OBGANIC WEAKNESS Immediately Oured, and full vigor restored. This distressing affection—which renders life miserable and marriage impossible—is the pen-alty paid by the victims of improper indulgence. Young persons are too apt to commit excesses from not being aware of the dreadful consequences that may ensue. Now, who that un-derstands the subject will pretend to deny that the power of procreation is lost sooner by those falling into improper habits than by those falling into improper habits than by the pru-dent. Besides being deprived the pleasures of healthy offspring, the most sorious and destruc-tive symptoms to both body and mind arise. The system becomes deranged, the physical and mental functions werkened, loss of procreative power, nervous irritability, dyspepsia, palpita-tion of the heart, indigestion, constitutional debility, a westing of the frame, cough, con-gramption, decay and death.
