COMMENDATIONS:

From Hon, Lewis D. Campbell, M. C., Ohio. My family and friends all concur in the opinion that the (Newell) Picture is mere life-like than anything they ever saw. My likeness has been repeatedly taken by different Artists in various ways, but I have never yet had one which presents so true to nature, all the features and expressions of countenance as this.

From Hon. E. Joy Morris, late Minister to Italy The exquisite finish, beauty and softness of your por-traits, conjoined with their durability of color and faith-fulness as likenesses, cannot sai to commend them to the attention and partonage of all who appreciate true rat.

From Col, James Page.

Having occasion for a portrait, I procured one from Mr. Robert Newell, of the city of Philadelphia, a ministure in Oil Colors, under the new process discovered by Aim, and take great pleasure in expressing the astistaction given me, not only by the accuracy of the likeness, but its artistic fluish in all respects, and recommend him to the patronage of those disposed to encourage the beautiful art. jan2-lyw

CONCENTRATED LEAVEN, FOR MAKING

Bread, Tea-Cakes, all kinds of Pastry, &c.

No. 33 INDIA STREET, Boston.

CONCENTRATED LEAVEN is the result of careful chemical research. All its ingredicates are prepared in the highest state of purity, and compounded with a view to produce bread of a far better quality, and in much-less time, than by any other process; and by the manufacturers submit it, with entire confidence, to the judgment of discriminating house-keepers, bakers, &c.

minutes.

It is valuable because it is not perishable, and may be rendered available in places and at times when yeast is not within reach, as at sea. In all climates and under all circumstances, it may be adopted, thus obviating all difficulty of procuring yeast or other fermest, which is frequently of an inferior quality, ret dering the bread more or less unwholesome.

It is also valuable as regards economy, as it has been ascertained that a saving is effected in the flour of not less than 16 per cent. In the common process, much of the sacoharine of the flour is lost by being converted into carbonic acid gas, or spirit, and the waste is incurred solely for the purpose of genorating gas to raise the dough. By using Concentrated Leaven this waste is avoided, and the gas obtained in a manner equally efficacious. Fermentation, as has been stated, destroys a part of the flour or meal, and, in consequence, a barrel of flour weighing 196 flos, which, by the common method, ordinarily makes about 250 flos of bread, gives by this process 290 flos, thus effecting the very interested saving of 16 per cent, in the quantity of the process, and the relief of the floy of the saving of the process, and the relief of the floy of the saving to a packet of the process, and the relief of the directions on each packet.

CERTIFICATE FROM DR. HAYES. Amayer to the Sale of Massachusetts.

Amyer to the Sale of Massachusedts.

"I have analysed the Concentrated Leaven, manufactured by Mesars. Edw. Chamberlin & Co., with reference to its purity and efficiency of action in producing the effect of yeast in distending dough, and thereby rendering e fit for making bread. This article is aktilifully comfounded, from perfectly pure material. It raises the dough without consuming the sugar or any other principle in the flour, perfectly; and the same weight of flour will produce more sweet, palastable bread than can be obtained through yeast; while for cakes and pastry it is invaluable, as it saves all risk, and much time of the pastry cook.

pastry cook.

"The experiments made by me confirm the statements made by the manufacturers, and proves this compound worthy of public approval and extended use.

"Respectfully.

"A. A. HAYES, M. D., State Assayer,

"16 Boykton street, Boston, September 25, 1860."

No. 33 INDIA STREET, Boston.

CONCENTRATED LEAVEN is the regulation of careful chemical research. All its ingredicts are prepared in the highest state of purity, and compounded with a view to produce bread of a far better quality, and in much-less time, than by any other process; and by the manufacturers submit it, with subtreconfidence, to the judgment of discriminating house-keepers, bakers, &c.

Bread of all kinds made by using Concentrated Leaven is lighter, more digestible and nuitritious; has an agreeable, natural taste; is less liable to sour; will retain its moisture longer than by any other process, and the whole preparation for the oven need not exceed ten minutes.

It is valuable because it is not perishable, and may be rendered available in places and at times when yeast is not within reach, as at sea. In all climates and under all circumstances, it may be adopted, thus obviating all difficulty of procuring yeast or other fames.
