ply to be industrious, to be virtuous, to be upright in all our dealings and relations with men; and to those now before me, members of the First Regiment of Colored Volunteers from the District of Columbia and the capital of the United States, I have to say that a great deal depende upon yourselves. You must give evidence that you are competent for the rights that the Government has guaranteed to you .--Henceforth each and all of you must be measured according to your merit. If one man is more meritorious than the other, they cannot be equals...* * He that is most meritorious must stand highest without regard to color. It is the very basis upon which leaven rests it. self. Each individual takes the degree in the dublimer and more exalted regions in proportion to his merits and his virtue. Then I shall say to you on this occasion in feturning to your homes and firesides, after feeling conscious and proud of having faithfully discharged your daty, returning with the determination that you will perform your duty in the Tuture as you have in the past, abstain from all those bickerings, and jealousies, and revengeful feelings which too often spring up between different races. There is a great problem before us, and It may as well allude to it here in this connection, and that is whether this race can be incorporated and mixed with the people of the United States, to be made a barmonious and permanent ingredient in the population. This is a problem not yet settled, but we are in the right line to do so. Slavery raised its head against the Government, and the Government Traised its string arm and struck it to the ground. So that part of the problem is settled : the institution of Slavery is pyerthrown. But another part remains to be solved, and that is: Can four millions of people raised as they have been with all the projudices of the whites, can they take their places in the community, and be made to work harmoglously and conbe popsidered. Are the digestive powers of the American Government sufficient to receive this Slement in a new chape, and digest it, and make it work healthfully upon the system that has incorporated it? This is thy question to be determined. Let us make the experiment, and make it in good faith. If they cannot be done, there is another problem belbre us, If we have to become a separate and - distinct people (although I trust that the system can be made to work harmoniously, and that the great probdem will be settled without going any further); if it should be so that the tip races cannot meree and live in peace and pr sperity, and the lass of Providence require that they should be separated ; in that event looking to the far-distant future, and trusping that it may never come; if it should opme, Providence, that works mysteriously, but inerringly and cortainly, will point out the tray and the mode and the manner by which these people are to be separated, and they are to be taken to their dands of inheritance and promise-for such a one is before them. / Hence we are making the experiment. Hence, let me inipress upon you the importance of controling your passions, developing your intellect and of applying your physical powers to the industrial interests of

ates, honorably discharged, as also the property of soldiers' wide. s, minor children of deceased soldiers, &c., from payment of bounty their time of service long or short. These are many people. It has been customary with this the facts in brief.

But the Copperheads ignored the law and the facts, and everywhere represented to the soldiers that having enlisted early in the war, before heavy bounties were in fushion, they would now be required to pay their proportion of the heavy bounties paid in 1864 by taxation. Without reading the law one might be deceived; and hardly,-since most people understand that the leaders of that rotten party are not accustomed to telling the truth at any time pending an election. If any were so deceived they can be warned for the future; and we cannot refrain from saying just here, that the man who takes counsel of his enemies offers a bribe to be cheated, and abuses his friends. But in spite of the shameless lying of our adversaries the victory for the Republicans is signal and overwhelming. But though routed ' and overthrown, our adversaries are not destroyed. They must be fought constantly; for the Snake is only sootched, not killed. It will of President Johnson to the 1st. Dis. But we rejoice with exceeding great joy that our political adversaries have fully endorsed (President Johnson's Reconstruction Policy; for the endorsement of President Johnson's policy is the endorsement of Abraham Lincoln throughout his entire term. Protestant Episcopal Ohurch of the United States, lately sitting in Philadelphia, as regards the southern Dioceses, will deeply pain very church to deal rigidly with its clergy proven

gailty of minor crimes against society. It now welcomes to its communion men who weakly fell into the rebelion against law and order, as if their sin was mildly venial instead of being the highest known in the civilized world. If we mistake not, this reckless attempt to aggrandize the Church by ignoring the crimes of its bishops and clergy, will result in the steady decline, and final and utter fall of the organization in America. In this age even Churches cannot sin against healthy public opinion and escape scatheless. Thousands of conscientious men must withdraw from the support of an organization which fails to discriminate between flagrant wrong and enjoined duty. Excuses may be offered for laymen of moderate degree ; but none can be made for the leaders whose consciences must constantly accuse them of moral treason.

IN THE WORLD

I am acquainted with H.T. Helmbold; he occupied the drug store opposite my residence, and was successful in conducting the business where others had not been equally so before him. I have been favorably impressed with his character and enterprise. WM. WEIGHTMAN, (Pirm of Powers & Weightman,) Manufacturing Chemists, Ninth and Brown Streets, Philadelphia

From the Philadelphia Evening Bulletin, Macrh 10.] We are gratified to hear of the continued success, in New York, of our townsman, Mr. H. T. Helm-bold, Drnggist. His store, uext to the Metropolitan Hotel, is 28 feet front, 230 feet deep, and five stories

in height. It is cortainly a grand establishmont, and speaks favorably of the merit of his articles. He re-tains his Office and Labratory in this city, which are also model establishments of their class.

The proprietor has been induced to make this statement from the fact that his remedies, although advertised, are

GENUINE PREPARATIONS.

And, knowing that the intelligent refrain from using any thing pertaining to Quackery, or the Pateut Medicine order--most of which are propared by self-styles Doctors, who are too ignorant to read a phy-sician's simplest prescription, much less competent to prepare pharmaceutical preparations.

to various means of effecting sales, such as copying parts of advertisements of popular remedies, and finishing with certificates.

The Science of Medicine stands SIMPLE, PURE, and MAJESTIC,-having Fact for its Basis, Induc-tion for its Pillar, Truth alone for its Capitol.

A WORD OF CAUTION.

Health is most important; and the afflicted should not use an advertised medicine, or any remedy, unless its contents or ingredients are known to others besides the manufacturer, or until they are satisfied of the qualifications of the party so offering.
