

Local and Personal.

Radical Restoration.

Its good effects are permanent. It not only restores the color of the hair, but the quantity and natural glossiness. This is said by every one using Mrs. S. A. ALLEN's Improved (new style) Hair Restorer or Dressing, (in one bottle,) Every Druggist sells it. Price One Dollar.

Trade Fair.

The attention of our readers is called to the adjournment of the Trade Sale or Fair at Nicholson, connected with which there is to be, in the language of the witty Jos Billings, a pure "agricultural hoss trot."

Read the advertisement—The idea is a good one.

S Revenue Assessor.

The duties of the two U. S. Internal Revenue Assessor for this county were thought to be too arduous, for two men. Mr. Benjamin Newman, has therefore been relieved of his port folio. Avery, who is supposed to be the most loyal to Andy, takes both the black books and all the pay,

Change of Proprietors.

The corner Grocery-store, opposite our office has changed hands, Mr. B. M. Stone, who recently purchased the interest of Mr. Stimples, proposes to fill up with a full stock of family groceries and provisions. He designs also to keep up a first class Oyster Saloon and Restaurant—without the lager-and to furnish the trade with oysters in any quantity desired.

His advertisement will appear in our next issue.

Tannery Burned.

The new Tannery buildings of Pratt & Bro. at Nicholson, in this county were entirely destroyed by fire on Wednesday morning of last week. The fire is supposed to have originated from the engine connected with the buildings. A large stock of leather which had just been finished up for the N. Y. Markets, was destroyed. The loss is estimated at about \$20,000, but a very small portion of which was covered by insurance. This is the second total loss of buildings this enterprising firm has suffered within two years.

Pole Raising at Falls.

The Democrats of Falls, Exeter and Overfield, met at the Falls, on Friday last, and after raising a neat hickory pole, and hoisting the flag of the whole union, listened to congratulatory speeches from Hon. J. V. Smith and Wm. M. Piatt. The editor of the Democrat was called for and made a few remarks on the subject of newspapers. A subject on which he is supposed to be more prolific than agreeable. The meeting, considering the shortness of notice, was well attended. Of course the utmost harmony and best of feeling prevailed.

Runaways.

"Gravel hill" seems fond of equestrian excitement. On Wednesday last, a horse attached to a sulky ran up Warren St., until arrested by one of the charming maids; nobody hurt except sulky and harness!

On Saturday one of Dan'l Wright's teams ran from the new Presbyterian Church down Putnam St. and, in attempting to make a turn toward the Tannery, came in contact with Mr. Flickner's house, and both horses were considerably injured.

Who Shall Decide?

In a local item last week we noticed a new burning fluid recently introduced by Dr. J. W. Rhoads of this place. The Dr. assured us, when he filled our lamps with it that its non-explosive quality was one of its greatest virtues, and told us that we could assure our readers of that fact. We were not so emphatic on this point as the Dr.—not having had sufficient time to fully test it personally—we simply stated what was claimed for it—and, in corroboration, that we had not, at the date of writing, been blown up, by it.

The satirical note received from Dr. E. H. Wells, purports to give more light on this subject; the importance of which, requires that it should be fully ventilated—or illuminated. We will not presume to decide when Doctors disagree, but will only say, that people cannot be too careful in regard to the kind of fluids or oils used.

Mr. Editor:

Your last number contains a notice of "a newly invented burning fluid"—enumerating some of its properties &c. For the benefit of whom it may concern, I wish emphatically to deny one of its claims, viz: non-explosiveness. In so doing, I am actuated only by a sense of duty, and claim to know whereof I affirm.

The basis of the "fluid" is Benzine. And any one having the slightest knowledge of the chemical properties of this article, will tell you that it is highly explosive. The test of lighting the fluid at the open mouth of a bottle does not disprove this statement.—The "oil" must be confined, then the heat will generate a gas, which, if ignited is terribly destructive in its effects. It is indeed possible that the article under consideration may be used for a long time, without accident. Nevertheless the treacherous gas will lurk in every burning lamp, awaiting only a spark to become a destructive agent. And it is affirmed that nine tenths of the lamp-explosions we hear of, occur from the use of compounds containing Benzine or Gasoline, similar to the above.

All who are willing to run the additional risk for the trifling difference in cost, are at liberty to do so. As to the preparation being new, we have only to say that many of the same sort have been tried and abandoned from time to time, for several years past. In a country where law is occasionally ignored, it may be needless to remark that persons selling any of these illuminating compounds which do not bear the fire test of a Government Inspector, lay themselves liable to heavy penalties.

E. H. WELLS, M. D.

Mrs. Partington Insulted.

The White Mountains of New Hampshire are evidently a great institution—very high heavy frost, beautiful view, four dollar diners. But the practical eye of a certain renowned Drake saw those smooth faced rocks, and therupon adorned and variegated the bridge path to the Tip Top House with his familiar S. F.—1860—X. Plantation Bitter. This raised the ire of Mrs. Partington composing the Legislature of the Granite State, who got their wise heads together, outlawed Dr. Drake, and make it a penal offense to ply the grisly brush on their beloved hills. Verily, the fine arts are at a discount in New Hampshire. Query.—Did Drake pay them for this splendid advertisement?

Almost a Fire.

On Thursday evening last shortly after candle light our towns people were aroused by the startling cry of fire! fire!! fire!!! Everybody rushed into the streets—but as our enterprising "city papa" had not provided street lamps, and as no friendly light appeared, it was impossible to find the fire. After rushing wildly around the streets for some time, some one suggested that the fire might be at Gearhart & Co's Foundry. Thither ran the excited crowd, and arrived just in time, to be too late. Clint, who keeps a close watch for accidents of this kind, had anticipated the "ingings" and with a bucket or two of water had extinguished one of the prettiest little fires imaginable, which had got finely kindled on the roof of the machine shop. Of course everybody was very agreeably disappointed while groping their way home, through the dark.

Base Ball.

The second match game of B. B. between the club at this place and the Wyomings of Factoryville was played at this place on Saturday last, and resulted in a most decided triumph for the Tunkhannocks. The game was witnessed by quite a large number of persons. Darkness coming on, prevented playing the 9th innings. Both clubs were escorted from the grounds by the Brass Band, to Wall's Hotel, where supper was prepared for the guests. The following is the score of the game.

Tunkhannocks. Wyomings.
