CONCENTRATED LEAVEN, FOR MAKING

Bread, Tea-Cakes, all kinds of Pastry. &c. MANUFACTURED BY

EDW. CHAMBERLIN & CO.,

Proprietors of Shawmut Chemical Works. Proprietors of Shanemat Chemical Works.

No. 33 INDIA STREET, Boston.

CONCENTRATED LEAVEN is the result of careful chemical research. All its ingredicular prepared in the highest state of purity, and compounded with a view to produce bread of a far better quality, and in much less time, then by any other process; and by the manufacturers submit it, with entire confluence, to the judgment of descriminating house keepers, bakers, &c.

Bread of all kin's inade by using Concentrated Leaven is it, her, more digestible and nutiritions; has an agreea, be, natural taste; is less liable to cour; will retain its moisture longer than by any other process, and the whole preparation for the oven need not exceed ton minutes.

It is valuable because it is not perishable, and may be rendered available in places and at times when yeast is rendered available in places and at times when yeast is all circumstances, at may be adopted, thus obviating all cifficulty of precuring yeast or other ferme t, which is frequently of an inferior quality, rei dering the bread more or less nuwholesome.

It is also valuable as regards economy, as it has been ascertained that a saving is effected in the floor of no: less than 16 per cent. In the common process much of the saccharine of the flour is lest by being converted into carbonic acid gas, or spirit, and the waste is incurred solely for the purpose of generating gas to raise the dough. By using Concentrated Leaven this waste is avoided, and the gas obtained in a manner equally efficacious. Fermentation, as has been stated, destroys a part of the flour or meal, end, in consequence, a barrel of flour weighing 196 Bs, which, by the con mon method, ordinarily makes about 250 Bs of bread, gives by this process 200 Bs, thus effecting the very important saving of 16 per cent. in the quantity of flour. By conformity to the directions on each package, any person capable of ordinary attention may conduct the process, and the result will invariably be highly satisfactory.

CERTIFICATE FROM DR. HAYES,
Assoyer to the State of Massachusetts.

"I have avaly sed the Concentrated Leaven, manufactured by Messas. Edw Chamberlin & Co., with refereace to its purity and efficiency of setion in producing the effect of yeast in distending dough, and thereby rendering it fit for making bread. This article is akilifully compounded, from periectly pure material. It raises the dough without comming the sugar or any other principle in the flour, perfectly; and the same weight of flour will produce more sweet, palatable bread than can be obtained through yeast; while for cakes and pastry it is invaluable, as it saves all risk, and much time of the pastry cook.

"The experiments made by me confirm the statements

"The experiments made by me confirm the statements made by the manufacturers, and proves this compound worthy of public approved and extended use.

"Respectfully,
"A. A. HAYES, M. D., State Arsayer,

Many troubled with ringing in the ears and head when asleep, great nervousners, being aiarmed at sudden sounds; basiquiness, with frequent blushing, attended sometimes with dorangement of mind were cured immediately,

TAKE PARTICULAR NOTICE.

Dr. J. addresses all those who having injured themsolves by private and improper indulgencies, that secret and solitary habit which rolls both body and mind, unfitting them for either businessor society.

These are some of the sad and melancholy effects produced by early habits of youth, viz: Weakness of the Brick and Limbs, fains in the Head, Dimness of Sight, Loss of Muscular Power, Paipliation of the Heart, Dyspepsia, Nervous Irritability, Derangement of the Digestive Functions, General Debility, Symptoms of Censumption, &c.

MENTALLY, the fearful effects on the mind are much to be dreaded:—Loss of Memory, Confusion of Ideas, Depression of Spirits, Evil Forebodings, Aversion to Society, Self-distrust, Love of Solitude, Timidity, &c., are some of the evil effects.

Thousands of persons of all ages, can now judge what is the cause of their decline in health, losing their vigor, becoming weak, pale, nervous and emaciated, have a singular appearance about the eyes, cough, and symptoms of consumn ion.

GANIC WEAKNESS. By this great and important remody, Weakness of the Organs are speedily cured, and full vigor restored. Thousands of the most nervous and doblitated who had lost all hope, have been immediately relieved. All impostments to Marriage, Physical or Mental Disqualideation, Nervous, Trembling, Weakness or Exhaustion or the most fearful klod, speedily cured.

TO STRANGERS.

The many thousands cured at this institution within the last twelve years, and the numerous important Surgical operations performed by Dr. J., witnessed by the reporters of the papers, and many other persons, actions of which have appeared again and again before the public, besides his standing as a gentleman of character and responsibility, is a sufficient guarantee to the afflicted.

Dist AS'S OF IMPRUDENCE—When the misguided and imprusent volary of pleasure finds he has imbited the seeds of this pathod disease; it too often happens that an ill-timed sense of shame or dread of discovery deters him from applying to those who, from education and respectability can atom befriend him, delaying till the constitutional symptoms of this horrid disease make their appearance, affecting the head, turout, nose, skin, acc., progressing on with frightful rapidity, till death purs a period to his dreadful sufferings by sending him to "that tourns from whence so traveler returns." It is a melancholy fact the thousands fall victims to this terrible disease, owing to this unsalituiness of ignorant protenders, who, by the use of that deadly poison, mercury, ruin the constitution and make the residue of its omeorable.

Women Who Labor for a Living.

In our reflections on the disasters which have fallen upon us by the sudden distur-bance of our business relations, we have not forgotten the women who labor, for a living. The capitalist, banker and merchant, who, though they suffer in the ag-gregate, and through their disasters the ANOUNCE to the citizens of Harrisborg and the public generally, that they have just returned from the eastern cities with a large and well selected stock of Fall and Winter Goods, which they will selves. The laboring man can, in a measure, take care of himself. If he is thrown out of employment in one direction, he can turn his hand to twenty different things, and if he is alone, eke out a support through the hard times, let them be ever so hard. But the women; what can they do if their ordinary means of support fail? In the best of times they receive none too much for the labor of their hands. They begin early and work late, and at the end of the week have but a few dollars to show for their industrious application. This, however, is a matter of small concern to them, if by their labor they can live honestly and securely. The money they receive is earned hardly but uncomplainingly; and they spend it economically and judi-ciously. We have no more upright and concientious people among us than the true hearted, independent working women; none who more nobly sustain themselves, so long as opportunities are afforded them. Their desire is not for accumulation, and if it were, it is seldom gratified; but it is

to live independently, purely, and without This we hold to be true of the great body of women who are obliged to seek work for their livelihood. We have nothing to do, at this time, with exceptional cases; with those who debase themselves voluntarily and dishonor their sex deliberately. Hard times or other times would make no difference with them. Were they in Heaven, they would fall from their own choice, and nothing would save them; for a woman resolved upon a course of intamy will sin, in the language of an inspired writer, "as it were with a cartrope." But those women who labor for a living must live, and if their honorable means of support are taken from them, what can they do? Either become a charge upon relatives already to poor to make both ends meet respectively, become a public charge which only the most dire and urgent neces. sity could bring a women to consent to, accept a fatal alternative from which they can never rise, or look for new openings where their time and labor can receive proper remuneration. In this last sugges-tion, public opinion and practice, and those alone, can help them. To increase the sphere and boundaries of the employment of women is to do a work for humanity and morality. Women must live. And mainly men would not surely place before them the choice of submitting to destitu-tion or hopeless disgrace! The increase of the "social evil" in all our cities is at-tracting the attention of the public. Have we not something to do towards staying that increase? We are glad to believe that it comes, in the greatest measure, from the absolute necessities which exist among young women who cannot find hon. orable employment, and not from inherent love of vice. We must, then, open new channels for their employment, and also remunerate them so that they live honorably and without fear of being brought to want. The insufficiency of prices paid for the labor of women has not been ameliorated since Hood wrote his 'Song of the Shirt.' The is a prolific source of the social evil, and the poor creatures doubtless feel that they cannot help

hemselves; that it is their destiny. "Oh I men with sisters dear !

Oh I men with mothers and wives!

It is not linen you're wearing out,

But human creatures' lives!

Sitch, stitch, stitch,

In poverty, hunger and dirt;

Sewing at once with a-double, thread,

A shroud as well as a shirt."

Nor has the sewing machine, much'as it

has done, done anything to relieve the misfortunes of the poorest among the sewing women, for they have not the means either to purchase or hire one, and are still condemned to their needle, "in poverty, hunger and dirt," with no bright or cheering prospect before them; except a speedy end of all; or a brief period of exciting life to be followed by both moral and physical death. When a London paper says of England: When to the young women of England are added widows and married women of all claracs with time on their hands, and to whom it is a very great object to increase their incomes, we have an amount of constrained idleness and undeserved suffering that it is not to be found elsewhere on earth," the writer expresses the condition of these classes of the population in every civilized. and christian country. Now, what can we do to alleviate this portion of our population? All other classes have their patrons says the paper from which we have quot-"Paupers, criminals, offenders, madmen, idiots, orphans, sick, aged, deaf, dumb and blind-all have their almshouses, prisons, reformatories and asylums, and DENTISTRY. any woman, of any age or rank, has only THE undersigned, DOCTOR OF DENTAL to fall ill, to break a limb, to loose her sight, to commit a larceny or any other of fence, and she is immediately claimed by some philanthropist for his own." not claim charity for women; we do not want to see them the inmates of institutions and regarded as objects of pity. But we do want to see them sharing in our sosympathy, which shall take that practical direction that shall open new means of
