HAYMAKING.

There is annually so much good grass mercilessly manslaughered in making it into hay, that it becomes the duty of every publisher, editor and agricultural writer in the land, happening to have a better practical knowledge of haymaking, to begin, with the hay season, preaching as earnestly as they can, at every opportunity, better principles until a radical reform in much of our baymaking practice shall have been achieved. As clover usually comes first in the routime of haying, and the season for putting mowers afield is close at hand, let us bear in mind that the best standing condition of clover is when the plant itself is fully developed, and the heads in full but early bloom, before any considerable proportion of them have assumed the slightest tinge of brown. Then instead of being roasted, broiled and baked, in the scorching sun until it is as black as Japan tea, as is too frequently the case with clover hay the best plan is to cut after the dew is off in the morning, cure and spread in the swath, as much as can be done in five or six hours of clear drying weather, then twenty four the MORNING TRAIN from New York conhours more in small cocks, sheltering from nects at MANUNKA CHUNK with the train leaves of clear drying weather, then twenty four

should be cocked after a few hours sun curing, finished off in the cock, cured but not in the least crisped, and hauled in while still green in color, elastic and possessed of all the green in color, elastic and possessed of all the inviting aroma of "new mown hay." If the foundations of bays and stacks are made up well clear of ground affording full and free ventilation underneath, and then in stacking or stowing away, a layer of clean straw, say six inches in depth, is placed every two feet below.

a train for Philadelphia, Easton, Trenton, and intermediate stations, arriving in Philadelphia at 5.00 p. m., and at New Hampton with a train for Easton. Bethlehem, Allentown, Reading and Harrisburg at 8.30 p. m.

At SCRANTON, connections are made with trains on the Lackawaman and Bloomsburg Railroad, and on the Delaware and Hudson Canal Co.'s Railroad, Time Tables of which roads are printed below. six inches in depth, is placed every two feet between the courses of hay, there will be no danger of clover or any other grass heating, moulding or rotting, though put away a great deal greener than is general practice, and infinitely better hay will be the result.

CHEWING THE CUD.

Ruminating animals gather their food rapidly, give it a few cuts with the teeth, and swallow it. It goes to an interior receptacle where it is moistened; this is very essential if it be dry hay.

When the annimal has filled himself, he masticates the food thus stored away in his stomach, raising it cud by cud. When a por- Best make tion is completely masticated it passes to an other receptacle and the progress of digestion A full stock of goes on.

Thus, an ox, if left by himself, will raise and masticate all his food thus stored away Balmoral, Congress, Polish Boots of Glove in his stomach. If he be pushed and worked hard, and does not have time to masticate; he Button Gaiters. falls off in flesh, his health is poor, his diges tion is incomplete.

The horse, on the contrary, however much in a hurry he may be, must masticate each and MITTENS. mouthful before he swallows it. A hungry ox let into a meadow will fill himself in twen ty minutes, while a horse would want at least an hour and twenty minutes to take the same amount of grass.

The ox, deer, sheep, goat, chamois, and rabit, being the natural prey of ferocious beasts, are endowed with the extra stomach in which hastily to store away the food with out mastication; this may perhaps be regarded as a wise provision of nature, enabling them to sally forth where the food is plenty and in a short time fill themselves and retire to a place of safety to ruminate their food at their leisure .- Mirror and Farmer.

Horace Greeley says in his "Recollections :"

"The woods are my special department .-Whenever I can save a Saturday from the farm I try to give a good part of it to my patch of forest. The axe is the healthiest instrument that a man ever handled, and is essentially so for habitual writers and other secondary workers whose shoulders it throws back, expanding their chests and opening their lungs. If every youth and man, from fifteen to fifty years old, could wield an axe two hours per day, dyspepsia would vanish from the earth, and rheumatism become decidedly scarce, I am a poor chopper, yet the axe is my doctor and delight. Its use gives the mind just occupation enough to prevent it falling into a reverie of absorbing trains of thought, while every muscle in the Mrs. Charlie Bunnell exercise. I wish our boys would learn to love the axe.

GARDEN PATHS .- Nothing makes better garden paths than coal ashes; they are of more value for that purpose than any other they can be applied to. Where the path requires it dig it out two or three inches-pu the coarsest ashes at the bottom and the finest at the top to the depth of from four to six inches, and then roll well. Paths made in this way are always dry and pleasant to the feet, and are seldom troubled with weeds.

Peultry Houses .- Eggs, and hens too will be scarce, if the poultry house is infest. ed with vermin. Pour boiling water over RAPER HANGINGS! the roofs, and indeed, into every crack of the building, if you can, then wash clean with strong soap suds, and when this is dry, whitewash the whole.

Catch the fowls and rub a little grease under the wing, on the head, and touch various places on the body with it. The fowls will A Large Variety amply repay you for keeping their houses scrupulously clean.

done promptly and well.

THE peculiar taint of infection which we call Scroftla lurks in the constitutions of multitudes of men. H either produces or is produced by an en-feebled, vitiated state

decay. The scrofulous contamination is variously caused by mercurial disease, low living, disordered digestion from unhealthy food, impure air, filth and filthy habits, the depressing vices, and, above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children." The diseases it originates take children. The diseases it originates take various names, according to the organs it attacks. In the lungs, Scrofula produces tulercles, and finally Consumption; in the glands, swellings which suppurate and become ulcerous sores; in the stomach and bowels, derangements which produce indication, despension, and liver complaints; on bowels, derangements which produce indi-gestion, dyspepsia, and liver complaints; on the skin, eruptive and cutaneous affections. These, all having the same origin, require the same remedy, viz., purification and invigora-tion of the blood. Purify the blood, and these dangerous distempers leave you. With feeble, foul, or corrupted blood, you cannot have health; with that "life of the flesh" healthy, you cannot have scrofulous disease. Aver's Saraanprilla. Ayer's Sarsaparilla

is compounded from the most effectual anti-dotes that medical science has discovered for this afflicting distemper, and for the cure of the disorders it entails. That it is far supe-rior to any other remedy yet devised, is known by all who have given it a trial. That it does combine virtues trif, extraordinary in their effect upon this class o. "omplaints, Evil. or Glandular Swellings, Tumors, Eruptions, Pimples, Blotches and Sores, Erysipelas, Rose or St. Anthony's Fire, Salt Rheum, Scald Head, Coughs from tuberculous deposits in the lungs, White Salt Rheum, Scald Head, Coughs from tuberculous deposits in the lungs, White Swellings, Debility, Dropsy, Meuralgia, Dyspepaia or Indigestion, Syphilis and Syphilitic Infections, Mercurial Diseases, Female Weaknesses, and, indeed, the whole series of complaints that arks from impurity of the blood. Minute reports of individual cases may be found in Aven's Americas Almanac, which is furnished to the druggists for gratuitous distribution, wherein may be learned the directions for its use, and some of the remarkable cures which it has made when all other remedies had failed to filled relief. Those casess are purposely taken from all sections of the country, in order that every reader may have access to some one who can speak to him of its benefits from personal experience. Scrofula depresses the vital energies, and thus leaves its victims to more subject to disease and its fatal result than are healthy constitutions. Hence a tends to shorten, and does greatly shorted the average duration of human life. The vast importance of these considerations had led us to spend years in perfecting a reme; which is adequate to its cure. This we now offer to the public under the name of Aven's Sarsaparilla, although it is composed of ingredients, some of which exceed the less of Sarsaparilla in alterative power. By its aid you may protect yourself from the suffering and danger of these disorders. Purge aid you may protect yourself from the sufer-ing and danger of these disorders. Purge out the food corruptions that not and fester in the blood, purge out the causes of disease, and vigorous health will follow. By its peculiar virtues this remedy stimulates the vital functions, and thus expels the distempers which lurk within the system or burst out

on any part of it.

We know the public have been deceived by many compounds of Sarsoparilla, that promised much and did nothing; but they will neither be deceived nor disappointed in this. Its virtues have been proven by aluminating and there remains no enestion of dant trial, and there remains no question of its surpassing excellence for the cure of the afflicting diseases it is intended to reach. Although under the same name, it is a very different medicine from any other which has been before the people, and is far more ef-fectual than any other which has ever been available to then

AYER'S CHERRY PECTORAL, Coughs, Colds, Incipient Con-

sumption, and for the relief of Consumptive patients in advanced stages of the disease. This has been so long used and so universally known, that we need do no more than assure the public that its quality is kept up to the best it ever has been, and that it ay be relied on to do all it has ever done.

Prepared by Dr. J. C. Aves & Co.. Practical and Analytical Chamiltonial Lowell, Mass. Sold by all druggists every where. For sale by Bunnell & Bannatyne, and Lyman & Wells, Tunkhannock, Sterling & Son, Meshoppeu Stevens & Ackley, Laceyville, Frear, Dsan & Co.
