CONCENTRATED LEAVEN, FOR MAKING

Bread, Tea-Cakes, all kinds of Pastry, &c. MANUFACTURED BY EDW. CHAMBERLIN & CO.,

Proprietors of Shawmut Chemical Works. Proprietors of Shawmut Chemical Works:

No. 33 INDIA STREET, Boston.

CONCENTRATED LEAVEN is the result of careful chemical research. All its ingredicular are propared in the highest state of purity, and compounded with a view to produce bread of a far better quality, and in much less time, than by any other process; and by the manufacturers submit it, with entire confidence, to the judgment of discriminating house keepers, bakers, &c.

Bread of all kinds made by using Concentrated Leaven is lighter, more digestible and nuturitious; has an agreea, ble, natural taste; is less liable to sour; will retain its moisture longer than by any other process, and the whole preparation for the oven need not exceed ten minutes.

It is valuable because it is not nearly half and men the

whole preparation for the oven need not exceed ten minutes.

It is valuable because it is not perishable, and may be rendered available in places and at times when yeast is not within reach, as at sea. In all climates and under all circumstances, it may be adopted, thus obviating all difficulty of precuring yeast or other ferme t, which is frequently of an inferior quality, ret dering the bread more or less unwholesome.

It is also valuable as regards economy, as it has been ascertained that a saving is effected in the flour of not less than 16 per cent. In the common process much of the saccharine of the flour is lost by being converted into carbonts acid gas, or spirit, and the waste is incurred solely for the purpose of genorating gas to raise the dough. By using Concentrated Leaven this waste is avoided, and the gas obtained in a manner equally efficacious. Fermentation, as has been stated, destroys a part of the flour or meal, and, in consequence, a barrel of flour weighing 196 hs, which, by the con mon method, ordinatily makes about 250 hs of bread, gives by this process 290 hs, thus effecting the very important saving of 16 per cent. in the quantity of flour. By conformity to the directions on each package, any person capable of ordinary attention may conduct the process, and the result will invariably be highly satisfactory.

CERTIFICATE FROM DR. HAYES,

ordinary intention may conduct the process, and the result will invariably be highly satisfactory.

CERTIFICATE FROM DR. HAYES,

Assayer to the State of Massachusetts.

"I have analysed the Concentrated Leaven, manufactured by Messrs. Edw Chamberlin & Co., with reference to its purify and efficiency of action in producing the effect of yeast in distending dough, and thereby rendering it fit for making bread. This article is skillfully compounded, from perfectly pure material. It raises the dough without consuming the sugar or any other principle in the flour, perfectly; and the same weight of flour will produce more sweet, palatable bread than can be obtained through yeast; while for cakes and pastry it is invaluable, as it saves all risk, and much time of the pastry cook.

"The experiments made by me confirm the statements made by the manufacturers, and proves this compound worthy of public approval and extended use.

"Respectfully."

"A. A. HAYER, M. D., State Assayer, "16 Boylston street, Boston, September 25, 1860."
