MORE DAMAGE .--- We understand that a portion of the roof on the Asylum stable. was blown off last evening.

CARELESSNESS OF EMPLOYEES .- Many thousands of dollars are annually wasted by the carelessness and neglect of persons in the employment of others. A great number of employees never think or seem not to care how much the property of their employers is detheir own, but seem to think the saving of apparently trifling matters is not worth observing, as the cost is but little, and nothing to themselves. They do not think or know that the cover this in a hand, and will reward it by in creased confidence. This very thing of economy and care is in a great measure the secret or success with many young men. It never fails to be rewarded. AMENDMENTS TO THE SCHOOL LAWS .- A VERY important bill, proposing changes in the laws relating to the Common School System, can be found on the bill file in the House of Rethink, wholesome changes, are introduced. GOING TO JAIL ON SPECULATION -The Boston Traveller notices an incident which could hardlv have occurred out of Yankee land. SMOKING .- There is no use in declaiming against tobacco. Its use has become an ordinance of Providence. It increases wonderfully. Even women are going into cigarettes largely. There must be a providential cause for this. Not unlikely it stands as against the nervous over action, which else would fatally distract our minds, and leave anger without a mollifier: Veteran smokers are always good tempered, particularly while in the act of smoking.

A MAN FORGES HIS SISTLE'S NAME, AND GETS HEB MONEY .- At the instance of the officers of the Bank of Tennessee at Nashville, a man, named Robert Whitley, was arrested on Thursday for obtaining under false pretenses, money deposited in that bank belonging to his sister, The Nashville Gazette says it appears that

some time since, his sister gave him \$800 to deposit in her name. The lady called at the bank on Thursday, and learned to her astonishment that the money, with the exception of a small amount, had been drawn out by her brother. The officers of the bank immediately caused the arrest of Whitley, who was arraign ed. In default of bail, he was committed to

jail for trial. THE OIL BUSINESS .- The people in Venango, Mercer, Erie and several other counties of that portion of the State seem to be in a perfect furore about the oil speculation. One of the papers says that 500 teams are engaged hauling oil to Union Mills. This gives employ to 500 men. The feed that 500 teams will consume, will create an additional demand for oats, hay, &c. This will bring into active service a great many other teams and men. Then think of the amount of lumber, barrels, &c., which have to be transported to the points of demand. It is hard, indeed, to estimate the additional amount of labor in other departments of hu-"oil regions" is now very great, and prices high. The yearly product of the saw-mills of Rhoads' old corner. that vicinity, that has heretofore been sent to

that vicinity, that has heretofore been sent to Pittsburg, is now consumed at home, at a higher price than could have been obtained after run-ning it to market. Then think of the demand for coopers, when thousands of barrels are needed daily. The Sunbury and Erie railroad shipped over their road 22,119 barrels of oil from the first of November, 1859, till the first of January, 1861.

### (From the Boston Evening Express.) CHICKERING'S PIANOS.

In no branch of the mechanic arts in this country has more rapid strides been made than in the manufacture of Piano-Fortes, the favor-ite, and, we may say, the universal musical instrument of the household. Every well-reg ulated establishment must have its Piano; in deed, the parlor, with its gorgeous and luxur-ious furniture, its pictures, its bronzes, its parians, would be badly appointed without one. And it behoves every man in selecting an in-strument, not to fail in obtaining one of good tone and finish ; for, like furnaces, ranges and cooking-stoves, the cheapest are by far the most expensive. We know by experience—by pocket experience—for, within a term of six years, we purchased three of as many different makers. and although it would have puzzled any but an and atthough it would have puzzled any but an expert to have pointed out why they were not equal to anything in the market, yet they turned out to be miserable rattletraps and tink-ling cymbals compared to those of which we ; and all the skill and ingenuity of good ateur artist to play Yankee Doodle upon in a satisfactory manner. We got rid of our 'bad bar-

gains" one after another, at a sacrifice of course, and were recommended to purchase one of Chickering's Parlor Grands, which we did, three years ago, and we can now asseverate that it was the only "good bargain" in the Plano line we ever made. It is truly a magnificent instrument, and one that we are proud to have our friends listen to; and, moreover, it has not required a cent to keep it in good condition, except the slight expense of tuning it semi-annually. But while we are boasting of possessing a superior instrument, we have found, on inquiry, that all who possess a Chickering Piano are so proud of theirs as we of ours.

ering were awarded the Gold Medal at the late Mechanics' Fair, held in this city, as has been invariably done at previous Exhibitions, not only here, but wherever they have competed for the prize. The number of Gold and Silver Medals which they have from time to time received, forms quite a rich and interesting nu-mismatic collection, and it is generally admitted that they have never bore away a prize that they were not fully entitled to.

It is, indeed, a great satisfaction to possess a good and reliable instrument, and there is little danger of obtaining any other if it bears the name of Chickeriog & Sons.
