of London, Parls, Philadelphia and elsewhere, has effected some of the most astonishing cures that were ever known. Many troubled with ringing in the ears and head when asleep, great aervousness, being alarmed at sudden sounds, bashfulness, with frequent blushing, attended sometimes with derangement of miad were cured immediately

TAKE PARTICULAR NOTICE

Dr. J. addresses all those who having injuredthem selves by private and improper indulgences, that seere and solitary habit which rulus both body and mind, un fitting them for eaher business or society.

These are some of the sad and melancholy effects produced by early habits of youth, viz: Weakness of the Back and Limbs, Palus in the Head, Dimness of Sight, Loss of Muscular Power, Palpitation of the Heart, Dyspepsia, Nervous Irritability, Derangement of the Digestive Functions General Debility, Symptoms of Consumytion, &c.

TO STRANGERS

The many thousands cured at this Institution within the last twelve years, and the numerous important Surgica Operations performed by Dr. J., witnessed by the reporters of the papers, and many other persons, notices of which have appeared again and again before the public, besides his standing as a gentleman of character and responsibility, is a smitchent guarantee to the afflicted DISEASE OF IMPRUDENCE.—When the misguided and imprudent votary of pleasure finds he has imbibed the seeds of this painful disease, it too often happens that an ill-timed sense of shame or dread of discovery deters him from applying to those who, from education and respectability can alone befriend him, delaying till the constitutional symptoms of this herrid disease make their appearance, affecting the head, throat, nose, skin, &c., progressing on with frightful rapidity, till death puts a period') his dreadful sufferings by sending him to "that bourne from whence no traveller returns." It is a melancholy fact that thousands fail victims to this terrible disease, owing to the unskilfulness of ignorant pretenders, who, by the use of that deadly poison, mercury ruin the constitution and make the residue of life miserable

It is valuable because it is not perishable, and may be rendered available in places and at times when yeast is not within reach, as at sea. In all climates and under all circumstances, it may be adopted, thus obviating all difficulty of precuring yeast or other ferme. I, which is frequently of an inferior quality, ret dering the bread more or less unwholesome.

It is also valuable as regards economy, as it has been ascertained that a saving is effected in the flour of not less than 18 per cent. In the common process much of the saccharine of the flour is lost by being converted into carbonic acid gas, or spirit, and the waste is incurred solely for the purpose of genorating gas to raise the dough. By using Concentrated Leaven this waste is avoided, and the gas obtained in a manuter equally efficacious. Fermentation, as has been stated, destroys a part of the flour or meal, and, in consequence, a barret of flour weighing 196 fbs., which, by the common method, ordinarily makes about 250 fbs of bread, gives by this process 250 fbs, thus effecting the very important saving of 16 per cent. In the quantity of flour. By conformity to the directions on each package, any person capable of ordinary attention may conduct the process, and the result will invarlably be highly satisfactory.

CERTIFICATE FROM DR. HAYES,

Assayer to the Scale of Massachusetts.

"I have analysed the Concentrated Leaven, manufactured by Messrs. Edw. Chamberlin & Co., with reference to its purity and efficiency of action in producing the effect of yeast in distending dough, and thereby rendering it fit for making bread. This article is skillfully compounded, from perfectly pure material. It raises the dough without consuming the sugar or any other principle in the flour, perfectly pure material. It raises the dough without consuming the sugar or any other principle in the flour, perfectly pure material. It raises the dough without consuming the sugar or any other principle in the flour, perfectly just of the same weight of flour will produce more sweet, palatable bread than can be obtained through yeast; while for cakes and pastry it is invaluable, as it exes all risk, and much time of the pastry cook.

If I could have had the choice out of ten thou-sand men—excellent navigators in the waters of the North, and withal a good and true man, I could not have selected a better one than Capt. Sidney J. Buddington. The house of Messrs. Williams & Haven, whose generosity in behalf of my voyage to the North should ever be remembered, know well that their interests in the George Henry and Rescue are in the hands of the most careful seamen that comes here to the Arctic seas.

1t gives me pleasure, also, to communicate

the George Henry, and in nothing do they seem more interested than in examining the records of the 1st and 2d Grinnel expeditions illustrated by the lamented Kane. Happily, in Governor mediately in a slow oven.

JULY 23.-1 o'clock, A. M.-A tresh breeze now prevails. We are now off for the West side of Davis' Straits. Yours as ever,

#### The Mountains of North Carolina.

As we were toiling up Paint Mountain, night fell on us. On the summit the four claybanks paused, and the driver prepared for the descent by putting fresh blocks into the brakes. He by putting iresh blocks into the brakes. He wedged them in tight; then turning the glass-side of his lamp to the job, gave a look which said, "I reckon they'll hold; but if they don't he is the "confidence man;" has often been over the mountain, and in darker nights; his team is trained and superconted, and

nights; his team is trained and surefooted; and we resign ourselves to him. Ever and anon, the dim lights reflected a precipice above on one hand, and a precipice below en the other—the wheels skirting the edge of the latter so closely that there is literally but a step between us and death. Down down we go. The stiffus and death. Down, down, we go. The stiff-ening brakes, and locked wheels, and low, coaxing words to the patient brutes, indicate to those inside, the steepest declivities and sharpest turns.

The Paint Rock is a curiosity for its rugged grandeur—naked, dented, seamed, discolored. The road passes by its base, while its tall brow overhangs. Here we strike the French Broad river, and run along its bank for forty miles; and here begins the most beautiful roadto travel known in our geography; there is no parallel to it. The French Broad is wide, shallow and a bounding in rocks, rapids, and falls; is as noisy as a multitude, and as much company. On the return trip, we had the daylight and brilliant moonlight, and a seat, not inside, nor merely outside, but top-side Thus, with our genial friend Cole, editor of the Abingdon Virginian, to help us see and admire, we got a full benefit, and notched down the 28d day of nut-brown October as the happiest of all sight seeing days. Nature had mixed her dyes, and, with exquisite touch, painted every leaf of the wood.

The water birch, ash, black gum, dog wood, The Paint Rock is a curiosity for its rugged
