STONEWARE MANUFACTORY HARRISBURG, PENNA.

THIS well-known Stoneware Manufactory, lately conducted by John Young & Co., has assed into the hands of the undersigned, who will con mue to manufacture and keep on hand a full assor-

This Ware has lately been very much improved in the body and glasing, and is warranted superior in malerial quality and finish to any Stoneoure monufactured in the State, and not surpassed by any made in the United States. Furchasers themselves being the judges. Much of our process is not known to other manulacturers, which give us a decided advantage. Our clays are all obtained in New Jersey and vicinity are selected by a careful agent and chemically prepared, (by one of the oldest Potters in this country,) so as to form a finit body. The glaze is free from all poisonous matter, being composed common Salt and Clay. There is nothing in the glazing hat can injure any one, apple butter or anything else may be kept in it with perfect safety, as there is no poison about it as there is in the common red earthenware.—Milk and butter keep much better in this material than it does in earthen. It does not absorb any part of what may be put into it. All merchants wishing to keep on hand a superior article of Stoneware will send their orders to Harrisburg, and we will warrant it as above. Al orders will be promptly filled and forwarded: for additional information, or price-lists of the Ware address augs-dit STONE WARE.

The many thousands cured at this Institution within the last twelve years, and the numerous important Surgica Operations performed by Dr. J., witnessed by the reporters of the papers, and many other persons, notices o which have appeared again and again before the public, besides his standing as a gentleman of character and responsibility, is a sufficient guarantee to the afflicted DISEASE OF IMPRUDENCE.—When the misguided and imprudent votary of pleasure finds he has imbibed the seeds of this painful disease, it too often happens that an illustrated sense of the part of the series of the part of the part of the series of the part o imprudent votary of pleasure finds he has imbibed the seeds of this painful disease, it too often happens that an ill-timed sense of shame or dread of discovery deters him from applying to those who, from education and respectability can alone befriend nim, delaying till the constitutional symptoms of this herrid disease make their appearance, affecting the head, throat, nose, skin, &c., progressing on with frightful rapidity, till death puts a period to his dreadful; sufferings by sending him to "that bourne from whence no traveller returns." maging the Lock Stitch on both sides of the cloth alike, which cannot be unravelled or pulled out.

They are all made with the highest mechanical skill, and all warranted to work well on all kinds of goods, from the Lightest Fabric to Heavy Leather. In particular, we would call the attention of all to our Family Sewing Machine. It has been manufactured expressly for Family Use, and-has met favor from all. It is so simplified as to render it almost impossible to get out of order, or derange its operations, indeed it is so simple as to astonish one, that ao small a piece of mechanism will sew. Below, we give a description of the different styles of the Weed Patent.

It has a tension on both sides, and carries a large supply of thread on the under spool, The motions are gained by two small cranks that run without perce, tible noise. The two threads are worked in such a manner as never to both pull at the same time, and consequently, little liable to break. The same time, and consequently, little liable to break. The seam is very clastic, and the thread does not break in washing. It will do coarse work better than any cheap machine now in market, as it uses: silk, cotton, or linen with equal facility.
