Headachs may be classified under two names, viz:—Symptomatic and Idiopathic Symptomatic Headache is exceedingly common and is the precursor of a great variety of classes, among which are Apoplexy, Gout, i heumatism and all febrile diseases. In its nervous form it is sympathetic of disease of the stomach constituting sick headache, of hepatic disease constituting billious headache, worms, contipation and other disorders of the bowels, as well as recal and werine affections. Diseases of the heart are very frequently attended with Headaches, Ammin and plethora are also affections which it requestly occasion headache. Idiopathic Headache is also very common, being musually distinguished by the mimo of servous headache, sometime coming on suddenly in a state of apparently sound health and prostrating at once the mental and physical energies, and in other instances it comes on slowly, heralded by depression of spirits or actribity of temper. In most instances it once so on showly, heralded by the mean proving vomiting, under this class may also be tamed Awarda.

For the treatment of either class of Headache the Cephalic Pills have been found a sure and safe remedy, reineving the mest acute palus in a tew minutes, and by its subtile 1 ower eradic ting the diseases of which Headache is the unerring index.

Constipation or Costiveness.

No one of the "many ills flesh is heir to" is so preva No one of the "many ills fleeb is heir t;" is so prevalent, so little understood, and so much neglected as Costiveness. Often origin ating in carele smess, or sedentary habit; it is regarded as a slight disorder of two little consequence to excite anxiety, while in reality it is the precursor and companion of many of many of the moet fatal and dangorous diseases, and unless early eradioated it will bring the sufferer to an untimely grave.—Among the h, hter evils of which costiveness is the usual attendant are Headeche, Colio, Rheum tism, Foul Breath, Files and others of like nature, while a lung train of frightful diseases such as Malignan Favers, Abcesses, Dysentery, harriton. Dyspepsy. Apoplexy, Epilepsy, Paralysis, Hyste ia, Hyochoudrinsis, Melancholy and Insanity, first indicate their presence in the system by this alarming symptom. Not unfrequently the diseases named originate in C astipanion, but take on an independent existence unless the cause is eradicated in an early stage. From all these considerations it follows that the disorder should receive immediate attention whenever it occurs, and no person should neglect to get a box of Cephalic Fills on the first eppaarance of the complaint, as their timel: use will expect the insiduous approach o disease and destroy this dargerous for the human life.
