# farm Gardn & Bitchen.

Farmers, and Agricultural men generally are requested to contributed to this Department, as it is from their experience that we hope to gain somehiing of interest for our readers.

The fences in the United States, have cost more than all the farms and farm stock are worth.

To REMOVE FRECKLES .- Dissolve one ounce of alum in one ounce of lemon juice and one pint or rose water; keep in a wellcorked bottle. Use as a wash three times daily until removed

To Soften HARD WATER .- Dissolve two tablespoonfuls of quick lime in nine quarts of water, and stir this well into a barrel of hard water, and let it stand twentyfour hours.

To PRESERVE CIDER SWEETS-Take two pounds of stoned raisins, one pound mustard seed, quarter pound cinnamon bark well braised, to forty gallons of eider; mix well for a few days: will remain sweet for months.

To CLEAN PLATE. -Take one ounce cream tartar, one ounce alum, one ounce Oswego. table salt and boil in one gallion of water; throw in your plate and boil; when taken out and rubbed dry will look beautiful, and will seldom tarnish.

To RESTORE MILK .- When milk has become turned by heat, it can be made sweet again and perfectly restored by mixing with it a small quantity of carbonate of magnesia.

A strawberry grower in Pennsylvania has come to the conclusion that land is generally made too rich for the production of his delicieous berry. He thiuks crops would be larger if less manure were used.

In plowing down green crops, attach a heavy chain to the front of the plow beam, which drags down the grass, so that it does not choke the plow. In this way it can be plowed down so nicely that one would hardly believe two feet of clover had been turned under.

Well' Sambo, is your master a good farmer?" "Ees sah, he berry good farmer Leave Scranton --he makes two crops in one year!" "How is that Sambo?" "Why, he sells his hay in the fall and make money once-den in de spring he sell all de hides of de cattle that die for want of hay, and dus make money twice.

SUBSTITUTE FOR EGGS .- Snow is an excellent substitute for eggs in puddings and pancakes. Two large spoonfuls will supply the place of one egg, and the article equally good. It should be fresh snow, or under layers if old. The exposed surface loses its ammonia by evaporation very soon after it has falling, and it is the ammonia contained so largely in snow which imparts to it the rising power.

PREPARED SEASONING .- A writer on cook ery gives the following recipe for preparing a delicious seasoning. Place in a paper bag one-quarter of an ounce of thyme, one quarter ounce of bay leaf, one-eighth ounce of majoram, and one-eighth ounce rose mary; put the bag into a moderately heated oven, till the herbs are dry; then mix them in a mortar with half an ounce of nutmegs, half an ounce of clover, a quarter of an ounce of pepper, one- eighth of an ounce of cayenne pepper, pound the whole and press through a hair seive. Keep this by availing themselves of steam power, with improved machinery they are prepared to furnish everything in their line, from salt added; the proportion for mixture to to four ounces of fine salt. One ounce of the spiced salt is sufficient to season three pounds of forcemeat.

FRUIT GROWING,-It is said that many farmers in different sections of the country avoid planting orchards because they well eventually be more fruit raised than a market can under most favorable circumsfance, be found for. These farmers should take a view of the dried fruit trade, or of the canned fruit traffic, and also make themselves accquainted with the wonderful consumption of fresh fruit which prevails in all directions. Thousands of dollars, worth of fruit is now annually sent afar off in good condition, to places which not long ago never received, any all owing to the improved methods of packing, preserving and transporfstion. There can never be too much fruit raised.

THE PROTECTION AND PLANTING OF Forest Trees .-- The time has arrived, when, in many parts of our county, the want of forest trees for the purpose of building fences, fuel, shade; shelter and general effect in the landscape, is being keenly felt. It is therefore, plain enough that in the clearing of farms great care should be taken to leave belts and masses of trees, for, although single trees, and little groups when stripped of the protection of larger masses, may not be able to withstand the elements still those of greater extent eve the most desirable purposes, both for use and ornament. The mania in many regions of country for stripping the whole face of nature of every tree or shrub is so great as to destroy some of the finest effects of the most charming landscape. Would it not be well to use great judgment in deciding what trees should be cut down? The tree, one hundred years in growing, may be cut down in an hour? Then let the the noble and beautiful trees, save when they have to be removed for the purpose of profitable cultivation of the soil, be protected rather than destroyed, and let our young men plant young trees. They will benefit their children if not themselvs, and serve as very expressive momentoes of their usefulness. The snow, nature's evercoat for the soil, is dritted in the absence of shelter from the high winds, andin many instances, in the absence of trees, our crops are laid bare to the biting blasts of winter.

# Aver's Hair Vigor,

For restoring Gray Hair to its natural Vitality and Color.

A dressing which is at once agreeable, healthy, and effectual for preserving the hair. Faded or gray hair is soon restored to its original color with the gloss and freshness of youth. Thin hair is thick-

ened, falling hair checked, and baldness often, though not always, cured by its use. Nothing can restore the hair where the follicles are destroyed, or the glands atrophied and decayed. But-such as remain can be saved for usefulness by this application. Instead of fouling the hair with a pasty sediment, it will keep it clean and vigorous. Its occasional use will prevent the hair from turning gray or falling off, and consequently prevent baldness. Free from those deleterious substances which make some preparations dangerous and injurious to the hair, the Vigor can only benefit but not harm it. If wanted merely for a

### HAIR DRESSING, nothing else can be found so desirable. Containing neither oil nor dye, it does not soil white cambric, and yet lasts

long on the hair, giving it a rich glossy lustre and a grateful perfume. Prepared by Dr. J. C. Ayer & Co., PRACTICAL AND ANALYTICAL CHEMISTS, LOWELL, MASS.

PRICE \$1.00. Sold by C. Detrick, Tunkhannock, Pa, Sterling & Son, Sterlingville, C. C. Berge, Nicholson, Frear, Dean & Co., Factoryville, and all Druggists and Ddalers everywhere.

I you want, Buck & Sterling will supply you at prices that will leave no chance to grumble. RASTMAN'S Water-proof Boots are warranted not to rip, crack, run over. They are just the thing for teamsters, lumbermen and others who are subject to out-door expessure.

Do you want Spring, or Cot Beds, you can find them at Buck & Sterlings', and they won't charge you such prices for them that you can't pfrd by buy.
