O. L. Hallstrad Esq.—Dear Sir; I have used and otherwise tested the WYOMING METALLIC PAINT, and am clear of the belief that it is superior to any other Mineral Paint in the country. It has a good color and mixes readily; but its strong and best features are its heavy substantial body, combined with an extremely oily nature, in consequence of which it requires at least a third less oil than any other paints in use.

Ayer's Cherry Pectoral,

For Diseases of the Throat and Lungs, such as Coughs, Colds, Whooping Cough, Bronchitis, Asthms, and Consumption.

Probably never before in the whole history of medicine, has anything won so widely and so deeply upon the confidence of mankind, as this excellent remedy for pulmonary complaints. Through a long series of years, and among most of the races of men it has risen ligher and higher in their estimation, as it has become better known. Its uniform character and power to cure the various affections of the lungs and throat, have made it known as a reliable protector against them. While adapted to milder forms of disease and to young children, it is at the same time the most effectual remody that can be given for incipient consumption, and the daagerous affections of the throat and lungs. As a provision against sudden attacks of Croup, it should be kept on hand in every family, and indeed as all are sometimes subject to colds and coughs, all should be provided with this antidote for them.

Although settled Consumption is thought incurable, still great numbers of cases where the discase seemed settled, have been completely cured, and the patient restored to sound health by the Cherry Pectoral. So complete is its mastery over the disorders of the Lungs and Throat, that the most obstinate of them yield to it. When nothing else could reach them, under the Cherry Pectorat they subside and disappear.

Singers and Public Speakers find great protection from it.

Asthma is always relieved and often wholly cured by it.

Ayer's Ague Cure,

For Fever and Ague, Intermittent Fever, Chill Fever, Remittent Fever, Dumb Ague, Periodical or Bilious Fever, &c., and indeed all the affections which arise from malarious, marsh, or missmatic poisons.

poisons.

As its name implies, it does Cure, and does not fall. Containing neither Arsenic, Quinine, Bismuth, Zine, nor any other mineral or poisonous substance whatever, it in nowise injures any patient. The number and importance of its cures in the ague districts, are literally beyond account, and we believe without a parallel in the history of Ague medicine. Our pride is gratified by the acknowledgments we receive of the radical cures effected in obstinate cases, and where other remedies had wholly falled. Unacclimated persons, either resident in, or travelling through minsmatic localities, will be protected by taking the AGUE CURE dally.

McKown respectfully announces to the people H Wyoming County, that he has made a specialty of ofEAVY SILVER PLATING, for years. Heavy plaiting is much more economical than light. The more Silver put on the goods, the cheaper it is done in proportion to the amount of Silver used. Spoons and Forks, should not be of less than 16 or plate—36 or 48 oz. would be far more economical. Yet 4 oz plate is called a good plate by the trade; and poor as it is, but a small portion of all the goods made come up to this standard. "Ounce plate," in platers language, means the number of ounces of silver, to the gross of table spoons. All other surfaces are estimated by these. For example, desserts are estimated by these. For example, desserts are estimated at 3-4; and tea spoons at 1-2 the surface of table-spoons. Sixteen oz. plate is 16 ots, of fine silver to the gross of table-spoons or form of the silver of the gross of dessert spoons. This quality of plate will cost, on the azerage, twice as much as 4 oz. and will have four times the amount of silver on it. Thirty-six oz: plate will cost about three times as much as 4 oz, and will contain nine times the amount of silver on it. Thirty-six oz: plate will cost about four times as much as 4 oz, and will contain nine times the lightes that will allow the engraving on it, of naine or initials, without cutting through unto the metal beneath. Forty-eight oz plate will cost about four times as much as 4 oz, plate, and will contain 12 times the amount of silver. This plate costs about one-half as much as solid silverware of ordidinary weight, and for every day use will be more durable than light, solid silverware. Most of the solid silverware is made much too light to be durable in constant use. The terms "double." "treble" &c.
