

Farm, Garden & Kitchen

TEETH OF A HORSE.

At five years of age the horse has forty teeth—twenty-four molar or jaw teeth, twelve incisor or front teeth, between the molars and the the incisors, but usually wanting in the mare.

At birth, only the two nippers or middle incisors appear.

At one year old the incisors are all visible on the milk set.

Before three years, the permanent nippers have come through.

At four years old, the permanent dividers next to the nippers are out.

At five the mouth is perfect, the second set of teeth having been completed.

At six the hollows under the nippers called the mark, has disappeared from the nippers, and diminished in the dividers.

At seven the mark has disappeared from the divider, and the next teeth, or corners, are leveled, though showing the marks.

At eight the mark has gone from the corners, and the horse is said to be aged.

After this time, indeed, good authorities say after five years the age of a horse can only be conjectured. But the teeth gradually change their form, the incisors becoming round, oval, and then triangular. Dealers sometimes bishop the teeth of old horses, that is, scoop them out to imitate the mark, but this can be known by the absence of the white edge of enamel which always surrounds the real mark, by the shape of the teeth, and other marks of age about the animal.—*Rural Gentleman.*

To Wash Lawn and Muslin.—Delicate lawn and muslin dresses are so frequently spoiled by bad washing, the colors of the fabrics yielding so readily to the action of soap, that it is better to adopt a method of cleaning the finest materials, and imparting to them the appearance of newness. Take two quarts of wheat bran, and boil it for half an hour in soft water. Let it cool, then strain it, and pour the strained liquor into the water in which the dress is to be washed. Use no soap. One rinsing alone is required, and no starch. The bran water not only removes the dirt and insures against change of color, but gives the fabric a pleasanter stiffness than any preparation of starch. If the folds are drawn from the skirts and sleeves the dress will iron better; and will appear, when prepared in this way, as fresh as new.

How to Preserve a Bouquet.—When you receive a bouquet, sprinkle it lightly with fresh water; then put in a vessel containing soap suds; this will neutralize the stem and keep the flowers as bright as new. Take the bouquet out of the water every morning and lay it sideways (the stem entering first) into clean water, keep it there a minute or two, then take it out and sprinkle the flowers lightly by the hand with water; replace it in the soap suds, and it will bloom as fresh as when gathered. The soap suds need changing every three or four days. By observing these rules a bouquet may be kept bright and beautiful for at least a month, and will last still longer in a very passable state; but attention to the fire creatures, as directed above, must be observed, or all will perish.

Chicken Stewed with New Corn.—Cut up the chicken as for pies, season them well, have green corn cut off the cob, put a layer of chicken in the bottom of a stewpan and a layer of corn, and so till you fill all in; sprinkle in salt, pepper and parsley, and put a piece of butter in; cover it with water and put on a crust with slits cut in it; let it boil an hour; when done, lay the crust in a deep dish. Dip out the chicken and corn and put it on the crust, stir in the gravy, a thickening of milk and flour; when this boils up, pour it in with the corn and chicken. Chicken and corn boiled together in a pot make a very nice soup with dumplings.

Fire Proof Wash for Shingles.—A wash composed of lime, salt, and fine sand or wood ashes, put on in the ordinary way of white-washing, renders the roof fifty per cent more secure against taking fire from falling cinders, in case of a fire in the vicinity. It pays the expense a hundred fold in its preserving influence against the effect of the weather. The older and more weather-beaten the shingles, the more benefit derived.

When we want to destroy perennial weeds, one of the most effectual methods we can adopt for doing so, is cutting the leaves and stems close to the ground, and keeping them down by the frequent use of the scythe or hoe; yet we expect grass to be an exception to all other plants, for we feel disappointed when a meadow which has been mowed in the heat of summer and grazed closely in the fall, does not yield a full crop the ensuing year.

Milk Biscuit.—Take six large white potatoes, boil them and mash them through a colander, with a quart of hot milk. Stir in enough flour to make a stiff sponge, add a teaspoonful of salt, the same of sugar, and a teaspoon of yeast. Set it to rise three or four hours, when light take a ½ lb of butter, rubbed in flour and throw on the sponge with sufficient flour to make a soft dough. Cut out when light and let them stand half an hour before baking. Bake twenty minutes.

Reasonable Suggestions.—The following hints are reasonable, and may be true; they are at least worth trying:—Oil of pennyroyal will keep mosquitoes out of a room, if scattered about in even quantities. Roadies are exterminated by scattering a handful of fresh cucumber parings about the house. No fly will light on the window which has been washed with water in which a little garlic has been boiled.

Medical.

AYER'S SARSAPARILLA.
The peculiar kind of skin eruptions which we call Scrofula lurks in the constitutions of multitudes of men. It either produces or is produced by an enfeebled, vitiated state of the blood, wherein that fluid becomes incompetent to sustain the vital forces in their vigorous action, and it leaves the system to decay. The scrofulous contamination is variously caused by mercurial disease, low living, disordered digestion from unhealthy food, impure air, filth and filthy habits, the depressing influence of the system by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending from parents to children unto the third and fourth generation; indeed, it seems to be the root of many evils, "I will visit the iniquities of the fathers upon their children." The diseases it originates take various names, according to the organs it attacks. In the lungs, Scrofula produces tubercles, and finally Consumption; in the glands, swellings which suppurate and become ulcerous sores; in the stomach and bowels, derangements which produce indigestion, dyspepsia, and liver complaints; on the skin, eruptive and cutaneous affections. These, all having the same origin, require the same remedy, viz., purification and invigoration of the blood. Purify the blood, and these dangerous distempers leave you. With feeble, foul, or corrupted blood, you cannot have health; with that "life of the flesh," healthy, you cannot have scrofulous disease.

AYER'S SARSAPARILLA.
is compounded from the most effectual antidotes that medical science has discovered for this sifting distemper, and for the cure of the disorders it entails. That it is far superior to any other remedy yet devised is known by all who have given it a trial. That it does combine virtues truly extraordinary in their effect upon this class of complaints, is indisputably proven by the great multitude of publickly known and remarkable cures it has made of the following diseases: King's Evil, or Glandular Swellings, Tumors, Eruptions, Pimples, Blisters and Sores, Erysipelas, Rose or St. Anthony's Fire, Salt Rheum, Scald Head, Coughs from tuberculous deposits in the lungs, White Swellings, Debility, Dropsy, Neuralgia, Dyspepsia or Indigestion, Syphilis and Syphilitic Infections, Mercurial Diseases, Female Weaknesses, and indeed, the whole series of complaints that arise from impurity of the blood. Minute reports of individual cases may be found in AYER'S AMERICAN ALMANAC, which is furnished to the druggists, for gratuitous distribution, wherein may be learned the directions for its use. Hence it is the remarkable cures which it has made when all other remedies had failed to afford relief. These cases are purposely taken from all sections of the country, in order that every reader may see access to some of the personal experience. Scrofula depresses the vital energies, and thus leaves its victims far more subject to disease and its fatal results than are healthy constitutions. Hence it tends to shorten, and does greatly shorten, the average duration of human life. The vast importance of these considerations has led us to spend years in perfecting a remedy which is adequate to its cure. This we now offer to the public under the name of AYER'S SARSAPARILLA, although it is composed of ingredients, some of which exceed the best of Sarsaparilla in alterative power. By its aid you may protect yourself from the suffering and danger of these disorders. Purge out the foul corruptions that rot and fester in the blood, purge out the causes of disease, and vigorous health will follow. By its peculiar virtues this remedy stimulates the vital forces, and thus cures the distempers which lurk within the system or burst out on any part of it.
We know the public have been deceived by many compounds of Sarsaparilla, that promised much and did nothing; but they will neither be deceived nor disappointed in this. Its virtues have been proven by abundant trial, and there remains no question of its surpassing excellence for the cure of the sifting disease it is intended to remedy. Although under the same name, it is a very different medicine from any other which has been before the people, and is far more effectual than any other which has ever been available to them.

AYER'S CHERRY PECTORAL,
The World's Great Remedy for Coughs, Colds, and Consumption, and for the relief of Consumptive patients in advanced stages of the disease.
This has been so long used and so universally known, that we need not now assure the public that its quality is kept up to the best it ever has been, and that it may be relied on to do all it has ever done.
Prepared by Dr. J. C. AYER & Co., Lowell, Mass.
Sold by all druggists every where.
For sale by Bannell & Barnette, and Lyman & Wells, Tunkhanock; Sterling & Son, Meshopotam, Stevens & Akeley, Lawrenceville, Fryer, Dean & Co., Paoli, Pa. and all Druggists and Dealers in medicines, everywhere.
MANHOOD: How Lost, How Restored.
Just published, a new edition of Dr Culverwell's Celebrated Essay on the radical cure (without medicine) of Spermatorrhoea, or Seminal Weakness, Involuntary Emission, Impotency, Mental and Physical Incapacity, Impairments to Marriage, etc.; also Consumption, Epilepsy, and Fits; induced by self-indulgence or sexual extravagance.
The celebrated author, in this admirable essay, clearly demonstrates from a thirty years successful practice, that the alarming consequences of self-abuse may be radically cured without the dangerous use of internal medicine, or the application of the knife—pointing out a mode of cure at once simple, certain, and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately, and radically.
This Lecture should be in the hands of every youth and every man in the land.
Sent under seal, to any address, in a plain sealed envelope, on the receipt of six cents, or two postage stamps. Also Dr. Culverwell's "Marriage Guide," price 25 cents. Address the publishers,
CHAS. J. CLINE & CO.,
