Constipation or Costiveness.

No one of the "many ills flesh is heir to" is so prevalent, so little understood, and so much neglected as Costiveness. Often origit ating in carcle sness, or sedentary habits; it is regarded as a slight deorder of two little consequence to excute anxiety, while in reality it is the precursor and companion of many of many of the most fatal and dangerout diseases, and unless sorty eradicated it will bring the sufferer to an untimely grave—Among the la hier evite of which coestigeness is the usual attendant are Headache, Cohe, Rheum, itim, Foul Breath, riles and others of like nature, while a long train of frightful diseases such as Malignan: Favere, Abocases, Dyacatery, Darrhean Dyapengy, Apoplary, Epilepsy, Paralysis, Hysteria, Hytochondriasis, Melancholy and Insanity, dist indicate their presence in the system by this alarming symptom. Not unfrequently the disease so many doriginate in Cartipation, but take on an independent existence unless the cause is eradicated in an early stage. From all these considerations it follows that the disorder should receive immediate attention whenever it occurs, and no person should neglect to get a box of Ochaho Filia on the first appearance of the complaint, so their timel use will expect the insiduous approach o disease and deatrey this dar gerous f.e to human life.
