyond a doubt, deci-dedly the most perfect, the best and cheapest machine, that has over yet been introduced. 'As shingles and heading are articles of great demand and of much importance, the aim and object of the inventor has been to get up a machine that would make them as near erfect to the best shaved, and with the greatest dis patch, possible. With much labor and expense he has succeeded in accomplishing his object; which fact is testified to by those who have the machines in use. testined to by those who have the machines in use.— The superiority and many important advantages this machine has over others, are: It has no complicated parts liable to derangement; simple in its construc-tion, yet strong and durable; perfectly safe and easy in operating; does the work in a very perfect man-ner, equally as well on heading of different kinds— entiting obligants a otherwise, as desired. The easy cutting obliquely or otherwise, as desired. The sav running horizontal, cutting lengthwise of the bolt; the carriage traveling only in proportion to the width of the shingle or heading, and are made to cut from 10 to 24 inches in length, works up the timber very close; will cut from 1000 to 1600 perhour of shingles, fakes up but little room, occupying only about four feet square, not weighing over 285 lbs.; can be driven by any kind of ordinary power; a very compact ma-chine to ship. The cost of the machine is small com-pared with its value.

The following are a few of the many testimonials which can be produced : MIDDLEBURY, Vt., Aug. 25, 1863.

Mr. Emerson Smith, Dear Sir:--You wish to know our opinion of your improved shingle and heading machine. We have had one of them in use some time; have cut about 800,000 from various kinds of timber. It has done the work in the most satisfactory manner. Have lost no time nor expense on account of the machine getting out of order. It is a very perfect machine; casy and safe to operate. We have used dif-ferent kinds of shingle machines. Yours we must say excels all others in every-respect. We would not be willing to take four times the cost of the machine, could we not procure another of the same. Yours truly, ABBY & NICHOLS.

CARDISTOLA, N. Y., Dec. 19, 1864. Mr. B. F. Eaton, Dear Sir :- The Green Mountain shingle and heading machine, which we purchased of you, we have the satisfaction of saying we are highly pleased with. It meets the recommendations. We consider it decidedly the best and most valuable machine that we have ever seen or used. We do not hesitate in recommending it to any one. Respectfully, LEWIS, ROSE & CO.

EAST MIDDLEBURY, Vt., Aug. 23, 1863. Emerson Smith, Dear Sir :--Your patent shingle and heading machine has satisfied me that it is decidedly the best and cheapest machine in uso. It is very sim-ply constructed, not liable to derangement, a perfectly safe and easy machine to work. It will cut from 10 to 15,000 per day; the saw running horizontal, cutthe fing lengthwise the grain, makes much more per-fect shingles and heading than can be made by any machine that cuts across the grain. Your machine must prove a great success. Yours with respect, CULS NOT BE THE LOW SOL

It does its work well beyond our expectations; it is a very perfect machine in every respect. We think it cannot but take the place of other machines when introduced. Yours respectfully, CHARLES BREWER, introduced.

ANECDOTE OF GEN. N. GLELLAN.-Col. Met calf, of Kentucky, made a radical Union speech at a public meeting & fen : ays since, at which he related an anecdote of General McClellan, showing how he regarded as rebel leaders .-He said :

"I got my eyes openel in that young Napo-McClellan, and in the 2,480 of the conversa-tion I said to him that 2.1 Davis was a scoundrel and repudiator. Ils (McClellan) straightened himself up quickly and said: 'I do assure you, sir, that you are mistaken. - Jeff. Davis is a perfect gentlemul, and will not do any. thing unbecoming a getelleman.' Well, if a traitor, conspirator, thief, repudiator, and civil devil, who is instigating off this murder, is his beau ideal of a "perfect fintleman,' I hope our country may never be citied with his standard of morality and virtue it the head of affairs."
