USE OF THE ARMS IN WALKING .- The first time you are walking with you' arms at liberny, stop moving them, and hold them to your side. You will be surprised to find how soon your companion will leave you behind, although you may hurry, twist, wriggle, and try very hard to keep up: One renson for the slow walk among girls is to be found in this practice of carrying the arms motionless. Three miles an hour, with the arms still, is as hard work as four miles with the arms free.

I have seen the queens of the stage walk. I have seen a few girls and women of queenly bearing walk in the street and drawing-room. They moved their arms in a' free and graceful manner. Could this habit become universal among girls their chest would enlarge and their bearing be greatly improved. See that girl walking with both hands in her muff. How she wriggles and twists her shoulders and hips ! This is because her arms are pinioned. Give Give them free swing, and her gait would soon become graceful.

You have seen pictures of muscles. Those of the upper part of the body, you remember, spread out from the shoulder, to all directions, like a fan. ... Now if you hold he shoulder still, the muscles of the chest will hrink, the shoulders stoop, and the whole chest becomes thin and ugly.

But some girls will say, "swinging the arms. must be vary slight exersise," True, it is very slight if you swing the arms but once or ten times, but if you swing them ten thousand times, in a day, you will obtain more of the muscles of the chest than by all the ordinary movements combined. Inde d, if I were asked what exercise I thought most effective for developing the chests of American girls, I should reply at once, swinging the syms while walking .- Dr. Dio Lewis.

SANBO had been whipped for stealing his master's onions. One day he brought in a skunk in his arms : says he, Massa, here's de chap dat steal de onions i Whew, smell him bref !"
