***Hradache is the favorite sign by which nature makes known any deviation whatever from the natural state of the brain, and viewed in this light it may be looked on as asafeguard intended to give notice of disease which might otherwise escape attention, till too late to be romedied; and its indications should never be neglected. Headaches may be classified under two names, viz:—Symptomatic and diopathic Symptomatic Headache is exceedingly common and is the precursor of a great variety of diseases, among which are Apoplexy, Gout, Rheumatism and all febrile diseases. In its nervous form it is symputatic of disease of the stomach constituting sick headache, of hepatic disease constituting billious headache, of worms, constipation and other disorders of the bowels, as well as renal and uterine affections. Diseases of the heart are vury frequently attended with Headaches, ansamis and plethors are also affections which frequently occasion headache. Idiopathic Headache is also very common, being usually distinguished by the name of nervous headache, sometimes coming on suddenly in a state of apparently sound health and prostrating at once the mental and physical onergies, and in other instances it comes on slowly, heralded by depression of spirits or accrbity of temper. In most instances the pain is in the front of the head, over one or both eyes, and sometimes provoking vomiting; under this class may also be named Neuralyies.

For the treatment of either class of Headache the Cophalic Pilis have been found a sure and safe remedy, relieving the most acute pains in a few minutes, and by its subtile power eradicating the diseases of which Headache is the unerring index.

ERIDGET.—Missus wants you to send her a box of Cephalic Glue, no, a bottle of Prepared Pills,—but I'm thinking that's not just it naither; but perhaps ye'll be after a nowing what it is. Bridget.—Cch! sure now and you've sed it, here's the quarter and giv me the Pills and don't be all day about its aither.

Constination or Costiveness.

No one of the "many ills flesh is heir to" is so prevalent, so little understood, and so much neglected as Costiveness. Often origin ating in carcle-sness, or sedentary habits; it is regarded as a slight disorder of two little consequence to excite anxiety, while in reality it is the precursor and companion of many of many of the most fatal and dangerous diseases, and unless early eradicated it will bring the suderer to an unlimely grave.—Among the lighter evils of which costiveness is the usual attendant are Headache, Colle, kheumatism, Foul Breatin, Piles and others of like nature, while a long train of frightful diseases such as Malignant Favers, Aboesses, Dysentery, Diarrhoea, Dyspepsy, Apoplexy, Epilepsy, Paralysis, Hysteila, Hypochondrisais, Melancholy and Insanity, first indicate their presence in the system by this alarming symptom. Not unfrequently the diseases named originate in Caustipation, but take on an independent existence unless the cause is eradicated in an early stage. From all these considerations it follows that the disorder should receive immediate attention whenever it occurs, and no person should neglect to get a box of Cephalic Fills on the first appearance of the complaint, as their timely use will expert the insiduous approach of disease and destrey this dangerous foe to human life.

A Real Blessing.

for Cephelic Pills, I find they never fall, and I recommend them in all cases of Headache.

Mrs. Jones.—I shall send for a box directly, and shall
tell all my suffering friends, for they are a real blessing.

The disordered state of mind and body incident to this dis-treasing complaint is a fatal blow to all energy and am-bition. Sufferers by this disorder can always obtain speedy relief from these distressing attacks by using one of the Cophalic Fills whenever the symptoms appear— It quiets the overtasked brain, and soothes the strained and jarring nerves, and relates the tension of the sto-mach which always accommands and agrays the dismach which always accompanie ordered condition of the brain. nies and aggravates the di
