Valentines, -- Attention is called to the advertisement of Valentines by Underhill & Campbell, wholesale and retail dealers in Books, Stationery Wall-paper, &c., at Scranton. This being leap-year, custom allows, or rather encourages the wearers of water falls and crinoline to tie love-knots with which to entangle the "opposition" in the matrimonial harness-never more to kick out of the traces. And as they are both modest and sly--rather on the "Rarey" plan, in their operations, there will no doubt be a great demand for those suggestive, tender, and anonymous missives, yelept, "Valentines." It contains all the reconstruction acts of Congress-up to the present time- with the Veto Messages of the Presient the returns of the several State Elections, by counties, for 1867 and previous years, and other very valuable information which we have not time now

MR, EDITOR :

Some two weeks ago you published a letter from here signed "B" and as it has not been replied toooaly from the pulpit, at Stark's Church, by our State Lecturer, Rev. "Gentleman" use uch epithets. Our Lodge has it under consideration to vote him a leather medal-that the good people of the State may know that he is no hypote, but a Christian minister of the first water .-We may have some trouble passing the resolution through the Lodge, as "our Minister" and brother N. wants "B" wiped out, and our "Worthy Chief' not being competent to reply to "B's" communication, may take strong ground against it. Explosive Burning Fluids .-- MR. EDITOR :-The following extracts from an article in the Jan. number of the Boston Journal of Chemistry are from the pen of Dr. Jas, R. Nichols, and deserve attention. "The accidents reported as kerosene-lamp explosions have become fearfully frequent of late .-No less than nine (several attended with fatal consequences) have fallen under our notice since the last issue of the Journal. This is a sad state of things; and when we remember they must all have occurred through the use of fraudulent liquids, we can but regard them as casualties which ought not to have happened. * * We think it fair to infer, from information given, that nearly one half the liquids used in the country are fraudulent and dangerous. A class of scoundrels are traveling about the country selling recipes for making cheap, inexplosive burning oils. They are called "Eureka." "Carbon" or "Crystal" oils; here are the directions for one of these. "Take 1 oz. camphor, 21 ozs. oil of spruce, & oz. alkanet root; dissolve and mix all together in one gallon of benzine stirring well for Sold by all Druggists. 10 minutes; then pour it into a barrel (40 gallons) of benzine; stir till a ell incorporated and it is fit fo In matter of the sale of real estate of Geo. W. Camphor is a combustible body and burns with a Court granted rule to show cause why order clear white light. Its solution in benzine or naptha

use." This mixture is essentially the same as has been sold under various names for several years .confers no desirable qualities; as the flame of benzine when burned with free access of air, is white and brilliant enough without it. It neither increas es or diminishes the dangerous nature of benzine .-The oil of spruce is added to cover or change the odor of the liquid : the alkanet root to color it. Here we have a full exposure of the fraud. Is it not detestable? Any family using this or liquids of a kindred nature, are jeopardizing their lives constantly. The risk is a fearful one:

We wish to state what " we think" of the man engaged in making or vending such liquids. He is a dangerous impostor; and wherever he appears or any one else, selling cheap oils, or recipes for making them, have the parties arrested at once. A person off:ring for sale mixtures of naptha or benzine Geo. Lull, on motion and filing written consent of infishmeable at less temperature than 110 deg F, can be, under U. S. revenue law, punished by fine and imprisonment.

We cannot reply to our kerosene correspondents individually. 1. Let it be understood that there is no substance or number of substances, known to chemists, which can be added to benzine, gasolene or naptha, capable of rendering them safe, without destroying their combustibility or illuminating prop erties. 2. All illuminating oils offered for sale at less than a fair market price for standard kerosene, should be looked upon with suspicion. 3. Do not be deceived by charlatans who, to prove the safe character of their oils, thrust lighted tapers or matches into lamps or into the vapor. The vapor of these liquids must be mixed with atmospheric air in order to explode. It is difficult to secure the right condi-Gay appointed guardians of Alice, Caroline, Rachael | tions for explosive action. We have often repeated an experiment a dozen times before we rould secure the right mixture. If it were otherwise, a thousand a ceidents would occur where there is now but one. Many of the "explosious" reported we have found upon investigation not to be accidents of that nature.

UP. HALL & CO. Nashua, N. H., Proprietors. On petition of guardian of minor children, sale o On petition of Jane Peckham-rule granted on The injury inflicted was caused by the inflammable C. M. Manville why he shall not give security in nature of the liquid, which, through breakage of the lamp or spilling, had fallen upon clothing or furniture, and in an ignited condition. There is as much, perhaps more, to fear from the easily inflammable character of light oils, than from the explosion of air-mixed vapors. They are dangerous, however in every aspect, and should not be harbored in fami-

lies for a single instant. Any one indebted to the late firm of Wheelock Lana is requested to make immediate settlement Books may be found with E Wheelock at Tunkhannock.
