Proprietors of Shawmut Chemical Works.

No. 33 INDIA SPREEL, Boston.

CONCENTRATED LEAVEN is the result of careful chemical research. All its ingredious are propared in the highest state of purity, and comjounded with a view to produce bread of a far better quality, and in much less time, than by any other process; and by the manufacturers submit it, with entire confinence, to the juagment of desriminating house keepers, bakers, &c.

Bread of all kin s made by using Concentrated Leaven is it, hier, more digestible and nuitritious; has an agreea, ble, nutural taste; is less lable to lour; will retain its moisture longer than by any other process, and the whole preparation for the oven need not exceed ten injustes. DISEASES OF IMPRUDENCE. RELIEF IN SIX TO TWELVE HOURS. No Mercury or Noxlous Drugs. A CURE WARRANTED, OR NO CHARGE, IN FROM ONE TO TWO DATE.

inclutes.

It is valuable because it is not perishable, and may be rendered available in places and at times when yeast is not within reach, as at sea. In all climates and under all riroum-tances, it may be adopted, thus obviating all bifficulty of procuring yeast or other ferme t, which is frequently of an inferior quality, ret dering the bread more or less unwholesome.

It is also valuable as regards economy, as it has been ageertained that a saving is effected in the flour of not less than 16 per cent. In the common process much of the saccharine of the flour is lost by being converted into carbooke acid gas, or spirit, and the waste is indurred solely for the purpose of generating gas to raise the dough. By using Concentrated Leaven this waste is avoided, and the gas obtained in a manner equally efficacious. Fermentation, as has been stated, distroys a part of the flour or meal, and, in consequence, a barriel of four weighing 196 hs, which, by the con mon method, drainarily makes about 250 hs of bread, gives by this process 290 hs, thus effecting the very important saving of 16 per cent in the quantity of flour. By conformity to the directions on each package, any person capable of ordinary attention may conduct the process, and the result invariably be highly satisfactory.

CERTIFICATE FROM DR. HAYES,

Asager to the Sale of Massachusetts.

"I have analysed the Concentrated leaven, manufactured by Messis. Edw Chamberlin & Co., with reference to its purity and efficiency of action in producing the effect of yeast in distending dough, and thereby rendering it fit for making bread. This article is skillfully compounded, from periectly pure material. It raises the dough without consuming the sugar or any other principle in the fi-ur, perfectly; and the same weight is flour will produce more sweet, palatable bread than can be obtained through yeast; while for cakes and pastry it is invaluable, as it saves all risk, and much time of the pastry cook.

"The experiments made by me confirm the statements made by the manufacturers, and proves this compound worthy of public approval and extended use.

"Respectfully,

A Man Lynched in Mississ ppi.

HE IS FLOGGED, TARRED AND COTTONED, FOR ALLEGED TAMPERING WITH SLAVES.

A respectable looking man named Wm. Smithyman, a native of England, and for several years a resident of Juneau county, Wisconsin, arrived in this city on Tuesday, from Memphis, by the steamboat J. D. Perry. Mr. S was driven from Mississipi last week after suffering severe injures for crimes alleged against him, but of which he declares his entire innocence.— He was formerly employed in this city for a few weeks, as a miller in the Planters Mills, on Franklin avenue, and went to Mississippi for employment in June last.— He bore letters of recommendation and character, and obtained work in Panola and De Soto counties, near the Tenessee line.
