CONCENTRATED LEAVEN,  
FOR MAKING  
Bread, Tea-Cakes, all kinds of Pastry, &c.  
MANUFACTURED BY  
EDW. CHAMBERLIN & CO.,  
Proprietors of Shamrock Chemical Works.  
No. 38 INDIA STREET, Boston.

CONCENTRATED LEAVEN is the result  
of careful chemical research. All its ingredi-  
ents are prepared in the highest state of purity, and  
pounded with a view to produce bread of a far better  
quality, and in much less time, than by any other pro-  
cess. And by the manufacturer's skill, with entire  
confidence, to the judgment of discriminating house-  
keepers, bakers, &c.

It is lighter, more digestible and nutritious, has an agree-  
able, natural taste; is less liable to sour; will retain its  
moisture longer than by any other process, and the  
whole preparation for the oven need not exceed ten  
minutes.

It is valuable because it is not perishable, and may be  
reasoned to be in places where it is not needed, and  
under all circumstances, it may be adopted, thus obviating  
all difficulty of procuring yeast or other form, which is  
frequently of an inferior quality, rendering the bread  
more or less unwholesome.

It is also valuable as regards economy, as it has been  
ascertained that a saving is effected in the flour of not  
less than 10 per cent. The sugar of the flour is not  
lost, the saccharine of the flour is lost by being converted  
into carbonic acid gas, and the waste is in-  
creased. By using Concentrated Leaven this waste is  
avoided, and the gas obtained in a manner equally ef-  
fectual. Formation, as has been stated, destroy a part  
of the flour or meal, and, in consequence, a barrel of  
flour weighing 100 lbs., which, by the common method,  
ordinarily makes about 250 lbs. of bread, gives by this  
process 260 lbs., thus effecting the very important saving  
of 10 per cent. in the quantity of flour. By conformity to  
the directions on each package, any person capable of  
ordinary attention may conduct the process, and the re-  
sult will invariably be highly satisfactory.

CERTIFICATE FROM DR. HAYES,  
Attorney for the State of Massachusetts.  
"I have analyzed the Concentrated Leaven, manufac-  
tured by Messrs. Edw. Chamberlin & Co., with reference  
to its purity and efficiency of action in producing the ef-  
fect of yeast, and have found it to be of a high quality,  
and well adapted for the purpose of leavening bread, and  
it is fit for making bread. This leaven is actually com-  
pounded from perfectly pure materials. It raises the  
dough without consuming the sugar or any other prin-  
ciple in the flour, perfectly, and the same weight of flour  
will produce more sweet, palatable bread than can be  
obtained through yeast; while for cakes and pastry it is  
equally fit, as it saves all risk, and much time of the  
pastry cook."

"The experiments made by me confirm the statements  
made by the manufacturer, and I am satisfied that this com-  
pound is worthy of public approval and extended use."  
Respectfully,  
J. A. HAYES, M.D., State Assessor,  
"116 Boylston street, Boston, September 26, 1860."
