This is a purely vegets ble compound, prepared on strictly scientifie principles, after the manner of the celebrated Holland Professor, Boel haye. Its reputation at home produced its introduction here, the demand commencing with those of the Fatherland scattered over the face of this mightly country, many of whom brought with them and handed down the tradition of its vaiue. It is now offered to the American public, knowing that its truly wonderful medicinal virtues must be acknowledged.

It is particularly recommended to those persons whose constitutions may have usen impaired by the continuous use of ardent spirits, or other forms of desipation. Generally instantaneous in effect, it finds its way directly to the seat of life, thrilling and quickening every nerve, raising up the drooping spirit, and, in fact, infinsing new health and vigor in the system.

NOTICE.—Wheever expects to find this a beverage will be disappointed; but to the fick, weak and low spirited it will prove as grateful aromatic ordial, possessed of of singular remedial properties.

The attention of invalids, Physicians, Ciergymen, set entific men, and the public generally, is respectfully solicited to the merits of this chemical preparatin, containing fron, Sulphur and Phosphon us, and white identical in its composition with the Hemalic Globule, or red blood. In all diseases accompanied with

Preparations of Iron have been given for the purpose of supplying the red globules, but we contend that Iron alone, Sulphuralone, or Phosphorus alone, will not meet the deficiency in every case, but that a judicious combination of All these clements is necessary to restore the blood to its normal standard. EHradache is the favorite sign by which nature makes known any deviation whatever from the natural state of the brain, and viewed in this light it may be looked on as a safeguard intended to give notice of discass which might otherwise escape attention, till too late to be remedice; and its indications should nev. r be neglected. Headaches may be classified under two names, viz:

Sympton.atic and Idiopathic Symptomatic Headache is exceedingly common and is the pictured of a great variety of discasse, among which are Apoplaxy, Gout, theumatism and all febrile diseases. In its nervous forms it is sympathetic of diseases on the stomach coust tuing sick headache, of hepatic disease constituting billious headache, worms, com tipation and other disorders of the bowels; as well as reval and tireline affections. Diseases of the heat are very irequently attached with Heidaches, Amemia and plethora are also affections which trequipitly occasion headache. Idiopathic Headache is also very common, being usually distinguished by the name of heroous headache, sometimes coming on suddeely in a state of apparently sound health and prostrating at once the mental and physical onergies, and in other lustiness it comes on slowly, heralded by tepression of spirits or accribity of temper.
