BLOOD FOOD

The attention of invalids, Physicians, Ciergymeu, scientific men, and the public generally, is respectfully solicited to the merits of this chemical preparation, containing from, Suightur and Phosphorus, and which is identical in its composition with the Hematic Globule, or red blood. In all diseases accompanied with

Debility,

pale countenance and nervous derangement, analysis of the blood show a deficiency of the red globules. Ruddy-complexion and a rosy tint of the skin, is always indicative of health; while a pale, wax-like skin and countenance,—which evinces a deficiency of the red globules,—accompanies a discased organism. Preparations of Iron have been given for the purpose of supplying the red globules; but we comtend that Iron alone, Sulphur alone, or Phosphorus alone, will not meet the deficiency in every case, but that a judicous combination of all these elements is necessary to restore the blood to its normal standard. This point, never before attained, has been reached in the Blood Food, and its discovery ranks as one of the most scientific and important of the age. Its effects in Consumption

are to soften the cough, brace the nerves, strengthen the system, allay the prostrating night sweats, increase the physical and mental energy, enrich the blood by festoring the lacking red globules, increase the appetite, restore the color, and ciothe the skeleton frame with figh. The Blood Food will be found a specific in all Chronic Discasce of the Throat, or Lungs, such as Ashma, Bronchitt, Cough, &c. Public speakers and singers will find it of great utility in clearing and strengthening the vecal organs. In Discasce, Liver Complaints, Dropy, Epilepsy, Paralysis, Corolla, Grand, St. Vitus' Dance, Fever and Ague, Sc., its efficacy is marked and instantaneous. In no class of disease, however, are the beneficial effects of this remedy so conspicuous as in those harrassing

The Amaignmation of Larguages.—There is a prowing, tendency in this age to appropriate the most expressive words of other languages, and after a while to incorporate them into our own; thus the word Cephalia, which is from the Greek, signify ing "for the bad," is now becoming popularized in connection with Mr. Syalding's great Headache remedy, but it will soon be used in a more general way, and the word Cephalic will become as common as Flectritype and many others whose distinction as foreign words has been worn away by common usage until they seem "native and to the manor born"

***MEADACHE is the favorito sign by which nature makes known any deviation whatever from the natural state of the brain, and viewed in this light it may be looked on as a safeguard intended to give notice of disease which might otherwise escape attention, tili too late to be remedied; and its indications should never be neglected. Headaches may be classified under two names, viz:—

Symptomatic and Idiopathic Symptomatic Headache is exceedingly common and is the precursor of a great variety of diseases, among which are Apoplexy, Gout, Rheimatism and all febrile diseases. In its nervous form it is sympathetic of disease of the stomach constituting tick headache, of hepatic disease constituting billious keadache, of worms, constipation and other disorders of 'the bowels, as well as rehal and ulerine affections. Diseases of the heart are very frequently attended with Heidaches, Ansemia and plethors are also affections which frequently occasion headache. Idiopathic Headache is also very common, being usually distinguished by 'the name of nervous headache, sometimes coming on suddenly in a state of apparently sound health and prostrating at once the mental and physical cuergies, and in other instances it comes on slowly, heralded by depression of spirits or acerbity of temper. In most instances the pain is in the front of the head, over one or both eyes, and sometimes provoking vomiting; under this class may also be tamed Neuralpia.

For the treatment of either class of Hususache the Cephalic Pills have been found a sure and sule remedy, relieving the most acute pains in a tew minutes, and by its subtile; nower eradicating the diseases of which Headache is the unerring index.

Constination or Costiveness.

Constination or Costiveness.

No one of the "many ills flesh is beir ty" is so prevalent, so little understood, and so much neglected as Costiveness. "Often originating in careles siness, or sedentary habits; it is regarded as a slight disorder of two little consequedte to "exclé anxiety, while in reality it is the precursor and companion of many of many of the most fatal and dangerous diseases, and unless early eradicated it will bring the sufferer to an unimely grave. Among the lighter evils for which costiveness is the usual attendant are Headache, Colio, Rheumatism, Foul Breata, Files, and others of like nature, while a long train of rightful diseases such as Malignant Favers, Aboesses, Dyseatery, Diarrhosa, Dyspepsy, Apoplexy, Epilopsy, Paralysis, Hesteria, Hypochordrasis, Melancholy and insanity, directindeats their presence in the system by this alarming symptom. Not unfrequently the diseases named originate in Cristipation, but take on an independent existence unless the cause is bradicated in an early stage. From all these considerations it tollows that the disorder should receive immediate attention whenever it occurs, and no person should neglect to get a box of Cophiatic Pills on the first appearance of the complaint, as their timely use will expect the institutions approach of disease and destrey this dargerous foe to human life.
