Medical.

The attention of Invalids, Physicians, Clergymeu, self-mifice men, and the public generally, is respectfully policited to the merits of this chemical preparation, con-mining Iron, Sulphur and Phosphorus, and which in individual in its composition with the Hematic Globule, or red blood. In all diseases accompanied with

Debility,

pale countenance and nervous derangement, analysis of the blood show a deficiency of the red globules. Ruddy-tomplexion and a rosy tint of the skin, is always indicative of health; while a pale, wux-like skin and counter the countenance,—which evinces a deficiency of the red globules,—accompanies a discased organism. Preparations of Iron have been given for the purpose of supplying the red globules, but we contend that Iron alone, Sulphuir alone, or Phosphorus alone, will not meet the deficiency in every case, but that a judicious combination of ALL these clements is necessary to restore the blood to its normal standard. This point, never before attained, has been reached in the Blood Food, and its discovery ranks as one of the most scientific and important of the age. Its effects in [1] nge. Its effects in 1

Public speakers and ringers will find it of great utility in clearing and strengthening the vocal organs. In Dyspresia, Liver Complaints, Dropsy, Epilepsy, Paralysis, Serofula, Gravel, M. Vitus' Dance, Fever and Ague, &c., its efficacy is marked and instantaneous. In no class of disease, however, are the beneficial effects of this remedy so conspicuous as in those harrassing

We have the utmost confidence in recommending the Blood Food to all who may be conscious of a loss of vitality or energy, and to those whose mental or bodily powers are prostrated through over-use, either of the mind or body, and we deem it our duty to say that in all cases of Weakness and Emaciation, and in all discases of the Kidneys Bladder, this preparation has a claim upon the attention of sufferers which cannot be over-estimated. A faithful trial will be found the most convincing proof in regard to its efficacy that could be asked for.
