Stamps on Notes.
A week or two since we published what purported to be a decision in reference to stamps on judgment notes.

We would recommend all who want the genuine "Mishlers Bitters" to go to Dr. Rhoads' Drug Store.

It is generally conceded by all who have an eye out for bargains, that he keeps the largest and best assortment of Drugs, Medicines, Perfumery, Tobacco, Segars, Stationery and all other articles pertaining to the trade.

You will also find a new and large stock of clothing, we have just been getting made, expressly for this market, and you will agree with us when you examine it, and say it is well made, and the styles just please.

Our young men have got to work in earnest in the matter of this ancient, though greatly, modernized and popularized athletic game.

The first regular game of the club was played on Saturday last, between some of the leading members and a picked nine, which resulted in the triumph for the Pick-wickians, as will appear by the annexed score of the game which has been handed us for publication.

Almost everybody knows how to play the old fashioned round staves base ball of our school boy days—but few however, understand the modern game.

For the benefit of the uninitiated an explanation of the letters appended to names of the different players may be necessary to indicate their positions in the game.

How to stop the flow of blood.—Housekeepers, mechanics and others, in handling knives, tools and other sharp instruments, frequently receive severe cuts, from which blood flows profusely and often endangers life itself.

Another Counterfeit.—A new and dangerous counterfeit—national currency—of the denomination of five dollars, has just been put in circulation, which will surely mislead careless handlers of money, and even the careful, without close observation.

On the left of the note, the wrist of the left arm of Columbus is scarcely visible, whereas in the genuine it is distinct.

At the top, read "This note is secured by bonds." The letters "b" and "y" are not far apart; and the "o" in bonds is under the "y" whereas the "b" in the same word is immediately under the "y" in the genuine.

Thomas' Patent Atmospheric CHURN DASH. Patented May 7th, 1867. The most Important and Valuable Invention since the 19th Century.

1. The Dash is superior to any other, by being as simple as the old dasher, and combining the atmospheric principle therewith, and the Dasher dasher.

2. It is superior to all others, inasmuch as the same power applied to this like mechanical operations will make one-fourth more repetitions.

3. It is superior to all others, inasmuch as it produces in a much shorter time.

4. It is superior to any other, inasmuch as it produces a much better quality of butter.

5. It is well known to Dairywomen and others, that Butter is contained in minute globules or sacs covered with a membrane, and requires the action of air to prepare the covering to be removed by friction.

6. The above Patent Dasher has been purchased for Sussuhanna, Wyoming and Luzerne Counties by A. P. Baldwin, of Montrose. The process of churning can be seen in exhibition at Wall's Hotel in Tunkhannock, for a few days by Mr. Reynolds, agent, who will sell township rights.

RAIL ROAD CO. THEIR FIRST MORTGAGE BONDS As an Investment.

The rapid progress of the Union Pacific Railroad now building west from Omaha, Nebraska, and for the Pacific to the west coast of the continent, across the continent, attracts attention to the value of the First Mortgage Bonds which the Company now offers to the public.

1st. The early completion of the whole great line to the Pacific is certain as any future business even to the Government grant of over twenty million acres of land and fifty million dollars in its own bonds practically guaranteed within a month of the work is already done, and the track continues to be laid at the rate of two miles a day.

2d. The Union Pacific Railroad bonds are issued upon what promises to be one of the most profitable lines of railroad in the country. For many years it must be the only line connecting the Atlantic and Pacific; and being without competition, it can maintain remunerative rates.

3d. The Union Pacific Railroad bonds can be issued only as the market progresses, and therefore can never be in the market unless they represent a bona fide property.

4th. Their amount is strictly limited by law to a sum equal to what is granted by the U. S. Government, and for which it takes a second lien as its security. This amount is the \$17,000,000 now granted from Omaha is only \$16,000,000 per cent.

5th. The fact that the U. S. Government considers a second lien upon the road a good investment, and that one of the shortest railroad builders of the country have already paid in five million dollars upon the stock (which is to them a third lien), may well inspire confidence in a first lien.

6th. Although it is not claimed that there can be any better securities that Governments, there are parties who consider a first mortgage upon such a property as this the very best security in the world, and who will sell their Government bonds to invest in these bonds—thus securing a greater interest.

7th. As the Union Pacific Railroad bonds are offered for the present at 90 cents on the dollar and accurate interest, they are the cheapest security in the market, being over 15 per cent. less than U. S. Stocks.

8th. At the current rate of premium on gold, they pay Over Nine per Cent. Interest.
